EXMAR

Vertrauen Sie auf die exzellente Qualität unserer Produkte.

Wir verwenden ausschließlich hochwertigen Edelstahl für die Herstellung unserer Bauteile und arbeiten kontinuierlich an der Neu- und Weiterentwicklung unserer Produkte.

Um Ihnen stets die passende Lösung bieten zu können, optimieren wir unser Produktsortiment für Sie. Schauen Sie in unseren tagesaktuellen Online Shop, den Link dazu finden Sie auf unserer Website www.exmar.de.

Profitieren Sie von unserer technischen Kompetenz, wenn es um Baugruppen oder Rohrsysteme geht.

Rely on the excellent quality of our products.

Besides continuously improving and developing our products we only use the highest quality of stainless steel to manufacture our components.

To be able to offer you the best possible solution we optimise our range of products referring to your needs. Have a look at our Online Shop which is be linked from our website www.exmar.de/en.

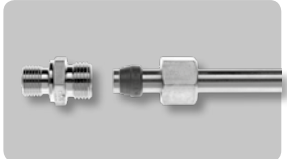

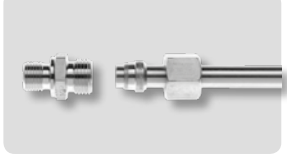

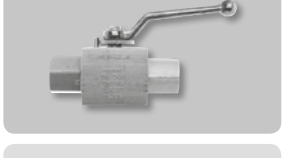

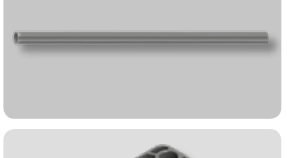

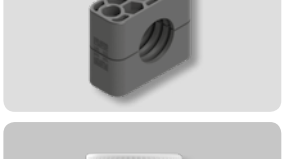

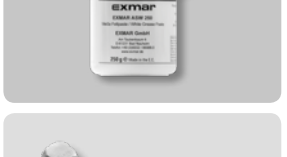

Take full benefit of our longstanding technical competence when it comes to assemblies or pipe systems.

Confíe en la extraordinaria calidad de nuestras uniones para tubos rígidos y flexibles.

Utilizamos exclusivamente acero inoxidable de alta calidad para la fabricación de nuestros componentes y trabajamos continuamente en la creación de productos nuevos y el desarrollo de los existentes.

Optimizamos nuestros productos para poder ofrecerle la mejor solución a sus necesidades. Puede ver nuestra tienda Online en el siguiente link: www.exmar.de/en.

Benefíciense de nuestra larga experiencia técnica para sistemas de tuberías y montajes de conjuntos.

**Montageanleitung
Schneidring-/NC-Klemmring-
verschraubungen**

**Assembly Instructions
Cutting/NC clamping ring fittings**

**Instrucciones de montaje
Racores de anillo cortante/
de apriete NC**

1. Rohrvorbereitung

- Rohr rechtwinklig absägen, eine Winkeltoleranz von 0,5° ist zulässig.
- Innere und äußere Kanten entgraten, Rohr reinigen und Späne entfernen.
- Keine Rohrabschneider verwenden.
- Das Rohr muss auf einer Länge von mind. 2x der Höhe der Überwurfmutter gerade sein.

2. Einstufige Montage

2.1. Vorbereitung

- Mit ASW Fettpaste einfetten: 24° Konus und Gewinde des Verschraubungsstutzens, Schneid-/NC-Klemmring (optional), Gewinde der Überwurfmutter

2.2. Montage

- Die Montage erfolgt in einem Arbeitsschritt durch Anziehen der Überwurfmutter mit ca. 1 ¼ bis 1 ½ Umdrehungen (Schneidringverschraubung) bzw. 1 ¾ (NC-Klemmringverschraubungen). Eine Markierung an Mutter und Stutzen sowie zwischenzeitliches, kurzes Lösen der Mutter erleichtern die Montage.

2.3. Kontrolle

- Zur Kontrolle die Überwurfmutter lösen.
- Schneidringeinschnitt prüfen. Der aufgeworfene Bund (siehe Bild) muss deutlich sichtbar sein. / Sitz des NC-Klemmrings prüfen, er darf axial nicht mehr verschiebbar sein.
- Anderenfalls ist ein nochmaliges Anziehen erforderlich (Wiedermontage).

Hinweis: Zur manuellen Montage von Edelstahl-Verschraubungen wird gemäß DIN 3859-2 der Einsatz eines gehärteten Montagewerkzeuges (Schraubenschlüssel) empfohlen, ab Größe 15L ist eine maschinelle Montage ratsam.

Achtung! Abweichende Anzugswege reduzieren die Nenndruckleistung und die Lebensdauer der Verschraubung. Leckagen oder andere Ausfallursachen sind die Folge.

1. Tube preparation

- Cut tube end square, an angular tolerance of 0,5° is allowed.
- Deburr inner and outer edges. Clean the tube and remove the swarf.
- Do not use a tube cutter.
- The tube has to be straight for a length of at least twice the height of nut.

2. One step assembly

2.1. Preparation

- Coat the following parts with ASW grease: 24° taper and thread of the connector, cutting/NC clamping ring (optional), thread of nut

2.2. Assembly

- Assembly is carried out in a single step by tightening the nut with approx. 1 ¼ to 1 ½ turns (cutting ring fittings) or 1 ¾ turns (NC clamping ring fittings). A marking on nut and fitting body as well as an intermediate, brief loosening of the nut facilitates assembly.

2.3. Check

- Loosen nut for checking.
- Check the cutting ring recess. The turned collar (see illustration) must be clearly visible. / Check the seating of NC clamping ring: it must not be able to be moved in axial direction.
- Otherwise the element must be tightened again (re-assembly).

Note: According DIN 3859-2 an assembly tool made of hardened steel (open ended spanner) is recommended for manual assembly of stainless steel fittings. For size 15L and above, machine assembly is advisable.

Attention! Deviating numbers of tightening turns reduce the nominal pressure rating and the life of the fitting, which can cause leakage or other failures.

1. Preparación del tubo

- Cortar el tubo en ángulo recto; se permite una tolerancia angular de 0,5°.
- Desbarbar el tubo por dentro y por fuera. Eliminando las virutas.
- No usar cortatubos ni tronzadoras a muela.
- El tubo debe ser recto en una longitud de min. 2x la altura de la tuerca.

2. Montaje de una etapa

2.1. Preparación

- Lubricar con ASW grasa lubricante: cono de 24° y rosca del cuerpo, anillo cortante/de apriete NC (opcional), rosca de la tuerca de unión

2.2. Montaje

- El montaje se efectúa en un solo paso, apretando la tuerca de unión aproximadamente 1 ¼ a 1 ½ de vuelta (racores de anillo cortante) o 1 ¾ de vuelta (racores de anillo de apriete NC). Una marca en la tuerca y en el racor, además de aflojar brevemente la tuerca, facilitan el montaje.

2.3. Control

- Soltar la tuerca de unión.
- Examinar el corte del anillo cortante. El collar formado debe verse claramente (véase figura). / Comprobar el asiento del anillo de apriete NC, que no debe poder deslizarse axialmente.
- Si es necesario a apretar (repetición del montaje).

Advertencia: Según DIN 3859-2, para el montaje de racores manual de acero inoxidable se recomienda el uso de una herramienta de montaje templada. A partir del tamaño 15L es recomendable un montaje mecanizado.

Atención! Carreras de apriete diferentes reducen la presión nominal estática y la vida útil de la unión roscada. Como consecuencia pueden producirse pérdidas y fallos por otras

Montageanleitung

Schneidring-/NC-Klemmring-verschraubungen (Fort.)

3. Zweistufige Montage

3.1. Mit Vormontagesutzen HVMS

3.1.1. Vorbereitung

- Zum Rohr passenden Vormontagesutzen in den Schraubstock spannen.
- Mit ASW Fettpaste einfetten: Kegel und Gewinde des Vormontagesutzens, Schneid-/NC-Klemmring (optional), Gewinde der Überwurfmutter
- Auf die richtige Lage des Schneid-/NC-Klemmrings achten – sonst Fehlmontage.
- Überwurfmutter von Hand so weit wie möglich auf den Vormontagesutzen schrauben, dass der Schneid-/NC-Klemmring fest zwischen Rohr und Überwurfmutter anliegt.

3.1.2. Vormontage mit HVMS

- Rohr bis zum Rohranschlag des Stutzens schieben. **Liegt das Rohr am Anschlag nicht an, erfolgt kein Rohreinschnitt / kann das Rohr nicht gehalten werden.** Bei Verwendung von einwandfreiem Rohrmaterial lässt sich das Rohr ohne Kraftaufwand bis zum Rohranschlag schieben, anderenfalls die Rohrenden auf Verformung oder Oberflächenfehler überprüfen. (Beachten Sie hierzu den Abschnitt "Empfehlungen für Edelstahlrohre")
- Überwurfmutter mit einem Schraubenschlüssel ca. 1 Umdrehung anziehen.

3.1.3. Kontrolle

- Zur Kontrolle die Überwurfmutter lösen.
- Schneidringeinschnitt prüfen. Der aufgeworfene Bund (siehe Bild) muss deutlich sichtbar sein. / Sitz des NC-Klemmrings prüfen, er darf axial nicht mehr verschiebbar sein.
- Anderenfalls ist ein nochmaliges Anziehen erforderlich (Wiedermontage).

Hinweis: Ab Größe 15L ist eine maschinelle Montage ratsam.

Hinweis zum Vormontagesutzen

Auch gehärtete Vormontagesutzen unterliegen einem Verschleiß. Nach jeder 50. Vormontage ist die Toleranzhaltigkeit mit einer Konuslehre zu überprüfen. Bei Überschreiten der zugelassenen Toleranzen ist der Vormontagesutzen zu ersetzen.

Assembly Instructions

Cutting/NC clamping ring fittings (cont.)

3. Two step assembly

3.1. With pre-assembly stud HVMS

3.1.1. Preparation

- Firmly clamp the pre-assembly stud in the corresponding tube diameter in a vice.
- Coat the following parts with ASW grease: taper and thread of the pre-assembly stud, cutting/NC clamping ring (optional), thread of nut
- Make sure the cutting/NC clamping ring is positioned correctly to avoid faulty assembly.
- Screw the nut by hand as far as possible on the pre-assembly stud so that the cutting/NC clamping ring lies firmly between the tube and nut.

3.1.2. Pre-assembly with HVMS

- Push the tube up to the stop in the stud. **If the tube does not butt against the stop, the tube will not be cut / the tube will not be clamped.** If the tube material is in perfect condition, the tube can be pushed to the stop without any force. If this is not the case, check the tube ends for deformation or a defective surface. (See section "Recommendations for stainless steel tubes").
- Tighten nut, with the open ended spanner, approx. 1 turn.

3.1.3. Check

- Loosen nut for checking.
- Check the cutting ring recess. The turned collar (see illustration) must be clearly visible. / Check the seating of NC clamping ring: it must not be able to be moved in axial direction.
- Otherwise the element must be tightened again (re-assembly).

Note: For size 15L and above, machine assembly is advisable.

Note concerning pre-assembly stud

Also hardened pre-assembly studs are subject to wear. Periodically, after every 50th pre-assembly the accuracy and tolerance of the taper has to be inspected. In case of heavy wear and non-conformity the stud has to be replaced.

Instrucciones de montaje

Racores de anillo cortante/ de apriete NC (cont.)

3. Montaje de dos etapas

3.1. Con accesorio de premontaje HVMS

3.1.1. Preparación

- Fijar el accesorio de premontaje correspondiente al tubo en el tornillo de banco.
- Lubricar con grasa ASW: cono y rosca del accesorio de premontaje, anillo cortante/de apriete NC (opcional), rosca de la tuerca de unión
- Asegurar la posición correcta del anillo cortante/de apriete NC, de lo contrario, el montaje es incorrecto.
- Atornillar manualmente la tuerca de unión en los accesorios hasta que el anillo cortante/de apriete NC quede encajado firmemente entre el tubo y la tuerca de unión.

3.1.2. Premontaje con HVMS

- Empujar el tubo hasta el tope del racor. **Si el tubo no se ajusta hasta el tope, no se produce el corte en el tubo / no se podrá retener el tubo.** Si el material del tubo está en perfecto estado, el tubo puede empujarse sin esfuerzo hasta el tope; en caso contrario, comprobar si los extremos del tubo están deformados o tienen defectos superficiales. (Consultar también al respecto el apartado "Recomendación para tubos de acero inoxidable".)
- Con una llave, apretar aproximadamente 1 vuelta la tuerca de unión.

3.1.3. Control

- Soltar la tuerca de unión.
- Examinar el corte del anillo cortante. El collar formado debe verse claramente (véase figura). / Comprobar el asiento del anillo de apriete NC, que no debe poder deslizarse axialmente.
- En caso contrario, es preciso volver a apretar (repetición del montaje).

Nota: A partir del tamaño 15L es recomendable (necesario) un montaje mecanizado

Advertencia por accesorio de premontaje

Los accesorios de premontaje templados también se desgastan. Cada 50 operaciones de premontaje, comprobar la precisión de tolerancia con un calibre para conos y cambiar el accesorio de premontaje si supera las tolerancias permitidas.

Assembly Instructions Cutting/NC clamping ring fittings (cont.)

Instrucciones de montaje Racores de anillo cortante/ de apriete NC (cont.)

3.2. Mit elektrohydraulischem Vormontagegerät US-FL/01

3.2.1. Vormontage mit US-FL/01

- Überwurfmutter und Schneid-/NC-Klemmring zum Rohrende aufchieben.
- Vorbereitung und Auswahl von Vormontage-
studzen sowie Gegenhalteplatte gemäß den
dem Gerät beiliegenden Instruktionen
- Beachten Sie die von EXMAR empfohlenen
Verpressdrücke im Abschnitt "Empfehlungen
für Edelstahlrohre".

3.2.2 Kontrolle

- Schneidringeinschnitt prüfen. Der aufgeworfene Bund (siehe Bild) muss deutlich sichtbar sein. / Sitz des NC-Klemmrings prüfen, er darf axial nicht mehr verschiebbar sein.
- Anderenfalls ist ein nochmaliges Nachpressen erforderlich.

4. Fertigmontage / Wiederhol montage

- Vormontiertes Rohr in die geschmierte Verschraubung einsetzen. Das Gewinde und der Konus des Stutzens sollen vor der Montage geschmiert werden.
- Die Fertigmontage erfolgt durch ein Nachziehen der Überwurfmutter mit ca. $\frac{1}{4}$ bis $\frac{1}{2}$ Umdrehung (Schneidringverschraubung) bzw. $\frac{3}{4}$ Umdrehung (NC-Klemmringverschraubung).

5. Montage mit Verstärkungshülsen VHS

Um die Funktion der Verschraubung bei dünnwandigen oder weichen Rohren zu gewährleisten, empfehlen wir den Einsatz von EXMAR Verstärkungshülsen.

Montage der Verstärkungshülse

Die Verstärkungshülsen lassen sich leicht und ohne Sonderwerkzeug montieren.

- Das vordere Ende der Verstärkungshülse ist mit einer Rändelung am Außendurchmesser versehen. Die Verstärkungshülse von Hand bis zur Rändelung in das Rohr einstecken.
- Mit einem weichen Hammer (Gummihammer o. ä.) die Verstärkungshülse leicht in das Rohr eintreiben. Die Verzahnung der Rändelung drückt sich nun in das Rohr, ohne dieses aufzuweiten und fixiert die Verstärkungshülse.
- Danach die Rohrmontage durchführen, wie unter 2. oder 3. beschrieben.

Bestellhinweis: Bei Bestellung von Verstärkungshülsen Rohraußendurchmesser und Wandstärke angeben. Rohrgrößen, die mit einer Verstärkungshülse versehen werden sollen, sind im Abschnitt "Empfehlungen für Edelstahlrohre" gekennzeichnet.

3.2. With electro-hydraulic pre- assembly device US-FL/01

3.2.1. Pre-assembly with US-FL/01

- Slide the nut and cutting/NC clamping ring onto the tube end.
- Preparation and selection of pre-assembly stud as well as counter plate according to the instructions included with the device
- Observe the applied pressing power values as recommended by EXMAR in section "Recommendations for stainless steel tubes".

3.2.2. Check

- Check the cutting ring recess. The turned collar (see illustration) must be clearly visible. / Check the seating of NC clamping ring: it must not be able to be moved in axial direction.
- Otherwise, further compression is required.

4. Final assembly / Re-assembly

- Insert the pre-assembled tube in the greased fitting. The thread and the cone of the connector should be greased before mounting.
- Assembly is completed by a final tightening of the nut by approx. $\frac{1}{4}$ to $\frac{1}{2}$ turn (cutting ring fitting) or $\frac{3}{4}$ turn (NC clamping ring fitting).

5. Assembly with reinforcing sleeves VHS

To ensure the correct function of the fitting when using thin-walled or soft tubes, we recommend to use the EXMAR reinforcing sleeves.

Assembly of reinforcing sleeve

Reinforcing sleeves can be easily assembled without any need of special tools.

- The outer front end of the sleeve is knurled. Insert the reinforcing sleeve by hand into the tube up to the knurled section.
- A rubber hammer or soft mallet should be used to lightly drive the reinforcing sleeve into the bore; the knurled ring then being secured without splaying the tube.
- Fitting assembly is proceeded as described in 2. or 3.

Ordering information: When ordering reinforcing sleeves the tube outside diameter and wall thickness should be indicated. Tube sizes, where reinforcing sleeves should be used are indicated in the section "Recommendations for stainless steel tubes".

3.2. Con máquina de premontaje electrohidráulica US-FL/01

3.2.1. Premontaje con US-FL/01

- Deslizar la tuerca de unión y el anillo cortante/ de apriete NC hacia el extremo del tubo.
- Preparación y selección de racor de premontaje, así como placa de sujeción conforme a las instrucciones adjuntas al equipo
- Respetar las presiones de prensado recomendadas por EXMAR en el apartado "Recomendaciones para tubos de acero inox."

3.2.2. Control

- Examinar el corte del anillo cortante. El collar formado debe verse claramente (véase figura). / Comprobar el asiento del anillo de apriete NC, que no debe poder deslizarse axialmente.
- En caso contrario, es preciso volver a apretar.

4. Montaje final / repetición del montaje

- Inserte el tubo premontado en el racor lubricado. La rosca y el cono del racor deben volver a lubricarse antes del montaje final.
- Para el montaje final se aprieta aproximadamente $\frac{1}{4}$ a $\frac{1}{2}$ de vuelta (racores de anillo cortante) o $\frac{3}{4}$ de vuelta (racores de anillo de apriete NC) la tuerca de unión.

5. Montaje con casquillos reforzados VHS

Para poder garantizar la función de los racores para tubos de pared delgada o tubos blandos, recomendamos utilizar casquillos reforzados EXMAR.

Montaje del casquillos reforzados

Los casquillos reforzados se montan fácilmente sin herramientas especiales.

- El extremo delantero del casquillo lleva un moleteado en el diámetro exterior. Introduzca el casquillo con la mano en el tubo hasta el moleteado.
- Encajar el casquillo en el tubo golpeándolo suavemente con un martillo blando (de goma o similar). El dentado del moleteado entra a presión en el tubo sin expandirlo y enclava el casquillo.
- Acto seguido, montar el tubo según se describe en los puntos 2. o 3.

Instrucciones de pedido: Para el pedido de casquillos reforzados, rogamos indicar el diámetro exterior y el grosor del tubo. Las medidas de tubos que deben utilizarse en casquillo reforzado se identifican en el apartado "Recomendaciones p.tubos de acero inox."

Montageanleitung Bördel-Rohrverschraubungen

1. Alle miteinander reibenden Verschraubungsteile sorgfältig einfetten (ASW Fettpaste).
2. Das zu verlegende Rohr rechtwinklig absägen. ACHTUNG, keinen Rohrabstreifer verwenden!
3. Das Rohr innen und außen entgraten, nicht anfasen!
4. Rohrende reinigen, da sonst die Dichtfläche des Rohres beim Bördeln beschädigt wird.
5. Bördel-Verschraubungsteile über das Rohrende schieben.
6. Rohr in Bördelmaschine oder Bördelwerkzeug für Schraubstock aufbördeln. Auf Risse überprüfen.
7. Bördel-Zwischenring (unverlierbar) in Verschraubung einlegen und aufgebördeltes Rohr an Zwischenring anlegen. Überwurfmutter (Druckring einseitig) von Hand anziehen, bis deutlicher Widerstand spürbar ist.
8. Anschließend Fertigmontage mit ca. ¼ bis ½ Umdrehungen.

Wiederholmontage

Nach Lösen der Verbindung ist der Wiederaufbau ohne erhöhten Kraftaufwand vorzunehmen.

Rohrauswahl

Es ist eine bördelfähige Rohrqualität zu verwenden, vorzugsweise nahtloses Präzisionsedelstahlrohr nach DIN 17 458, Toleranzen nach DIN EN 10 305-1, Werkstoff 1.4571 / AISI 316 Ti oder einen gleichwertigen Werkstoff.

Dichtungen

Serienmäßig:
- FKM
- Temperaturbereich -20°C bis +200°C

Werkzeuge

Werden Bescheinigungen über Materialprüfungen DIN 10 204 gewünscht, so ist dies bei der Bestellung anzugeben (Abnahmeprüfzeugnis 3.1 gegen Berechnung).

Assembly Instructions Flare tube fittings

1. Carefully grease all the fitting parts which rub against each other with ASW grease.
2. Cut the tube to be installed at right angles. ATTENTION, do not use a tube cutter!
3. Deburr the tube inside and outside. Do not chamfer!
4. Clean tube ends so the sealing surface will not be damaged when flaring.
5. Slide flare connection parts onto tube end.
6. Flare tube end with flaring machine or vice flaring tool. Check piece for fissures.
7. Insert flare adaptor (und detachable) into fitting and connect flare tube to the adaptor. Tighten nut (flare sleeve inside) by hand.
8. Tighten flare nut approx. ¼ to ½ turn beyond the point where resistance is felt for final assembly.

Re-assembly

Each time the fitting is disconnected the nut must be re-tightened without using excessive force.

Tubes

A tube quality suitable for flaring should be used, preferably seamless precision stainless steel tube according to DIN 17 458, tolerances per DIN EN 10 305-1, material 1.4571 / AISI 316 Ti or equivalent material.

Seals

Standard seals:
- FKM
- Temperature range from -20°C to +200°C

Material certificates

Requests for verification of material tests according to DIN 10 204 should be made when placing the order (inspection certificate 3.1, cost will be charged).

Instrucciones de montaje Racores rebordado

1. Engrasar a fondo todas las piezas con rozamiento de la unión roscada (ASW grasa lubricante).
2. Cortar el tubo para montar en ángulo recto. ATENCIÓN: no usar cortatubos.
3. Desbarbar el tubo por fuera y dentro, sin tocarlo.
4. Limpiar el extremo de tubo porque la superficie de obturación del tubo puede quedar dañada al rebordar.
5. Introducir el extremo del tubo a través de las piezas del racor rebordado.
6. Rebordar el tubo en una máquina o herramienta de rebordar para tornillo de banco. Comprobar si hay grietas.
7. Colocar el anillo intermedio rebordado (imperdible) en el racor y apoyar el tubo rebordado contra el adaptador. Apretar la tuerca de unión con la mano.
8. Apretar la tuerca de unión hasta notar una clara resistencia. Finalizar el montaje apretando aproximadamente ¼-½ vuelta.

Repetición del montaje

Después de aflojar la unión, repetir el apriete sin aplicar más fuerza.

Selección de tubos

Utilizar una calidad de tubos aptos para rebordar. Preferiblemente tubos de acero inoxidable de precisión, sin costuras, según DIN 17 458, con tolerancias según DIN EN 10 305-1, material 1.4571 / AISI 316 Ti o material equivalente.

Juntas

De serie:
- FKM
- Intervalo de temperatura -20°C a +200°C

Certificados de material

Si se necesitan certificados de ensayos de material según DIN 10 204, deberá especificarse al realizar el pedido (se facturará a partir del certificado de recepción 3.1).

Montageanleitung
Dichtkegelverschraubungen

Assembly Instruction
Tapered seal fittings

Instrucciones de montaje
Racores cónicos

1. Alle miteinander reibenden Verschraubungsteile sorgfältig einfetten (ASW Fettpaste).
2. Rohranschluss in gewünschte Richtung ausrichten und Überwurfmutter bis zum fühlbaren Kraftanstieg von Hand festziehen.
3. Überwurfmutter ¼ Umdrehung anziehen. Dazu Verschraubungsstutzen mit Schlüssel gegenhalten.

Achtung! Abweichende Anzugswege reduzieren die Nenndruckleistung und die Lebensdauer der Verschraubung. Leckagen oder andere Ausfallursachen sind die Folge.

1. All the fitting parts which produce friction must be carefully greased (ASW grease).
2. Align the tube connection in the desired direction and hand-tighten the nut until the tightening force increases noticeably.
3. Tighten the nut ¼ turns. In doing so, hold the connector steady with a open ended spanner.

Attention! Deviating tightening procedures reduce the nominal pressure performance and the service life of the connection. This may result in leakage or other failures.

1. Engrasar a fondo todas las piezas con rozamiento de la unión roscada (ASW grasa lubricante).
2. Alinear la conexión en la dirección deseada y apretar manualmente la tuerca de unión hasta que la fuerza de apriete aumente notablemente..
3. Apretar la tuerca de unión ¼ de vuelta. Sujetar el cuerpo con una llave.

Atención! Carreras de apriete diferentes reducen la presión nominal estática y la vida útil de la unión roscada. Como consecuencia pueden producirse pérdidas y fallos por otras causas.

Montageanleitung

Assembly Instructions
Hose couplings

Instrucciones de montaje
Armaduras para tubos flexibles

Anleitung zum Verpressen

- Wählen Sie alle Komponenten zur Fertigung der Schlauchleitung anhand unseres aktuellen Kataloges aus. Für die anschlussseitigen Befestigungen stehen eine Reihe von Armaturen zur Verfügung.
Schlaucharmaturen müssen so ausgewählt werden, dass sie den zu erwartenden mechanischen, thermischen und chemischen Beanspruchungen standhalten.
- Schneiden Sie den ausgewählten Schlauch mit einem für den Schlauch vorgesehenen Schneideblatt senkrecht auf die gewünschte Länge.
- Setzen Sie die Pressfassung komplett über das Schlauchende und schieben Sie diese bis zum Anschlag über den Schlauch.
Schmieren Sie das schlauchseitige Fußteil des Nippels mit unserer ASW-Fettpaste, danach schieben Sie den Nippel in das Schlauchende. Überprüfen Sie, ob die Einhängenut zwischen Fassung und Schlauchnippel richtig positioniert wurde.
- Zum Verpressen der Schlauchleitung wählen Sie den Pressbackensatz, der dem angegebenen Pressmaß am nächsten liegt, aus. Bei z.B. einem Pressmaß von 23 mm verwenden Sie einen Backensatz von 22 mm.
- Um die Verpressung zu kontrollieren, prüfen Sie mit Hilfe einer Schieblehre den Durchmesser der nun verpressten Fassung, mittig, in drei verschiedenen Positionen, ca. 120° voneinander versetzt. Diese drei Messungen müssen dem Pressmaß entsprechen. Falls das Pressmaß nicht erreicht wurde, erhöhen Sie die Einstellung Ihrer Maschine in 0.1 mm Schritten, um den korrekten Durchmesser zu erreichen.
Trotz empfohlenem Pressmaß ist es notwendig, den Nippeleinfall zu messen. Der korrekte Nippeleinfall beträgt in der Regel, je nach Durchmesser, zwischen 0.2 und 1.4 mm.
- Eine zweifache Verpressung ist zu vermeiden, da dies die Lebenserwartung einer Schlauchleitung verringert. Benutzen Sie daher Pressbacken, die lang genug sind, um die Fassung komplett zu verpressen.
Pressfassungen dürfen nicht wiederverwendet werden.
- Die Kennzeichnung muss dauerhaft und unter Berücksichtigung der jeweiligen Schlauchnormen erfolgen.

Pressing instructions

- Select all the components you need for your hose line from our current catalogue. We have a number of connection options to choose from.
Hose fittings must be selected according to the anticipated mechanical, thermal and chemical loads.
- Cut the selected hose to length, perpendicularly with a blade appropriate for hoses.
- Slide the ferrule completely over the hose until the stop.
Grease the hose side part of the nipple with our ASW grease and then insert the nipple in the hose end. Check, that the groove between the socket and the hose nipple is positioned correctly.
- Use the press jaws closest in dimension, e.g. for a press dimension of 23 mm, use 22 mm jaws.
- With the help of a slide gauge, check the diameter of the pressed socket, centred, in three different positions, approx. 120° apart. These three measurements must correspond to the press dimension. If the press dimension has not been realized, increase the setting on your machine in 0.1 mm increments until the correct diameter is reached.
Despite the recommended press dimension, it is also necessary to measure the nipple deformation. The correct nipple deformation is generally between 0.2 und 1.4 mm, depending on the diameter.
- A second pressing should be avoided since this reduces the life expectancy of a hose line. That is why press jaws should be used which are long enough to completely press the socket.
Press sockets may not be reused.
- Identification must be permanent and according to the respective hose standards.

Instrucciones de prensado

- Elegir los componentes para la elaboración de tuberías flexibles en nuestro catálogo actual. Para las fijaciones del lado de conexión puede elegirse entre varias valvulerías.
Elegir valvulerías para las tuberías flexibles que resistan las cargas mecánicas, térmicas y químicas esperadas.
- Cortar el tubo flexible elegido con una cuchilla adecuada, tronzando en perpendicular a la longitud deseada.
- Introducir el extremo del tubo completamente en el casquillo para prensar y empuje el casquillo sobre el tubo hasta llegar al tope.
Lubricar la pieza base de la boquilla del lado del tubo con nuestra ASW grasa lubricante e introducir la boquilla en el extremo del tubo. Comprobar si la ranura de enganche entre la valvulería y la boquilla del tubo flexible se ha situado correctamente.
- Para prensar la tubería flexible, elegir el juego de mordazas de prensado que mejor se ajuste a la medida de prensado especificada. Para una medida de prensado de 23 mm, por ejemplo, utilizar un juego de mordazas de 22 mm.
- Para verificar el prensado, utilizar un pie de rey para comprobar el diámetro del engaste prensado en el centro en tres posiciones diferentes, separadas aproximadamente 120° una de otra. Las tres mediciones deben corresponder a la medida de prensado. Si no se alcanza la medida de prensado, aumentar el ajuste de la maquina en pasos de 0.1 mm hasta conseguir el diámetro correcto.
Pese a la medida de prensado recomendada, es necesario medir el grado de compresión de la boquilla. La compresión correcta de la boquilla suele ser de 0.2 a 1.4 mm, según diámetro.
- Evitar el prensado doble, pues acorta la esperanza de vida de la tubería flexible.
Utilizar mordazas de prensado que sean suficientemente largas para prensar el engaste completo.
Los engastes de prensado no deben reutilizarse.
- La identificación ha de ser indeleble y realizarse de acuerdo con las oportunas normas para tubos flexibles.

Montageanleitung**Schlaucharmaturen** (Forts.)**Assembly Instructions****Hose couplings** (cont.)**Instrucciones de montaje****Armaduras para tubos flex.** (cont.)**Anmerkung**

- Sämtliche Fertigungstoleranzen sowie weitere technische Informationen zur Fertigung von Schlauchleitungen entnehmen Sie der DIN 20066.
- Wir weisen darauf hin, dass sich die genannten Angaben zur Fertigung von Schlauchleitungen nur auf die Verwendung von EXMAR-Produkten beziehen. Bei Verwendung anderer Fabrikate ist ein Kompatibilitätstest anzufordern.

Note

- All manufacturing tolerances as well as additional technical data on the manufacture of hose lines can be found in DIN 20066.
- We would like to point out that the above information on assembling hose lines is only applicable to the use of EXMAR products. If other brands are used, a compatibility test should be requested.

Nota

- Para conocer las tolerancias de fabricación y demás información técnica relativa a la elaboración de tuberías flexibles, consultar la norma DIN 20066.
- Hacemos hincapié en que los datos mencionados para la fabricación de tuberías flexibles se refieren solamente a la utilización de productos EXMAR. Para utilizar productos de otras marcas deberá solicitarse una prueba de compatibilidad.

Wichtige Hinweise:

- Die in der Tabelle angegebenen Anzugsdrehmomente [in Nm] sind Richtwerte.
- Die Werte können, abhängig vom verwendeten Material, den Toleranzen, der Schmierung und der Oberflächenbeschaffenheit des Gegenkörpers, stark variieren.
- Die Anzugsdrehmomente unterliegen einer Toleranz von ±10 %.
- Einschraubgewinde vor dem Einschrauben mit geeigneten Mitteln schmieren.
- Die angegebenen Werte gelten für die Materialpaarung Einschraubverschraubung/ Gegenkörper Edelstahl 1.4571/AISI 316 Ti.
- Die Werte gelten nicht für Schwenkverschraubungen.

Important information:

- The tightening torques stated in the table [in Nm] are guideline values.
- The values may vary greatly, depending on the material used, the tolerances, the lubrication and the surface properties of the mating material.
- The tightening torques are subject to a tolerance of ±10 %.
- Lubricate the male thread with a suitable lubricant before screwing it in.
- The stated values apply for the material pair male adaptor/counter body stainless steel 1.4571 / AISI 316 Ti.
- The values do not apply for banjo elbow fittings.

Indicaciones importantes:

- Los pares de apriete indicados en la tabla [en Nm] son valores orientativos.
- Los valores pueden variar sensiblemente dependiendo del material utilizado, de las tolerancias, de la lubricación y del acabado de la superficie del contracuerpo.
- Los pares de apriete tienen una tolerancia del ±10 %.
- Lubricar las roscas de conexión con agentes adecuados antes de enroscar.
- Los valores indicados son válidos para la combinación de materiales racor enroscable/ contracuerpo de acero inoxidable 1.4571 / AISI 316 Ti.
- Los valores no se aplican a racores orientables.

- geeignet zum Biegen

Handhabung

- Rohre nicht über harte Unterlagen schleifen (z.B. Zement, Asphalt, Schotter oder Metalle)
- Rohrenden beim Transport und Handling schützen (mit Kunststoff-Kappen, Klebstreifen usw.)
- Rohre nicht aus dem Gestell zerren
- nur scharfe Rohrabstecher oder Bügelsägen verwenden und zu tiefe Schnitte pro Umdrehung oder Hubbewegung vermeiden
- Rohrenden immer innen und außen entgraten
- Verunreinigungen und Späne können zu Störungen in der Anlage und zu Leckagen führen

Spezielle Ausführung

Fragen Sie uns für geschweißte Rohre an, wir beraten Sie gerne.

Material

Stainless steel 1.4571 / AISI 316 Ti or 1.4301 / AISI 304

Type

seamless, cold finished, bright, annealed, state of delivery CFA, according to EN 10305-1 / EN 10216-5 / ISO 1127

Tolerances

- EN 10305-1, option 10 (outer Ø according to table 5)
- ISO 1127 (tolerance classes D4/T3)

Surface finish

- non-scaling
- no surface damage (careful handling is essential!)
- tubes must be free of grooves

Hardness

- as manufactured
- recommended Vickers hardness 155-178 HV
- suitable for bending

Handling

- do not grind tubes on hard surfaces (e.g. cement, asphalt, gravel or metals)
- protect tube ends during transport and handling (with plastic caps, adhesive tape, etc.)
- lift tubes carefully out of case
- use only sharp tube cutters or hack saws and avoid cutting too deep in one turn
- always deburr tube ends inside and out
- contamination and shavings can cause damage in the system and lead to leakage

Special version

Ask us about welded tubes, we will be happy to advise you.

Material

acero inoxidable 1.4571 / AISI 316 Ti o 1.4301 / AISI 304

Ejecución

sin costuras, fabricado en frío, recocado brillante, estado de suministro CFA, EN 10305-1 / EN 10216-5 / ISO 1127

Tolerancias

- EN 10305-1, opción 10 (Ø exterior según la tabla 5)
- SO 1127 (clase de tolerancia D4/T3)

Acabado de superficies

- sin cascarilla
- libre de defectos de superficie (manipular con precaución)
- los tubos deben estar libres de estrías

Dureza

- como fabricado
- dureza Vickers recomendada 155-178HV
- adecuados para doblar

Manipulación

- no arrastrar los tubos sobre bases duras (p. ej., cemento, asfalto, grava o metales)
- proteger los extremos de los tubos durante el transporte y la manipulación (con capuchones de plástico, cintas adhesivas, etc.)
- no sacar violentamente los tubos del soporte
- utilizar siempre cortatubos o sierras de arco afilados y evitar cortes demasiado profundos por vuelta o carrera
- desbarbar siempre el interior y exterior de los extremos
- la suciedad y las virutas pueden provocar fallos de la instalación y fugas

Acabados a medida

Consulte nuestra oferta de tubos soldados; con mucho gusto le asesoraremos

Der Verpressdruck in [bar] entspricht dem einzustellenden Druck an der Vormontagemaschine.

Wird die angegebene Rohrwandstärke unterschritten, ist eine Verstärkungshülse zu verwenden. Ist die entsprechende Dimension der Verstärkungshülse nicht erhältlich, muss eine andere Rohrdimension eingesetzt werden.

Für die mit einem * versehenen Rohrabmessungen empfehlen wir den Einsatz einer Verstärkungshülse (siehe VHS in Kapitel 10).

The pressing power in [bar] corresponds to the pressure to be set on the pre-assembly device.

A reinforcing sleeve must be used for tubes with lesser wall thickness. If no suitable size is available, we urgently recommend the use of an alternative tube dimension for safety reasons.

For the tube sizes indicated with a * we recommend to use a reinforcing sleeve (see VHS in chapter 10).

La fuerza de prensado en [bar] corresponde a la presión que debe ajustarse en la máquina de premontaje.

Emplear un casquillo reforzado en caso de utilizar tubos de paredes más delgadas de lo indicado en este documento. Por razones de seguridad, se aconseja encarecidamente utilizar una dimensión de tubo alternativa si no se encuentra el tamaño adecuado.

Recomendamos utilizar casquillos reforzados para las medidas de tubos identificadas con un * (ver VHS in capítulo 10).

Funktionsprinzip

Vor der Montage
Before assembly
Antes del montaje

Operating principle

Nach der Montage
After assembly
Después del montaje

Die Überwurfmutter (1) presst den keilförmig vorgeformten Schneidring (2) beim Anziehen in den Innenkegel (3) des Verschraubungsstutzens (4).

On tightening the nut (1) the cutting ring (2) is pressed into the inner taper (3) of the connector (4) and into the tube (5).

Al apretar, la tuerca de unión (1) empuja el anillo de corte con forma de cuña (2) dentro del cono interior (3) del cuerpo (4).

Der Schneidring wird dadurch ringförmig auf das Rohr (5) gepresst, so dass die gehärtete Schneidkante (6) des Schneidringes gleichförmig in das Rohr einschneidet. Dadurch wirft sich ein ringförmiger Bundaufwurf des Rohrmaterials vor der Schneidkante auf.

The cutting ring is pressed annularly on the tube (5) so that the hardened cutting edge (6) of the cutting ring cuts uniformly into the tube. This forms a circumferential bead of the tube material in front of the cutting edge.

En esta operación, el anillo cortante ataca el tubo (5) en toda la circunferencia de forma que el filo templado (6) del anillo realiza un corte homogéneo en el mismo y levanta un reborde anular de material delante del filo.

Die konstruktive Formgebung des Schneidringes begrenzt die Eindringtiefe. Gleichzeitig verkeilt sich der Schneidring mutternseitig auf dem Rohr (7) und bietet so zusätzlichen Halt und Entlastung der Schneidzone bei dynamischer Beanspruchung. Formschluss und Kraftschluss des Schneidringesystems gewähren einen sicheren Halt der Rohrverbindungen.

The design form of the cutting ring determines the cut-in depth. A tapered nut/cutting ring interface results in the cutting ring being pressed into the tube (7), thereby providing additional support and relief to the cut-in zone under dynamic load conditions. The mechanical and frictional principle of the cutting ring system guarantees a secure tube connection.

El diseño constructivo del anillo de corte limita la profundidad de penetración. Al mismo tiempo, el anillo de corte se enclava en el tubo en el lado de la tuerca (7) y brinda fijación y descarga adicional en la zona de corte para esfuerzos dinámicos. La unión positiva y no positiva del sistema de anillo de corte garantiza la fijación segura de las uniones de tubos.

Anzuschließende Rohre

Nahtlose, gezogene Präzisionsrohre aus Edelstahl (DIN EN 10216-5/EN ISO 1127, Toleranzkl. D4/T3) mit sauberer, glatter Oberfläche oder Kunststoffrohre. Außendurchmesser innerhalb ± 0,1 mm; Ausnahme: Kunststoffrohre. Siehe auch Kapitel Rohre und Schläuche. Weitere Materialien auf Anfrage.

Tubes to use

Seamless, cold-drawn, high precision stainless steel tubes (according to DIN EN 10216-5/EN ISO 1127 tolerance class D4/T3) with clean, smooth surface or plastic tubes. Outer diameter within ± 0,1 mm; exception: plastic tubes. See also chapter tubes and hoses. Other materials on request.

Tubos para conectar

Tubos de precisión estirados sin costuras, de acero inoxidable (DIN EN 10216-5/EN ISO 1127, clase de tolerancia D4/T3) con superficie lisa limpia o tubos de plástico. Diámetro exterior con tolerancia de ± 0,1 mm; excepción: tubos de plástico. Véase también el capítulo Tubos y mangueras. Otros materiales bajo demanda.

Werkzeugnis

Werden Bescheinigungen über Materialprüfungen nach DIN EN 10 204 gewünscht, so ist dies bei Bestellung anzugeben (Abnahmeprüfung gegen Berechnung).

Material certificates

Inform us with your order if you need material testing certificates according to DIN EN 10204 (charges apply to inspection certificates 3.1).

Certificado de material

Si se necesitan certificados de ensayos de material según DIN EN 10 204, deberá especificarse al realizar el pedido (se facturará a partir del certificado de recepción 3.1).

Zulassungen

DNV GL, ABS, LR, BV, CCS, RMRS. Weitere Informationen auf Anfrage.

Approvals

DNV GL, ABS, LR, BV, CCS, RMRS. Further information on request.

Homologaciones

DNV GL, ABS, LR, BV, CCS, RMRS. Más información bajo demanda.

Technische Information

Dichtkegelverschraubungen

Technical information

Tapered seal fittings

Información técnica

Racores cónicos

Baumaße

- Baumaße entsprechend Verschraubungen nach DIN 2353 und ISO 8434-1
- passend für alle Gewindestutzen mit 24° Innenkonen (Bohrungsform W DIN 3861)

Dicht- und Halteprinzip

Bei den EXMAR Dichtkegelverschraubungen ist die Überwurfmutter drehbar auf den Stutzen montiert. Durch den zusätzlich im Kegel eingelegten O-Ring kommt eine metallisch/elastomere Abdichtung zustande, die eine hohe Leckagesicherheit gewährleistet.

Vorteile

- richtungseinstellbar durch drehbare Überwurfmutter
- einfache und schnelle Montage durch fixierten Anzugsweg mit geringem Drehmoment
- hohe Belastbarkeit bei Druckschwankungen und Schwingungen im System

Druckbereiche für

Dichtkegelverschraubungen

L: leicht	6 - 18 mm	PN 315 (bar)
	22 - 42 mm	PN 160 (bar)
S: schwer	6 - 14 mm	PN 630 (bar)
	16 - 30 mm	PN 400 (bar)
	38 mm	PN 315 (bar)

Temperaturbereich

-20°C bis +200°C

Dichtungsmaterial FKM (andere Werkstoffe auf Anfrage)

Dimensions

- dimensions are consistent with DIN 2353 and ISO 8434 fittings
- compatible with all threaded connectors according to DIN 3858 with 24° inner cones (bore form W DIN 3861)

Sealing and fastening principle

On the EXMAR tapered seal fittings, a rotatable nut is mounted on the connector. With the additional O-ring in the cone, a metal/elastomer seal is created that guarantees leak-tightness.

Benefits

- direction adjustable with the rotatable nut
- easy and fast assembly due to fixed tightening procedure with low torque
- highly resilient against pressure fluctuation and vibration in the system

Pressure range for

Tapered seal fittings

Serie	Tube	Pressure nom.
L: light	6 - 18 mm	PN 315 (bar)
	22 - 42 mm	PN 160 (bar)
S: heavy	6 - 14 mm	PN 630 (bar)
	16 - 30 mm	PN 400 (bar)
	38 mm	PN 315 (bar)

Temperature range

-20°C to +200°C

Sealing material: FKM (other materials on request)

Medidas

- medidas corresponden a los racores según DIN 2353 e ISO 8434
- aptos para todos los racores roscados según DIN 3858 con conos interiores de 24° (forma de taladro W DIN 3861)

Principio de obturación y fijación

En el racor de junta cónica EXMAR, la tuerca de unión está enroscada en el racor. La junta tórica adicional integrada en el cono forma un cierre hermético metálico/elastomérico que garantiza un alto grado de estanquidad.

Ventajas

- dirección ajustable mediante la tuerca de unión giratoria
- montaje fácil y rápido mediante carrera de apriete fijada con par bajo
- alta capacidad de carga para variaciones de presión y vibraciones en el sistema

Rangos de presión para

Racores cónicos

Serie	Tubo	Presión nom.
L: ligera	6 - 18 mm	PN 315 (bar)

Schmieren der EXMAR-Verschraubungen

- EXMAR Muttern werden initialgeschmiert ausgeliefert, ideal für eine problemlose Vormontage
- unser verwendetes Schmiermittel erfüllt die strengen Auflagen der ISO 14001:2004
- für die Endmontage verwenden Sie bitte unsere Fettpaste ASW wie in der Montageanleitung empfohlen
- wir empfehlen das Einfetten von Konus und Gewinde des Stützens, des Schneid-/NC-Klemmringes und des Gewindes der Überwurfmutter
- unsere innenversilberten NC-Muttern können ohne Schmierung montiert werden
- Videos zu den Montageanleitungen finden Sie auf www.exmar.de

Lubrication of EXMAR fittings

- EXMAR nuts are delivered with initial lubrication, ideal for easy pre-assembly
- Our used lubricant meets the strict requirements of ISO 14001: 2004
- For final assembly please use our grease paste ASW as recommended in the assembly instructions
- We recommend greasing of 24° taper and thread of the connector, of the cutting / NC clamping ring and of the thread of the union nut
- Our internally silver-plated NC nuts can be installed without lubrication
- Assembly instruction videos on www.exmar.de

Lubricación del raccors EXMAR

- tuercas EXMAR se envían lubricación inicial, ideal para un premontaje fácil
- nuestro lubricante utilizado cumple con los estrictos requisitos de la norma ISO 14001: 2004
- para el montaje final por favor utilice nuestro ASW Grasa como se describe en las instrucciones de montaje recomendadas
- Se recomienda engrase de cono y la rosca del cuello, el anillo de apriete / NC de corte y de la rosca de la tuerca de unión
- nuestros plateadas interna tuercas NC se pueden montar sin lubricación
- encontrará los vídeos de las instrucciones de montaje en www.exmar.de

Baumaße sind Ungefährmaße bei angezogener Überwurfmutter.

Sizes are approximate dimensions at tightened nut.

Las medidas son aproximadas con la tuerca de unión apretada.

für D1 ≤ 18 mm L6 = 3 mm
 für D1 > 18 mm L6 = 4 mm

for D1 ≤ 18 mm L6 = 3 mm
 for D1 > 18 mm L6 = 4 mm

para D1 ≤ 18 mm L6 = 3 mm
 para D1 > 18 mm L6 = 4 mm

Achtung: Für Endmontage des vormontierten Schaftes Überwurfmutter mit 1/4 Umdrehung über den Punkt des deutlich fühlbaren Kraftanstiegs anziehen.

For final assembly of the pre-assembled standpipe, tighten the union nut by 1/4 turn beyond the point of the clearly perceptible increase in force.

Atención: Para el ensamblaje final del vástago premontado, apriete la tuerca de unión 1/4 de vuelta más allá del punto del aumento claramente perceptible de la resistencia.

Einstellbare Winkel-Einschraubverschraubungen

Für eine einstellbare Winkel-Einschraubverschraubung kombinieren wir die einstellbare Winkelverschraubung mit Schaft EWV-..L/S bzw. die einstellbare Winkelverschraubung mit Dichtkegel EWKO-..L/S mit einem geraden Einschraubstutzen.

EWV-..L/S + XGEV-..LR/SR = EWV-..LR/SR
EWKO-..L/S + XGEV-..LR/SR = EWKO-..LR/SR

Weitere Kombinationen sind möglich:

Adjustable male adaptor elbow fittings

For an adjustable male adaptor elbow fitting we combine the adjustable standpipe elbow fitting EWV-..L/S or the adjustable elbow fitting with taper EWKO-..L/S with a straight male adaptor union.

EWV-..L/S + XGEV-..LR/SR = EWV-..LR/SR
EWKO-..L/S + XGEV-..LR/SR = EWKO-..LR/SR

Other combinations are possible:

Racores para roscar angulares ajustables

Para obtener un racor para roscar angular ajustable combinamos el racor angular ajustable con vástago EWV-..L/S o el racor angular ajustable con junta cónica EWKO-..L/S con un racor para roscar recto.

EWV-..L/S + XGEV-..LR/SR = EWV-..LR/SR
EWKO-..L/S + XGEV-..LR/SR = EWKO-..LR/SR

Son posibles otras combinaciones:

Kombination mit

- XGEV-..LR/SR, XGEV-..LM/SM für zylindrische Einschraubgewinde (zöllig bzw. metrisch) mit Abdichtung durch Dichtkante Form B nach DIN 3852-2
- XGEV-..LR WD/SR WD, XGEV-..LM WD/SM WD für zylindrische Einschraubgewinde (zöllig bzw. metrisch) mit Abdichtung durch Profildichtring Form E nach DIN 3852-11
- XGEV-..LRK/SRK, XGEV-..LMK/SMK, XGEV-..LNPT/SNPT für konische Einschraubgewinde (zöllig bzw. metrisch) mit Abdichtung im Kegelfgewinde Form C nach DIN 3852-2
- XGR-..L/S für den Übergang auf andere Anschlussgrößen

Das EXMAR Team steht Ihnen für Ihre Fragen gern zur Verfügung.

Combination with

- XGEV-..LR/SR, XGEV-..LM/SM for parallel male adaptor threads (English or metric) with sealing through seal edge form B acc. to DIN 3852-2
- XGEV-..LR WD/SR WD, XGEV-..LM WD/SM WD for parallel male adaptor threads (English or metric) with sealing through profile seal ring form E acc. to DIN 3852-11
- XGEV-..LRK/SRK, XGEV-..LMK/SMK, XGEV-..LNPT/SNPT for tapered male adaptor threads (English or metric) with taper thread sealing form C acc. to DIN 3852-2
- XGR-..L/S for transitioning to other connection sizes

The EXMAR Team would be glad to assist you with your questions.

Combinación con

- XGEV-..LR/SR, XGEV-..LM/SM para rosca de conexión cilíndrica (inglesa o métrica) con cierre hermético mediante junta de obturación según DIN 3852-2
- XGEV-..LR WD/SR WD, XGEV-..LM WD/SM WD para rosca de conexión cilíndrica (inglesa o métrica) con cierre hermético mediante junta anular de perfil, forma E según DIN 3852-11
- XGEV-..LRK/SRK, XGEV-..LMK/SMK, XGEV-..LNPT/SNPT para rosca de conexión cónica (inglesa o métrica) con cierre hermético mediante rosca cónica, forma C según DIN 3852-2
- XGR-..L/S para la transición a otros tamaños de conexión

El equipo de EXMAR está a su disposición para responder a sus consultas.

Baumäße sind Ungefährmaße bei angezogener Überwurfmutter.

Sizes are approximate dimensions at tightened nut.

Las medidas son aproximadas con la tuerca de unión apretada.

Achtung: Für Endmontage des vormontierten Schaftes Überwurfmutter mit 1/4 Umdrehung über den Punkt des deutlich fühlbaren Kraftanstiegs anziehen.

Attention: For final assembly of the pre-assembled standpipe, tighten the union nut by 1/4 turn beyond the point of the clearly perceptible increase in force.

Atención: Para el ensamblaje final del vástago premontado, apriete la tuerca de unión 1/4 de vuelta más allá del punto del aumento claramente perceptible de la resistencia.

Einstellbare T-Einschraubverschraubung

Für eine einstellbare T-Einschraubverschraubung kombinieren wir die einstellbare T-Verschraubung mit Schaft ETV...L/S bzw. die einstellbare T-Verschraubung mit Dichtkegel ETKO...L/S mit einem geraden Einschraubstutzen.

ETKO...L/S + XGEV...LR/SR = ETKO...LR/SR
 ETV...L/S + XGEV...LR/SR = ETV...LR/SR

Weitere Kombinationen sind möglich:

Adjustable male adaptor T fittings

For an adjustable male adaptor T fitting we combine the adjustable standpipe T fitting ETV...L/S or the adjustable T fitting with taper ETKO...L/S with a straight male adaptor union.

ETKO...L/S + XGEV...LR/SR = ETKO...LR/SR
 ETV...L/S + XGEV...LR/SR = ETV...LR/SR

Other combinations are possible:

Racores para roscar T ajustables

Para obtener un racor para roscar T ajustable combinamos el racor T ajustable con vástago ETV...L/S o el racor T ajustable con junta cónica ETKO...L/S con un racor para roscar recto.

ETKO...L/S + XGEV...LR/SR = ETKO...LR/SR
 ETV...L/S + XGEV...LR/SR = ETV...LR/SR

Son posibles otras combinaciones:

Kombination mit

- XGEV...LR/SR, XGEV...LM/SM für zylindrische Einschraubgewinde (zöllig bzw. metrisch) mit Abdichtung durch Dichtkante Form B nach DIN 3852-2
- XGEV...LR WD/SR WD, XGEV...LM WD/SM WD für zylindrische Einschraubgewinde (zöllig bzw. metrisch) mit Abdichtung durch Profildichtring Form E nach DIN 3852-11
- XGEV...LRK/SRK, XGEV...LMK/SMK, XGEV...LNPT/SNPT für konische Einschraubgewinde (zöllig bzw. metrisch) mit Abdichtung im Kegengewinde Form C nach DIN 3852-2
- XGR...L/S für den Übergang auf andere Anschlussgrößen

Das EXMAR Team steht Ihnen für Ihre Fragen gern zur Verfügung.

Combination with

- XGEV...LR/SR, XGEV...LM/SM for parallel male adaptor threads (English or metric) with sealing through seal edge form B acc. to DIN 3852-2
- XGEV...LR WD/SR WD, XGEV...LM WD/SM WD for parallel male adaptor threads (English or metric) with sealing through profile seal ring form E acc. to DIN 3852-11
- XGEV...LRK/SRK, XGEV...LMK/SMK, XGEV...LNPT/SNPT for tapered male adaptor threads (English or metric) with taper thread sealing form C acc. to DIN 3852-2
- XGR...L/S for transitioning to other connection sizes

The EXMAR Team would be glad to assist you with your questions.

Combinación con

- XGEV...LR/SR, XGEV...LM/SM para rosca de conexión cilíndrica (inglesa o métrica) con cierre hermético mediante junta de obturación según DIN 3852-2
- XGEV...LR WD/SR WD, XGEV...LM WD/SM WD para rosca de conexión cilíndrica (inglesa o métrica) con cierre hermético mediante junta anular de perfil, forma E según DIN 3852-11
- XGEV...LRK/SRK, XGEV...LMK/SMK, XGEV...LNPT/SNPT para rosca de conexión cónica (inglesa o métrica) con cierre hermético mediante rosca cónica, forma C según DIN 3852-2
- XGR...L/S para la transición a otros tamaños de conexión

El equipo de EXMAR está a su disposición para responder a sus consultas.

Baumaße sind Ungefährmaße bei angezogener Überwurfmutter.

Sizes are approximate dimensions at tightened nut.

Las medidas son aproximadas con la tuerca de unión apretada.

Achtung: Für Endmontage des vormontierten Schaftes Überwurfmutter mit 1/4 Umdrehung über den Punkt des deutlich fühlbaren Kraftanstiegs anziehen.

Attention: For final assembly of the pre-assembled standpipe, tighten the union nut by 1/4 turn beyond the point of the clearly perceptible increase in force.

Atención: Para el ensamblaje final del vástago premontado, apriete la tuerca de unión 1/4 de vuelta más allá del punto del aumento claramente perceptible de la resistencia.

M1=rosca métrica conexión

Einstellbare L-Einschraubverschraubungen

Für eine einstellbare L-Einschraubverschraubung kombinieren wir die einstellbare L-Verschraubung mit Schaft ELV-..L/S bzw. die einstellbare L-Verschraubung mit Dichtkegel ELKO-..L/S mit einem geraden Einschraubstutzen.

ELKO-..L/S + XGEV-..LR/SR = ELKO-..LR/SR
 ELV-..L/S + XGEV-..LR/SR = ELV-..LR/SR

Weitere Kombinationen sind möglich:

Adjustable male adaptor L fittings

For an adjustable male adaptor L fitting we combine the adjustable standpipe L fitting ELV-..L/S resp. the adjustable L fitting with taper ELKO-..L/S with a straight male adaptor union.

ELKO-..L/S + XGEV-..LR/SR = ELKO-..LR/SR
 ELV-..L/S + XGEV-..LR/SR = ELV-..LR/SR

Other combinations are possible:

Racores para roscar L ajustables

Para obtener un racor para roscar L ajustable combinamos el racor L ajustable con vástago ELV-..L/S o el racor L ajustable con junta cónica ELKO-..L/S con un racor para roscar recto.

ELKO-..L/S + XGEV-..LR/SR = ELKO-..LR/SR
 ELV-..L/S + XGEV-..LR/SR = ELV-..LR/SR

Son posibles otras combinaciones:

Kombination mit

- XGEV-..LR/SR, XGEV-..LM/SM für zylindrische Einschraubgewinde (zöllig bzw. metrisch) mit Abdichtung durch Dichtkante Form B nach DIN 3852-2
- XGEV-..LR WD/SR WD, XGEV-..LM WD/SM WD für zylindrische Einschraubgewinde (zöllig bzw. metrisch) mit Abdichtung durch Profildichtring Form E nach DIN 3852-11
- XGEV-..LRK/SRK, XGEV-..LMK/SMK, XGEV-..LNPT/SNPT für konische Einschraubgewinde (zöllig bzw. metrisch) mit Abdichtung im Kegelfgewinde Form C nach DIN 3852-2
- XGR-..L/S für den Übergang auf andere Anschlussgrößen

Das EXMAR Team steht Ihnen für Ihre Fragen gern zur Verfügung.

Combination with

- XGEV-..LR/SR, XGEV-..LM/SM for parallel male adaptor threads (English or metric) with sealing through seal edge form B acc. to DIN 3852-2
- XGEV-..LR WD/SR WD, XGEV-..LM WD/SM WD for parallel male adaptor threads (English or metric) with sealing through profile seal ring form E acc. to DIN 3852-11
- XGEV-..LRK/SRK, XGEV-..LMK/SMK, XGEV-..LNPT/SNPT for tapered male adaptor threads (English or metric) with taper thread sealing form C acc. to DIN 3852-2
- XGR-..L/S for transitioning to other connection sizes

The EXMAR Team would be glad to assist you with your questions.

Combinación con

- XGEV-..LR/SR, XGEV-..LM/SM para rosca de conexión cilíndrica (inglesa o métrica) con cierre hermético mediante junta de obturación según DIN 3852-2
- XGEV-..LR WD/SR WD, XGEV-..LM WD/SM WD para rosca de conexión cilíndrica (inglesa o métrica) con cierre hermético mediante junta anular de perfil, forma E según DIN 3852-11
- XGEV-..LRK/SRK, XGEV-..LMK/SMK, XGEV-..LNPT/SNPT para rosca de conexión cónica (inglesa o métrica) con cierre hermético mediante rosca cónica, forma C según DIN 3852-2
- XGR-..L/S para la transición a otros tamaños de conexión

El equipo de EXMAR está a su disposición para responder a sus consultas.

Dichtungsmaterial: FKM (andere Werkstoffe auf Anfrage). Vor Montage Dichtkante und Einschraubgewinde der Hohlverschraubung schmieren. Optional auch in rein metallischer Ausführung ohne O-Ring erhältlich.

Sealing material: FKM (other materials on request). Lubricate sealing edge and male thread of hollow bolt before assembly. Optionally available as pure metallic version without O-ring.

Material de junta tórica: FKM (otros materiales bajo demanda). Lubrique el borde de obturación y la rosca del tornillo hueco antes del montaje. Opcionalmente disponible como versión metálica sin junta tórica.

Baumaße sind Ungefährmaße bei angezogener Überwurfmutter.

Dichtungsmaterial: FKM (andere Werkstoffe auf Anfrage)

Vor Montage Dichtkante und Einschraubgewinde der Hohlverschraubung schmieren. Optional auch in rein metallischer Ausführung ohne O-Ring erhältlich.

Sizes are approximate dimensions at tightened nut.

Sealing material: FKM (other materials on request)

Lubricate sealing edge and male thread of hollow bolt before assembly. Optionally available as pure metallic version without O-ring.

Las medidas son aproximadas con la tuerca de unión apretada.

Material de junta tórica: FKM (otros materiales bajo demanda)

Lubrique el borde de obturación y la rosca del tornillo hueco antes del montaje. Opcionalmente disponible como versión metálica sin junta tórica.

Baumaße sind Ungefährmaße bei angezogener Überwurfmutter.

Sizes are approximate dimensions at tightened nut.

Las medidas son aproximadas con la tuerca de unión apretada.

Achtung: Für Endmontage des vormontierten Schaftes Überwurfmutter mit 1/4 Umdrehung über den Punkt des deutlich fühlbaren Kraftanstiegs anziehen.

Attention: For final assembly of the pre-assembled standpipe, tighten the union nut by 1/4 turn beyond the point of the clearly perceptible increase in force.

Atención: Para el ensamblaje final del vástago premontado, apriete la tuerca de unión 1/4 de vuelta más allá del punto del aumento claramente perceptible de la resistencia.

Baumaße sind Ungefährmaße bei angezogener Überwurfmutter.

Achtung: Für Endmontage des vormontierten Schaftes Überwurfmutter mit 1/4 Umdrehung über den Punkt des deutlich fühlbaren Kraftanstiegs anziehen.

Sizes are approximate dimensions at tightened nut.

Attention: For final assembly of the pre-assembled standpipe, tighten the union nut by 1/4 turn beyond the point of the clearly perceptible increase in force.

Las medidas son aproximadas con la tuerca de unión apretada.

Atención: Para el ensamblaje final del vástago premontado, apriete la tuerca de unión 1/4 de vuelta más allá del punto del aumento claramente perceptible de la resistencia.

Achtung: Für Endmontage des vormontierten Schaftes Überwurfmutter mit 1/4 Umdrehung über den Punkt des deutlich fühlbaren Kraftanstiegs anziehen.

For final assembly of the pre-assembled standpipe, tighten the union nut by 1/4 turn beyond the point of the clearly perceptible increase in force.

Atención: Para el ensamblaje final del vástago premontado, apriete la tuerca de unión 1/4 de vuelta más allá del punto del aumento claramente perceptible de la resistencia.

Baumaße sind Ungefährmaße bei angezogener Überwurfmutter.

Sizes are approximate dimensions at tightened nut.

Las medidas son aproximadas con la tuerca de unión apretada.

Achtung: Für Endmontage des vormontierten Schaftes Überwurfmutter mit 1/4 Umdrehung über den Punkt des deutlich fühlbaren Kraftanstiegs anziehen.

Attention: For final assembly of the pre-assembled standpipe, tighten the union nut by 1/4 turn beyond the point of the clearly perceptible increase in force.

Atención: Para el ensamblaje final del vástago premontado, apriete la tuerca de unión 1/4 de vuelta más allá del punto del aumento claramente perceptible de la resistencia.

Baumaße sind Ungefährmaße bei angezogener Überwurfmutter.

Sizes are approximate dimensions at tightened nut.

Las medidas son aproximadas con la tuerca de unión apretada.

Nach dem Anschweißen die in der Montageanleitung angegebenen Stellen nochmals mit der ASW Fettpaste schmieren (Schneidring, Gewinde der Mutter).

After welding, coat the parts indicated in the assembly instructions with ASW grease (cutting ring, thread of nut).

Luego de soldar, aplique nuevamente la grasa ASW en las partes indicadas en las instrucciones de montaje (anillo cortante, roscas de tuercas).

Baumaße sind Ungefährmaße bei angezogener Überwurfmutter.

Nach dem Anschweißen die in der Montageanleitung angegebenen Stellen nochmals mit der ASW Fettpaste schmieren (Schneidring, Gewinde der Mutter).

O-Ringe aus FKM werden separat mitgeliefert, erst nach dem Schweißvorgang aufziehen.

Sizes are approximate dimensions at tightened nut.

After welding, coat the parts indicated in the assembly instructions with ASW grease (cutting ring, thread of nut).

FKM O-rings supplied separately, to be fitted after welding.

Las medidas son aproximadas con la tuerca de unión apretada.

Luego de soldar, aplique nuevamente la grasa ASW en las partes indicadas en las instrucciones de montaje (anillo cortante, roscas de tuercas).

Las juntas tóricas de FKM se suministran por separado; montarlas después de soldar.

Montage:

Hülse bis zum Rändelrand in das Rohr einstecken. Mit einem Hammer (Kunststoff oder Hartgummi) die Hülse ganz einschlagen. Hierbei wird der Rändelhals in die Innenwand des Rohres gepresst und sichert die Hülse gegen Verschieben oder Herausfallen.

Hinweise, für welche Rohre der Einsatz von Verstärkungshülsen empfohlen wird, finden Sie in Kapitel i unter "Empfehlungen für Edelstahlrohre".

Assembly:

Insert sleeve into tube up to the knurled edge. Use a hammer (plastic or hard rubber) to drive in the sleeve all the way. This will cause the knurled neck to be pressed into the inner wall of the tube and will secure the neck against being dislocated or falling out.

Information on which tube is recommended for use with reinforcing sleeves can be found in Section i under "Recommendations for stainless steel tubes".

Montaje:

Introducir el casquillo en el tubo hasta el borde moleteado. Golpear completamente el casquillo utilizando un martillo (de plástico o goma dura). De este modo se presionará el cuello moleteado en la pared interior del tubo y se asegurará el casquillo contra el movimiento o la caída.

Encontrará indicaciones sobre los tubos recomendados para el uso de casquillos reforzados en el Capítulo i, bajo "Recomendación para tubos en acero inoxidable".

Eigenschaften, Besonderheiten

- angelehnt an ISO 8434-1/DIN 2353
- Baureihen L und S
- korrosionsbeständig
- große Sortimentsvielfalt
- Überwurfmutter innen versilbert

Characteristics, specialities

- based on ISO 8434-1/DIN 2353
- series L and S
- corrosion resistant
- extensive product range
- nuts silver-plated inside

Características, particularidades

- similar a ISO 8434-1/DIN 2353
- series L y S
- resistencia a la corrosión
- amplio surtido
- tuercas de unión interior plateado

Funktionsprinzip

Die Abkürzung **NC** verweist auf die Eigenschaften der Verschraubung: **Non-Cutting**, **Non-Corrosive** = nicht schneidend, nicht rostend.

Operating principle

The abbreviation **NC** stands for the characteristics of the fittings: **Non-Cutting**, **Non-Corrosive**.

Principio de funcionamiento

La abreviatura **NC** se refiere a las características de la rosca: **Non-Cutting**, **Non-Corrosive** = no cortante, no oxidable.

Temperaturbereich

-196°C bis +400°C

Achtung: Ausnahmen bilden weichgedichtete (Zusatz "WD") oder Dichtkegel-Verschraubungen (Zusatz "KO"), die nur in einem Bereich von -20°C bis +200°C eingesetzt werden können.

Temperature range

-196°C to +400°C

Attention: Excepted are FKM-sealed fittings (suppl. "WD") and fittings with taper (suppl. "KO"), which can be used from -20°C up to +200°C.

Rango de temperatura

-196°C hasta +400°C

Atención: La excepción son los racores con juntas blandas (código "WD") o de junta cónica (código "KO"), aptos solo para temperaturas de -20°C hasta +200°C.

Helium-Leckrate

mind. 10⁻⁸ mbar • l/s bei fachgerechter Montage; siehe Kapitel i für Montageanleitung.

Leak rate with helium

10⁻⁸ mbar • l/s min. when professionally assembled; see chapter i for installation instructions.

Tasa de fuga de helio

mín. 10⁻⁸ mbar • l/s con montaje correcto; para las instrucciones de montaje, consulte el capítulo i.

Vakuum

bis 10⁻⁴ mbar, höhere Werte möglich

Vacuum

up to 10⁻⁴ mbar, higher values are possible

Vacío

hasta 10⁻⁴ mbar; posibilidad de valores superiores

Anzuschließende Rohre

Nahtlose, gezogene Präzisionsrohre aus Edelstahl (DIN EN 10216-5/EN ISO 1127, Toleranzkl. D4/T3) mit sauberer, glatter Oberfläche oder Kunststoffrohre. Außendurchmesser innerhalb ± 0,1 mm; Ausnahme: Kunststoffrohre. Siehe auch Kapitel Rohre und Schläuche. Weitere Materialien auf Anfrage.

Tubes to use

Seamless, cold-drawn, high precision stainless steel tubes (according to DIN EN 10216-5/EN ISO 1127 tolerance class D4/T3) with clean, smooth surface or plastic tubes. Outer diameter within ± 0,1 mm; exception: plastic tubes. See also chapter tubes and hoses. Other materials on request.

Tubos para conectar

Tubos de precisión estirados sin costuras, de acero inoxidable (DIN EN 10216-5/EN ISO 1127, clase de tolerancia D4/T3) con superficie lisa limpia o tubos de plástico. Diámetro exterior con tolerancia de ± 0,1 mm; excepción: tubos de plástico. Véase también el capítulo Tubos y mangueras. Otros materiales bajo demanda.

Werkzeugnis

Werden Bescheinigungen über Materialprüfungen nach DIN EN 10 204 gewünscht, so ist dies bei Bestellung anzugeben (Abnahmeprüfzeugnis 3.1 gegen Berechnung).

Material certificates

Any request for documents on material tests according to DIN EN 10 204 should be made when placing the order (charges apply to inspection certificates 3.1).

Certificado de material

Si se necesitan certificados de ensayos de material según DIN EN 10 204, deberá especificarse al realizar el pedido (se facturará a partir del certificado de recepción 3.1).

Bördel-Rohrverschraubungen

Flare tube fittings

Racores rebordeado

Eigenschaften, Besonderheiten

- Verschraubungsstutzen nach ISO 8434-1
- Zwischenring, Druckring und Mutter nach DIN 3949
- Baureihen L und S
- korrosionsbeständig

Characteristics, specialities

- fitting body according ISO 8434-1
- flare adaptor, sleeve and nut according DIN 3949
- series L and S
- corrosion resistant

Características, particularidades

- racor según ISO 8434-1
- anillo intermedio, anillo de presión y tuerca según DIN 3949
- series L y S
- resistencia a la corrosión

Funktionsprinzip

Operating principle

Principio de funcionamiento

Abdichtung I: Verschraubungsstutzen – Zwischenring
Sealing I: Connector – flare adaptor
Cierre hermético I: Cuerpo - anillo intermedio rebordeado

Abdichtung II: Druckring – Rohr
Sealing II: Flare sleeve – tube
Cierre hermético II: Anillo de presión rebordeado – tubo

Das zentrale Bauelement – der Zwischenring – bildet den Übergang vom 24°-Konus des Verschraubungsstutzens zum 37°-Bördelanschluss. O-Ringe garantieren jederzeit eine sichere Abdichtung zum Stutzenkonus sowie zum Bördelanschluss, auch bei Druckwechselbelastungen.

Beim Anzug der Überwurfmutter wird über den Druckring und die Rohrschulter der Zwischenring in den Verschraubungskonus gedrückt. Durch eine leichte Verformung ist der Zwischenring dauerhaft mit dem Verschraubungsstutzen verbunden. Wenn die Stirnfläche des Verschraubungsstutzens am Bund des Zwischenrings anliegt, ist kein weiterer Vorschub möglich. Ein schädliches Aufweiten des Verschraubungsstutzens wird vermieden.

Die untrennbare Verbindung von Zwischenring und Verschraubungsstutzen bedeutet für den Monteur eine entscheidende Arbeitshilfe bei der Wiederholmontage. Die Verschraubung lässt sich beliebig oft lösen und wieder montieren. Der Druckring bewirkt eine sichere und kerbfreie Rohreinspannung.

Hohe Feindichtigkeit

- Elastomere an beiden Dichtstellen
- verbesserter Formschluss zwischen Zwischenring und Verschraubungsstutzen
- reduzierte Flächenpressung zwischen Rohr und Druckring
- größere Bördeltulpe und adaptierter Druckring garantieren sichere Rohrhalterung und hohe Ausreißfestigkeit
- keine Gefahr des Ausreißens bei Unteranzug

The main component – flare adaptor – effects the transition from the 24° taper of the connector to the 37° flare connection. O-rings assure sealing at the connectors taper and the flare connection. Thus a high degree of sealing efficiency is ensured, even under alternating pressure load.

When the nut is tightened, the flare adaptor is pressed into the cone of the fitting by the flare sleeve and the shoulder of the tube. Due to a slight deformation, the flare adaptor is permanently attached to the fitting. When the face surface of the fitting makes contact with the collar of the flare adaptor, no further insertion is possible. This prevents damaging expansion of the fitting body.

After tightening, because of a light deformation, the flare adaptor is captivated in the connector – a great help to the operator during reassembly. The fitting can be dismantled and reassembled as often as necessary. The flare sleeve provides for safe and notch-free tube clamping and high fatigue strength under bending load.

High degree of fine sealing efficiency

- elastomer at both sealing points
- improved form-fit between the flare adaptor and connector
- reduced surface pressure between tube and flare sleeve
- larger flange and adapted flare sleeve guarantee safe tube connection and high tensile strength
- no risk of disconnection when tightened insufficiently

El anillo intermedio como elemento central del conjunto constituye la transición del cono de 24° del cuerpo a la conexión rebordeada de 37°. El cierre hermético entre el cono del cuerpo y la conexión rebordeada se realiza mediante juntas tóricas. De esta forma se garantiza también una estanquidad alta con cargas de presión alternativas.

Al apretar la tuerca de unión, el anillo intermedio es encajado en el cono del racor por empuje del anillo de presión y del reborde del tubo. Por efecto de una ligera deformación, el anillo intermedio queda unido de forma permanente al racor. Cuando la superficie frontal del racor se apoya contra el collar del anillo intermedio, se impide todo avance posterior. De este modo se evita un ensanche excesivo del racor, que puede ser perjudicial.

Después de apretarlo, el anillo intermedio queda firmemente unido al racor. Para el montador representa una ayuda importante en caso de tener que repetir el montaje. El racor puede desmontarse y montarse las veces que sea necesario. El anillo de presión favorece el encaje seguro, sin entalladuras, del tubo y garantiza una resistencia alta y prolongada a la flexión.

Estanquidad fina

- elastómero en ambos puntos de cierre
- unión positiva mejorada entre el anillo y el cuerpo
- reducción de la presión entre las superficies del tubo y el anillo de presión
- reborde más grande y anillo de presión adaptado garantizan un soporte seguro des tubos y una alta resistencia al arranque
- no hay peligro de arranque por falta de apriete

Rangos de presión para Racores rebordeado

Serie	Tubo	Presión nom.
L: ligera	6 - 10 mm	PN 500 (bar)
	12 - 18 mm	PN 400 (bar)
	22 - 42 mm	PN 250 (bar)
S: pesada	6 - 16 mm	PN 630 (bar)
	20 - 38 mm	PN 400 (bar)

Druckauswertungsgrad in % des PN

Pressure coefficient in % of PN

Grado de valoración de presión en % de la PN

Temperaturbereich

-20°C bis +200°C

Temperature range

-20°C to +200°C

Intervalo de temperatura

de -20°C a +200°C

Helium-Leckrate

mind. 10⁻⁶ mbar • l/s bei fachgerechter Montage; siehe Kapitel a für Montageanleitung.

Helium leak rate

10⁻⁶ mbar • l/s min. when professionally assembled; see chapter a for installation instructions.

Tasa de fuga de helio

mín. 10⁻⁶ mbar • l/s con montaje correcto; para las instrucciones de montaje, consulte el capítulo a.

Vakuum

bis 10⁻⁴ mbar, höhere Werte möglich

Vacuum

up to 10⁻⁴ mbar, higher values are possible

Vacío

hasta 10⁻⁴ mbar; posibilidad de valores superiores

Anzuschließende Rohre

Nahtlose, gezogene Präzisionsrohre aus Edelstahl (DIN EN 10216-5/EN ISO 1127, Toleranzkl. D4/T3) mit sauberer, glatter Oberfläche. Außendurchmesser innerhalb ± 0,1 mm. Weitere Materialien auf Anfrage.

Tubes to use

Seamless, cold-drawn, high precision stainless steel tubes (according to DIN EN 10216-5/EN ISO 1127 tolerance class D4/T3) with clean, smooth surface. Outer diameter within ± 0,1 mm. Other materials on request.

Tubos para conectar

Tubos de precisión estirados sin costuras, de acero inoxidable (DIN EN 10216-5/EN ISO 1127, clase de tolerancia D4/T4) con superficie lisa limpia. Diámetro exterior con tolerancia de ± 0,1 mm. Otros materiales bajo demanda.

Eigenschaften, Besonderheiten

- einfache Verbindungselemente mit Innen- und Außengewinden und Abschlusselementen
- zahlreiche Bauformen
- viele Kombinationsmöglichkeiten

Nenndruck PN

Siehe Produkttabellen (4-fache Sicherheit)

Werkstoff

Edelstahl 1.4571 (≈ AISI 316 Ti)

Gewinde

- G = Rohrgewinde BSP (zylindrisch) ISO 228
- R = Rohrgewinde (kegelig) EN 10226-1
- NPT = Rohrgewinde (kegelig) ANSI B 1.20.1

Characteristics, specialities

- simple connecting pieces with internal and external threads and end elements
- large number of design types
- many possible combinations

Pressure nominal PN

See product tables (safety factor 4)

Materials

Stainless steel 1.4571 (≈ AISI 316 Ti)

Threads

- G = BSP pipe thread (straight) ISO 228
- R = BSP pipe thread (tapered) EN 10226-1
- NPT = NPT pipe thread (tapered) ANSI B 1.20.1

Propiedades, particularidades

- elementos de unión sencillos con rosca interior exterior y elementos de remate
- numerosas formas constructivas
- numerosas posibilidades de combinación

Presión nominal PN

Véanse las tablas de productos (seguridad cuádruple)

Material

Acero inoxidable 1.4571 (≈ AISI 316 Ti)

Rosca

- G = Rosca de tubo BSP (cilíndrica) ISO 228
- R = Rosca de tubo (cónica) EN 10226-1
- NPT = Rosca de tubo (cónica) ANSI B 1.20.1

Gerade Adapter

mit 60° Konus, Abdichtung durch Dichtkante Form B nach DIN 3852-2

Straight adaptors

with 60° taper, sealing edge form B acc. DIN 3852-2

Adaptadores rectos

con cono de 60°, cierre hermético mediante borde de obturación forma B según DIN 3852-2

Technische Informationen

Technical Information

Información Técnica

1. Werden nur aus rost- und säurebeständigen Edelstählen gefertigt.
2. Dadurch größte Einsatzmöglichkeit in allen Industriezweigen.
3. Durch Vollstromquerschnitte keine Druckverluste.
4. Leichte Schaltbarkeit auch unter hohem Druck.
5. Durch auswechselbare Dichtungen lange Lebensdauer.
6. Einzelprüfungen vor Verlassen des Werkes.

1. Made only from rust proof and acid resistant stainless steel.
2. For a wide range of applications in all industries.
3. No pressure drop due to full flow bore.
4. Easy operation, even under high pressure.
5. Long life due to replaceable seals.
6. Individual tests before leaving the works.

1. Fabricación exclusiva con aceros inoxidable-resistentes a la corrosión y a los ácidos.
2. En consecuencia, pueden usarse en todos los ramos industriales.
3. Las secciones transversales de caudal máximo evitan pérdidas de presión.
4. Manejo fácil también con presiones altas.
5. Larga vida útil gracias a juntas recambiables.
6. Controles individuales antes de salir de fábrica.

Zur Auswahl der richtigen Armatur werden folgende Mindestangaben benötigt:

- Betriebsdruck
- Betriebstemperatur
- Medium

Konstruktionsaufbau

Alle Körper der EXMAR Kugelhähne werden aus hochwertigem Edelstahl gefertigt. Die Kugel als drehbares Absperrelement ist "schwimmend" gelagert mit Vorspannung zwischen Dichtschalen aus POM oder aus anderen Werkstoffen.

Das Medium drückt in Fließrichtung bei geschlossener Stellung gegen die Kugel und presst diese gegen die druckabgewandte Dichtschale. Die Dauerdichtheit wird dadurch unterstützt.

Lagerung und Einbau

Die Kugelhähne sollen in Offenstellung mit Schutzkappen gelagert werden. Sie sollen auch in Offenstellung eingebaut werden und vor Betätigungen müssen die Leitungen durchgespült werden, damit Rückstände in den Leitungen die Dichtschalen nicht beschädigen.

Die Kugelhähne öffnen und schließen durch Drehung des Schaltgriffes um jeweils 90°. Zwischenstellungen bewirken eine nicht gewünschte Drosselung des Durchflusses. Der Kugelhahn soll daher stets geschlossen oder bis zum Anschlag geöffnet sein.

Werkzeugnisse

Auf Wunsch werden Werksbescheinigungen oder Werkzeugnisse nach DIN EN 10204 erstellt.

Allgemeine Hinweise

Die angegebenen Nenndrücke gelten für eine max. Betriebstemperatur bis zu +100°C für normale Bedingungen bei statischer Druckbelastung.

For orders or inquiries the following information is required:

- working pressure
- working temperature
- medium

Design Principle

All EXMAR ball valves are made of high quality stainless steel. The ball, as a rotatable close-off unit, is pretensioned and "floats" in a shell seal made from POM or other suitable material.

In the closed position the medium pressure acts against the ball in the flow direction, and presses it against the pressure free side of the shell seal. The continuous leak-free function is thereby enhanced.

Storage and Installation

The ball valves should be stored in the open position with dust caps fitted. They should also be installed in the open position, and, in order to prevent damage to the shell seals by residue in the piping system, the system should be flushed before operating the valves.

The ball valves open and close by turning the valve key through 90°. An inbetween position results in an undesirable flow restriction. A ball valve should therefore be either fully closed or opened to the stop.

Certification

On request a works certificate or release note can be issued according to DIN EN 10204.

General Information

The given nominal pressures are for normal conditions under static loading at operating temperatures of up to +100°C max.

Para elegir la válvula adecuada se requieren como mínimo los siguientes datos:

- presión de servicio
- temperatura de servicio
- medio

Diseño constructivo

Todos los cuerpos de las llaves esféricas EXMAR están fabricados de alta calidad en acero inoxidable. La bola como elemento de cierre giratorio tiene apoyo "flotante" pretensado entre los asientos de POM u otros materiales.

El medio presiona contra la bola cerrada en la dirección de flujo y la empuja contra el asiento alejado de la presión. De esta forma se prolonga la estanquidad.

Almacenaje y montaje

Las llaves esféricas deben almacenarse en posición abierta, protegidas con caperuzas. Han de montarse asimismo en posición abierta y, antes de accionarlas, hay que limpiar las tuberías para que los restos que pueda haber en las mismas no dañen los asientos.

Las llaves esféricas se abren y cierran girando la palanca 90°, respectivamente. En posiciones intermedias se provoca una reducción no deseable del flujo. Por esta razón, la llave esférica ha de estar siempre completamente cerrada o abierta.

Certificados de material

Bajo demanda se entregarán certificados de fábrica o de material según DIN EN 10204.

Advertencias generales

Las presiones nominales señaladas valen solamente para una temperatura de servicio máxima de hasta +100°C en condiciones de uso normales con carga de presión estática.

Achtung!

Bei Bestellungen von Hochdruck-Kugelhähnen mit Sonderdichtschalen aus Werkstoff PEEK ist zur Typenbezeichnung der Zusatz "PEEK" erforderlich.

Hochdruck-Kugelhähne sind auf Anfrage mit pneumatischem (einfach oder doppelt wirkend) oder elektrischem Antrieb erhältlich. Fragen Sie nach unserer Checkliste.

Anmerkung:

Der maximal mögliche Betriebsdruck PN kann auf Grund der Anschlüsse unter dem als maximal angegebenen Nenndruck PN liegen. Sicherheitsfaktor: 1.5-fach

Attention!

For orders of high pressure ball valves with special sealing bushes in material PEEK, it is necessary to add "PEEK" to the type of the standard valves.

High pressure ball valves are available on request with pneumatic (single or double acting) or electric actuator. Ask for our checklist.

Remark:

Due to the connectors, the maximum possible working pressure PN can be lower than the maximum nominal pressure PN specified.. Safety factor: 1.5 times

Atención!

Para pedidos de llaves esféricas de alta presión con asientos especiales de PEEK debe añadirse el código "PEEK".

Las válvulas de bola de alta presión están disponibles bajo pedido con actuador neumático (simple o doble efecto) o eléctrico. Solicite nuestra lista de control.

Nota:

Por cuestiones relacionadas con las conexiones, la presión de servicio máxima PN puede ser menor que la presión nominal PN señalada. Factor de seguridad: 1.5 veces

Hinweis: Das Austauschen des Dichtungssatzes darf nur von geeignetem Fachpersonal durchgeführt werden, da fehlerhafte Montage ein Gefahrenpotential in sich birgt. Auf Wunsch sind Dichtungssätze PEEK lieferbar.

Notice: Only qualified technicians may replace the sealing set as improper assembly poses a potential risk. PEEK seal kits are available on request.

Advertencia: La sustitución del conjunto de juntas debe ser realizada exclusivamente por personal técnico adecuado, ya que un montaje incorrecto podría conllevar peligros. Conjuntos de juntas PEEK están disponibles bajo demanda.

**Automatische Antriebe
Automatic Actuators
Accionamientos Automáticos**

Für unsere Hochdruck-Kugelhähne sind zwei Arten von automatischen Antrieben erhältlich: elektrischer oder pneumatischer Antrieb.

Two types of automatic actuators are available for our high pressure ball valves: electric or pneumatic actuator.

Hay dos tipos de accionamientos automáticos para nuestras llaves esféricas de alta presión: el accionamiento eléctrico o el neumático.

Basierend auf Ihren Anforderungen arbeiten wir gerne ein passendes Angebot aus. Bitte kontaktieren Sie unseren Verkauf.

Based on your requirements we will be pleased to work out a customized offer. Please contact our sales department.

En base a sus requerimientos estaremos encantados de elaborar una oferta personalizada. Por favor, contacte con nuestro departamento de ventas.

Einbaufertige Rohrleitungen

Jährlich konfektionieren wir über 150'000 m Metallrohre. Den Großteil davon biegen und verpressen wir mit Verschraubungen und Ventilen für kundenspezifische Lösungen. Unsere einbaufertigen Rohre finden in vielen Branchen Anwendung, sie sind in Kaffeemaschinen genauso verbaut wie in Schienenfahrzeugen.

Konfektioniert mit EXMAR Schneidring-Komponenten

Wir konfektionieren für Sie unsere Rohre mit Schneidring-Verschraubungen, -Ventilen, -Kugelhähnen und anderen Teilen aus dem EXMAR-Sortiment. Durch den großen Lagerbestand in Frauenfeld profitieren Sie von kurzen Reaktionszeiten und einem schnellen, flexiblen Service.

Konfektioniert mit EXMAR NC Klemmring-Komponenten

Besonders für Anwendungen mit erhöhter korrosiver Beanspruchung empfehlen wir den Einsatz unserer Klemmringanschlüsse. Ihnen steht ein ebenso großes Sortiment in den Anschlussgrößen 6 bis 25 mm zur Verfügung.

Konfektioniert mit Sonderteilen

Immer gefragter sind orbitalgeschweisste oder vakuumgelötete Komponenten. Dank unserer langjährigen Erfahrungen und professionellen Partnern können wir Ihnen auch hier eine passende Lösung bieten. Natürlich verpressen wir auf Kundenwunsch auch Komponenten von SERTO oder von Mitbewerbern. Ganz gleich, ob diese vom Kunden mitgeliefert werden oder wir sie nach seinen Angaben selber beschaffen.

Beispiele

Ready-to-fit pipelines

We assemble over 150,000 metres of metal pipes per year. We bend and press most of these with unions, valves and couplings for customer-specific solutions. Our ready-to-fit pipes are applied in many sectors, installed in everything from coffee machines to rail vehicles.

Pre-assembled with EXMAR cutting ring components

We assemble our pipes for you with cutting ring unions, valves, ball valves and other parts from the EXMAR range. Due to the large amount of warehouse stock in Frauenfeld, you can benefit from short reaction times and fast and flexible service.

Pre-assembled with EXMAR NC clamping ring components

Especially for applications with increased corrosive stress we recommend the use of our clamping ring connections. You can choose from an equally large range of connection sizes from 6 to 25 mm.

Pre-assembled with special parts

Orbital-welded or vacuum-welded components are increasingly in demand. We can also offer you a suitable solution for this requirement thanks to our many years of experience and professional partners. Of course, we also press components from competitors if a customer requests this. This applies whether these are supplied by the customer or if we purchase them ourselves in accordance with the customer requirements.

Examples

Tuberías listas para ser instaladas

Ensamblamos más de 150.000 metros de tubos de metal por año. Doblamos y prensamos la mayoría de ellos con uniones, válvulas y acoplamientos para soluciones específicas del cliente. Nuestros tubos listos para montar se aplican en muchos sectores, instalados en todo, desde máquinas de café hasta vehículos ferroviarios.

Premontados con componentes de anillo cortante EXMAR

Ensamblamos nuestros tubos con uniones de anillo cortante, válvulas, válvulas de bola y otros productos de la gama EXMAR. Debido a la gran cantidad de existencias en el almacén de Frauenfeld, puede beneficiarse de tiempos de reacción cortos y un servicio ágil y rápido.

Premontado con componentes de anillos de apriete EXMAR NC

Especialmente para aplicaciones con un mayor estrés corrosivo recomendamos el uso de nuestras conexiones de anillo de apriete. Puede elegir entre una gama igualmente amplia de tamaños de conexión de 6 a 25 mm.

Premontado con piezas especiales

Los componentes con soldadura orbital o de vacío tienen cada vez más demanda. Gracias a nuestros muchos años de experiencia y a nuestros socios profesionales, también podemos ofrecerle una solución adecuada para esta necesidad. Por supuesto, también prensamos componentes de la competencia si un cliente lo solicita. Esto se aplica tanto si son suministrados por el cliente como si los compramos nosotros mismos de acuerdo con los requisitos del cliente.

Konstruktionsaufbau

Alle EXMAR Ventilgehäuse sind aus Edelstahl Werkstoff 1.4571/AISI 316 Ti geschmiedet. Eine anschließende Wärmebehandlung garantiert ein optimales Materialgefüge.

Diese Ventile haben ein innenliegendes Spindelgewinde. Die großzügig dimensionierte Spindel ist feinstbearbeitet und garantiert somit eine leichte Betätigung bei geringstem Verschleiß der Stopfbuchsenpackung.

Durch die 2-teilige Spindel wird eine sichere Abdichtung bei dünnflüssigen Medien gewährleistet.

Bei allen Ausführungen ist der Kegel in die Spindel "ingerollt", so dass der Kegel drehbar, aber selbstzentrierend und unlösbar ist.

Prüfungen

EXMAR Ventile werden auf Gehäusefestigkeit und Dichtheit geprüft. Hierbei gelten die Anforderungen nach DIN EN 12266-1.

Zeugnisse

Auf Wunsch werden Werksbescheinigungen oder Werkzeugeugnisse nach DIN EN 10204 erstellt.

Druck-Temperatur-Diagramm

Hochdruck-Absperrventil Typ AVD
PTFE

Design

All EXMAR valve bodies are forged from stainless steel material 1.4571/AISI 316 Ti. A final heat treatment guarantees optimum material structure.

These valves are built with an internal thread stem. The generously dimensioned stem is micro-machined and this guarantees smooth operation with very low wear of the gland packing.

The 2-parts stem ensures a secure sealing with highly fluid media.

In all versions the taper is "rolled into" the spindle so that the taper is rotatable but self-centering and non-detachable.

Tests

EXMAR valves are tested for the using stability and tightness. The requirements are specified in DIN EN 12266-1.

Certificates

Certificates of conformity or certificates of compliance in accordance with DIN EN 10204 will be provided upon request.

Pressure-Temperature-Diagram

High pressure needle valve Type AVD
PTFE

Diseño constructivo

Todos los cuerpos de válvulas EXMAR están forjados de acero inoxidable 1.4571/AIS 316 Ti. El tratamiento térmico siguiente garantiza una estructura óptima del material.

Las válvulas tienen una rosca de husillo interior. El husillo sobredimensionado está superacabado y garantiza facilidad de accionamiento con mínimo desgaste de la empaquetadura para prensaestopas.

El husillo de dos piezas garantiza una hermetización segura para medios líquidos.

En todas las versiones, el cono está "enrollado" dentro del husillo: aunque puede girar, es autocentrante y no extraíble.

Verificaciones

Las válvulas EXMAR son comprobadas en relación con la resistencia del cuerpo y la estanquidad. Se aplican los requisitos según DIN EN 12266-1.

Certificados

Bajo demanda se entregarán certificados de fábrica o de material según DIN EN 10204.

Anmerkung:

Der maximal mögliche Betriebsdruck PN kann auf Grund der Anschlüsse unter dem als maximal angegebenen Nenndruck PN liegen. Sicherheitsfaktor: 1.5-fach

Remark:

Due to the connectors, the maximum possible working pressure PN can be lower than the maximum nominal pressure PN specified. Safety factor: 1.5 times

Nota:

Por cuestiones relacionadas con las conexiones, la presión de servicio máxima PN puede ser menor que la presión nominal PN señalada. Factor de seguridad: 1.5 veces

Konstruktionsaufbau

Alle EXMAR-Ventilgehäuse sind aus Edelstahl Werkstoff 1.4571 / AISI 316 Ti geschmiedet. Eine anschließende Wärmebehandlung garantiert ein optimales Materialgefüge.

Diese Ventile haben ein innenliegendes Spindelgewinde. Die großzügig dimensionierte Spindel ist feinstbearbeitet und garantiert somit eine leichte Betätigung bei geringstem Verschleiß der Stopfbuchsenpackung.

Durch die 2-teilige Spindel wird eine sichere Abdichtung bei dünnflüssigen Medien gewährleistet.

Bei allen Ausführungen ist der Kegel in die Spindel "ingerollt", so dass der Kegel drehbar, aber selbstzentrierend und unlösbar ist.

Prüfungen

EXMAR-Ventile werden auf Gehäusefestigkeit und Dichtheit geprüft. Hierbei gelten die Anforderungen nach DIN EN 12266-1.

Zeugnisse

Auf Wunsch werden Werksbescheinigungen oder Werkszeugnisse nach DIN EN 10204 erstellt.

Druck-Temperatur-Diagramm

Hochdruck-Absperrventil Typ AVI PTFE

Design

All EXMAR valve bodies are forged from stainless steel material 1.4571 / AISI 316 Ti. A final heat treatment guarantees optimum material structure.

These valves are built with an internal thread stem. The generously dimensioned stem is micro-machined and this guarantees smooth operation with very low wear of the gland packing.

The 2-parts stem ensures a secure sealing with highly fluid media.

In all versions the taper is "rolled into" the spindle so that the taper is rotatable but self-centering and non-detachable.

Tests

EXMAR valves are tested for the using stability and tightness. The requirements are specified in DIN EN 12266-1.

Certificates

Certificates of conformity or certificates of compliance in accordance with DIN EN 10204 will be provided upon request.

Pressure-Temperature-Diagram

High pressure needle valve Type AVI PTFE

Diseño constructivo

Todos los cuerpos de válvulas EXMAR están forjados de acero inoxidable 1.4571 / AISI 316 Ti. El tratamiento térmico siguiente garantiza una estructura óptima del material.

Las válvulas tienen una rosca de husillo interior. El husillo sobredimensionado está superacabado y garantiza facilidad de accionamiento con mínimo desgaste de la empaquetadura para prensaestopas.

El husillo de dos piezas garantiza una hermetización segura para medios líquidos.

En todas las versiones, el cono está "enrollado" dentro del husillo: aunque puede girar, es autocentrante y no extraíble.

Verificaciones

Las válvulas EXMAR son comprobadas en relación con la resistencia del cuerpo y la estanquidad. Se aplican los requisitos según DIN EN 12266-1.

Certificados

Bajo demanda se entregarán certificados de fábrica o de material según DIN EN 10204.

Diagrama de presión y temperatura

Válvula de cierre de alta presión Tipo AVI PTFE

Anmerkung:

Der maximal mögliche Betriebsdruck PN kann auf Grund der Anschlüsse unter dem als maximal angegebenen Nenndruck PN liegen. Sicherheitsfaktor: 1.5-fach

Remark:

Due to the connectors, the maximum possible working pressure PN can be lower than the maximum nominal pressure PN specified. Safety factor: 1.5 times

Nota:

Por cuestiones relacionadas con las conexiones, la presión de servicio máxima PN puede ser menor que la presión nominal PN señalada. Factor de seguridad: 1.5 veces

Die Press- und Nippel­einfallmaße sind Richtwerte und abhängig von Schlauchtyp, Toleranzen und Hersteller. Die Werte unterliegen nicht dem Änderungsdienst. Das ordnungsgemäße Verpressen der Armatur ist vom Schlauchkonfektionär mit entsprechenden Mitteln zu prüfen.

Both crimp and nipple deformation dimensions are guide values and depend on hose type, tolerance and manufacturer. These values are not considered for our modification information service. The correct mounting of the hose couplings is to be checked with appropriate means by who crimps them.

Los valores de prensado y compresión de las boquillas son indicativos y dependen del tipo de manguera, su tolerancia y el fabricante. Estos valores no se toman en cuenta para el servicio de información de modificaciones. Quien confecciona las mangueras debe verificar la calidad de prensado de las boquillas con herramientas apropiadas.

Passend für 24° Innenkonus

Dichtungsmaterial: FKM (andere Werkstoffe auf Anfrage)

For 24° conus connections

Sealing material: FKM (other materials on request)

Apto para cono interior de 24°

Material de junta tórica: FKM (otros materiales bajo demanda)

- Schlauch-Überwurfmutter (SÜM) mit der Schulter voran auf den Schlauch schieben
- Schlauch-Adapter (ESA) in den Schlauch drücken
- Mutter auf ein Verschraubungsgrundteil aufschrauben

Der Kunststoffschlauch wird zwischen Schulter der Mutter und Kegel des Adapters sicher geklemmt, die Verbindung dichtet mittels O-Ring.

- push the hose nut (SÜM) with the shoulder at the front onto the hose
- press the hose adapter (ESA) into the hose
- screw the nut onto the base part of the fitting

The plastic tube is securely clamped between the shoulder of the nut and the cone of the adaptor, the connection is sealed by the O-ring.

- empuja la tuerca de unión para tubos flexibles (SÜM) con el hombro en la parte delantera sobre la manguera
- presiona el adaptador para tubos flexibles (ESA) en la manguera
- enroscar la tuerca en la parte de la base del racor

El tubo de plástico se sujeta firmemente entre el hombro de la tuerca y el cono del adaptador, la conexión se sella con la junta tórica.

Hydraulikschläuche

Hydraulic hoses

Mangueras hidráulicas

Hydraulikschläuche zeichnen sich durch Robustheit, Flexibilität sowie Korrosions- und Druckbeständigkeit aus. Lieferbar sind verschiedene Schläuchtypen mit Armaturen aus Edelstahl 1.4571 in unterschiedlichen Längen nach Kundenspezifikation.

Hydraulic hoses offer robustness, flexibility, corrosion and pressure resistance. Various hose types with fittings made of stainless steel 1.4571 are available in different lengths according to customer specifications.

Las mangueras hidráulicas se caracterizan por su robustez, su flexibilidad y su resistencia a la presión y a la corrosión. Suministramos distintos tipos de mangueras con conectores de acero inoxidable 1.4571 y diferentes longitudes adaptadas a las especificaciones del cliente.

Messbeispiele für die Nennlänge (NL) der konfektionierten Hydraulikschläuche:

Hydraulikschläuche

Hydraulic hoses

Mangueras hidráulicas

Verdrehwinkel bei gebogenen Armaturen

Werden an beiden Schlauchenden gebogene Armaturen eingesetzt, kann der Verdrehwinkel gewählt werden. Dieser wird, ausgehend vom 1. Anschluss, in Schritten von 45° im Gegenuhrzeigersinn definiert. Andere Verdrehwinkel auf Anfrage. Toleranz 3°.

Rotation angle for angled fittings

If angled fittings are used on both sides, the rotation angle can be selected. This is defined, starting from the 1. fitting, in steps of 45° counterclockwise. Tolerance 3°

Ángulo de giro en conectores acodados

Si en ambos extremos de la manguera se utilizan conectores acodados, el ángulo de giro podrá elegirse. Este se determina a intervalos de 45° en sentido antihorario, partiendo de la primera conexión. Existen otros ángulos de giro disponibles previa solicitud (tolerancia = 3°).

Hinweise zur Verlegung von Schlauchleitungen

Information on installing hose lines

Información de la instalación de mangueras

1. Keine Zugspannung

Schlauch leicht durchhängen lassen. Unter Belastung kann sich die Länge einer Schlauchleitung ändern. Eine Verkürzung bedeutet eine zusätzliche Zugspannung. Beachten Sie auch die für Hubbewegungen benötigte Schlauchlänge.

1. No tensile stress

Give the hose slightly additional slack. The length of a hose line can change under load. A shortening means additional tensile stress. Please also note the hose length required for lifting movements.

1. Evitar el esfuerzo de tracción

Deje que la manguera cuelgue ligeramente. La longitud de un conducto de manguera puede cambiar bajo presión. Un acortamiento de esta indica la existencia de un esfuerzo de tracción adicional. Tenga en cuenta además la longitud de manguera necesaria para los movimientos de elevación.

2. Keine Torsion

Schlauchleitung beim Einbau nicht verdrehen (keine Torsion).

2. No torsion

Do not distort the hose line during installation (no torsion).

2. Evitar la torsión

No distorsione la línea de la manguera durante la instalación (sin torsión).

3. Keine Knicke

Bei gekrümmtem Einbau ist auf den zulässigen Biegeradius zu achten. Scharfe Knicke sind zu vermeiden. Beachten Sie bei der Bemessung der freien Schlauchlänge zwischen den Armaturen die Länge der Anschlussarmaturen.

3. No kinks

For curved installation, the permissible bending radius must be observed. Sharp kinks are to be avoided. When dimensioning the free hose length between the fittings, observe the length of the hose couplings.

3. Evitar dobleces

En caso de realizar un montaje curvilíneo, tenga en cuenta el radio de flexión autorizado. Deben evitarse las dobleces pronunciadas. Al calcular la longitud de manguera libre entre los conectores, tenga en cuenta la longitud de los racores de conexión.

Hinweise zur Verlegung von Schlauchleitungen

Information on installing hose lines

Información de la instalación de mangueras

4. Richtige Armaturenwahl

Benutzen Sie gebogene Schlaucharmaturen. Ihr Radius ermöglicht auch bei beengten Einbauverhältnissen eine richtige Verlegung der Schlauchleitung. Gebogene Schlaucharmaturen sind auch dort angebracht, wo die Anordnung der Anschlüsse einen "hängenden" Bogen nicht zulässt und bei "stehenden" Bogen stets eine Knickgefahr hinter der Schlauchfassung besteht.

4. Correct choice of fittings

Use bent hose couplings. Their radius enables the hose line to be installed correctly even in tight spaces. Bent hose couplings are also used where the arrangement of the connections does not allow a "hanging" bend and where there is always a danger of kinking behind the hose fitting when the bend is "standing".

4. Elección correcta de los conectores

Utilice conectores de manguera acodados. El radio de estos permite tender correctamente el conducto de manguera aun en espacios reducidos. Los conectores de manguera acodados también son apropiados allí donde la disposición de las conexiones no admite la existencia de un arco "colgante" y el empleo de un arco "recto" provoca un riesgo de flexión constante tras el soporte de la manguera.

5. Sonstige Hinweise

Überwurfmuttern nur soweit anziehen, bis der Anschluss dicht ist. Weiteres Anziehen verbessert die Dichtheit nicht, sondern beschädigt den Anschluss.

Informieren Sie sich über Schutzschläuche. Sie bieten Hydraulikschläuchen zusätzlichen Schutz gegen Beschädigung (Feuer, mechanische Einwirkungen) oder kennzeichnen die Medien.

5. Additional information

Nuts should only be tightened up to the point of leak-tightness. Further tightening will not improve the leak-tightness of the connection, but will damage it.

Inform yourself about protective hoses. They offer the hydraulic hoses additional protection against damage (fire, mechanical effects) or mark the media.

5. Otras indicaciones

Apriete las tuercas de racor solo hasta que la conexión sea hermética. Apretarlas más no mejoraría la hermeticidad; antes bien, el hacerlo dañaría la conexión.

Infórmese sobre los tubos flexibles de aislamiento. Estos dotan a las mangueras hidráulicas de una protección adicional contra daños (fuego, acciones mecánicas) o identifican los fluidos utilizados.

Technische Information
Rohre und Schläuche

Technical information
Tubes and hoses

Información técnica
Tubos y mangueras

Eigenschaften, Besonderheiten

- speziell auf EXMAR-Verbindungen abgestimmt
- reichhaltiges Zubehör
- Rohre und Schläuche für spezielle Anwendungen
- verschiedene Materialien

Kunststoffrohre

Speziell für Niederdruck- und Niedertemperaturbereich geeignet.

Ablängen

Kombizangen, Scheren usw. können Rohrenden quetschen, was später oft zu Rissbildungen führt. Mit dem "Schlauch-Cutty" lassen sich Kunststoffrohre einwandfrei zuschneiden.

Wärmedehnung

Bei Montage zu beachten:
Große Wärmeausdehnung bzw. Kontraktion bei Kälte führen zu Längenänderungen.

Licht- und Temperaturbeständigkeit

Kunststoffrohre sollten nicht direkter Sonnenbestrahlung ausgesetzt werden und nicht in Berührung mit heißen Teilen kommen bzw. nicht im Bereich von Wärmestauungen installiert werden. Ggf. schwarze Rohre verwenden. Sie sind lichtbeständig und gegen Wärmealterung unempfindlich.

Characteristics, specialities

- fits the special requirements of the EXMAR unions
- wide range of accessories
- tubes and hoses for special applications
- different materials available

Plastic tubing

Especially suitable for low pressure and low temperature ranges.

Cutting to length

Combination shears, scissors etc. can crush the tube ends and are often the cause for later splitting. The "Hose Cutty" is the ideal tool for the clean cutting.

Thermal expansion

Plastic tubing has a high thermal expansion or contraction. Proper installation entails the consideration of the temperature-dependent dimensional changes.

Light and temperature stabilized

Plastics should not be exposed to direct sunlight, should not come into contact with hot components nor installed in hot areas. Black plastic tubing should be used preferably (light and temperature stabilized).

Propiedades, particularidades

- adaptado especialmente a las uniones EXMAR
- numerosos accesorios
- tubos y mangueras para aplicaciones especiales
- diferentes materiales

Tubos de plástico

Especialmente adecuados para aplicaciones de baja presión y baja temperatura.

Corte a medida

Los alicates universales, las cizallas, etc. pueden aplastar los extremos de los tubos y favorecer la aparición de grietas más adelante. El cortador de mangueras "Cutty" permite cortar a medida tubos de plástico.

Dilatación térmica

Para tener en cuenta en el montaje:
Valores altos de dilatación térmica o contracción por frío provocan variaciones de longitud.

Resistencia a la luz y la temperatura

Los tubos de plástico no deben estar expuestos a radiación solar directa, entrar en contacto con piezas muy calientes o instalarse cerca de zonas en las que se acumule el calor. En su caso, utilizar tubos negros: son resistentes a la luz y al envejecimiento por calor.

Spezifikationen:

Werkstoff: Polyamid PA 12/PA10.12 weich
 Temperaturbereich: -40°C bis +100°C (kurzfristig: +125°C)
 Brandverhalten: gem. UL 94 HB
 Härte: Shore D65
 Berstdruck: 3-facher Betriebsdruck
 (1) Farben: W = weiß, S = schwarz, B = blau, R = rot, Y = gelb, G = grün
 Alle technischen Daten basieren auf den Herstellerangaben.

Specifications:

Material: Polyamide PA 12/PA10.12 soft
 Temperature range: -40°C to +100°C (short-term: +125°C)
 Flammability: acc. to UL 94 HB
 Hardness: Shore D65
 Burst pressure: 3 x working pressure
 (1) Colors: W = white, S = black, B = blue, R = red, Y = yellow, G = green
 All technical data are based on manufacturer's specifications.

Especificaciones:

Material: poliamida PA 12/PA10.12 blando
 Intervalo de temperatura: -40°C a +100°C (brevemente: +125°C)
 Inflamabilidad: según UL 94 HB
 Dureza: Shore D65
 Presión de rotura: 3 x presión de servicio
 (1) Colores: W = blanco, S = negro, B = azul, R = rojo, Y = amarillo, G = verde
 Todos los datos técnicos se basan en las indicaciones del fabricante.

Merkmale:

- breiter Temperatur- und Einsatzbereich
- Farbe schwarz, UV-beständig
- silikonfrei, halogenfrei
- druckbeständig, schlag- und kerbschlagzäh
- glatte und undurchlässige Oberfläche
- Beständigkeitsliste siehe Anhang
- Anwendungen: Druckluft, Hydraulik, Unterdruck, Kühlleitungen, Kraftstoff- und Schmierleitungen

Characteristics:

- wide temperature and application range
- colour black, UV resistant
- silicone free, halogen free
- pressure and impact resistant
- smooth surface and impermeable
- chemical resistance list see appendix.
- applications: compressed air, hydraulics, negative pressure, cooling lines, fuel and lubricating lines

Características:

- intervalo de temperatura y campo de aplicación amplio
- color negro, resistente a los rayos UV
- sin silicona, sin halógenos
- resistente a la presión y alos impacto
- superficie lisa e impermeable
- lista de resistencias, ver anexo
- aplicaciones: aire a presión, hidráulica, presión negativa, tuberías de refrigeración, tuberías de combustible y lubricante

Spezifikationen:

Werkstoff: Polytetrafluorethylen, FDA-konform
 Temperaturbereich: -200°C bis +200°C
 (kurzfristig: +260°C)
 Brandverhalten: gem. UL 94 V0
 Härte: Shore D55
 Berstdruck: 3-facher Betriebsdruck
 Farbe: natur
 Alle technischen Daten basieren auf den Herstellerangaben.

Specifications:

Material: Polytetrafluoroethylene, FDA approved
 Temperature range: -200°C to +200°C (short-term: +260°C)
 Flammability: acc. to UL 94 V0
 Hardness: Shore D55
 Burst pressure: 3 x working pressure
 Colour: natural
 All technical data are based on manufacturer's specifications.

Especificaciones:

Material: politetrafluoroetileno, cumple la FDA
 Intervalo de temperatura: -200°C a +200°C (brevemente: +260°C)
 Inflamabilidad: según UL 94 V0
 Dureza: Shore D55
 Presión de rotura: 3 x presión de servicio
 Color: natural
 Todos los datos técnicos se basan en las indicaciones del fabricante.

Rohre, Schläuche

Tubes, Hoses

Tubos, Mangueras

Merkmale:

- gute Temperaturbeständigkeit
- physiologisch unbedenklich
- nicht leitfähig
- hohe Festigkeit, Steifheit, Zähigkeit, sehr flexibel
- UV- und witterungsbeständig
- ausgezeichnete Antihafteigenschaften
- nicht geeignet für Druckpulsation
Empfehlung: FEP, PFA oder Jacoflon verwenden
- universelle chemische Beständigkeit;
Beständigkeitsliste siehe Anhang
- Anwendungen: Labor, Medizin, Chemie,
Analysentechnik, Vakuum

Characteristics:

- good temperature resistance
- non-toxic
- non-conductive
- high strength, rigidity, toughness and very good flexibility
- UV and weather resistant
- outstanding non-stick properties
- not suitable for pressure pulsation
recommendation: use FEP, PFA or Jacoflon
- universal chemical resistance; chemical resistance list see appendix
- applications: laboratory, medicine, chemical engineering, analysis technology, vacuum

Características:

- buena resistencia a la temperatura
- fisiológicamente inocuo
- no conductivo
- alta resistencia mecánica, rigidez, tenacidad, muy buena flexibilidad
- resistente a los rayos UV y a la intemperie
- propiedades antiadherentes extraordinarias
- no apto para pulsación de presión recomendación: utilizar FEP, PFA o Jacoflon
- resistencia química universal; lista de resistencias: ver anexo
- aplicaciones: laboratorios, medicina, sector químico, técnica de análisis, vacío

Herramienta de calibrage per SERTOflex ver capítulo Accesorios, Utillajes

Merkmale:

- Mehrschichtrohr aus PE und Aluminium-Einlage
- von Hand verformbar
- formstabil, halogen- und silikonfrei
- geringes Gewicht bei hoher Stabilität
- Anwendungen: ausschließlich für pneumatische Steuer- und Prozessleitungen, vor allem in feuchter und nasser Umgebung

Characteristics:

- multilayer tube of PE and aluminium core
- can be bent manually
- stable in form, halogen and silicone free
- lightweight with high stability
- applications: exclusively for pneumatic control and process lines, especially in humid and wet environment

Características:

- tubo multicapa de PE y refuerzo interior de aluminio
- dúctil
- estabilidad de forma, sin halógenos y silicona
- poco peso y mucha resistencia
- aplicaciones: exclusivamente para tuberías de mando y procesos neumáticos, sobre todo en entornos húmedos y mojados

Rohrschellen

Tube clamps

Abrazaderas de tubo

Funktion

- Halten und Führen von Rohrleitungen
- Aufnahme von axialen und radialen Kräften
- Bewegungen verhindern oder dämpfen

Norm

leichte Baureihe Serie A/B, nach DIN 3015

Werkstoff

- Rohrschellen: PP, PA6, PA66 F, Aluminium
- Anschweißplatten: Stahl phosphatiert und Edelstahl 1.4401/1.4571
- Tragschienen: Stahl blank und Edelstahl 1.4401/1.4571
- Tragschienenmutter, Schrauben, Deckplatten: Stahl verzinkt und Edelstahl 1.4401/1.4571

Eigenschaften

PP Rohrschellen:

- -30°C bis +90°C
- leichter als Rohrschellen aus PA6
- Rohrhaltekräfte von 0.6 kN bis 2.3 kN
- Farbe: dunkelgrün

PA6 Rohrschellen:

- -40°C bis +120°C
- schwerer als Rohrschellen aus PP
- Rohrhaltekräfte von 0.6 kN bis 3.5 kN
- leicht flammhemmend
- Farbe: schwarz

PA66 F Rohrschellen:

- -40°C bis +120°C
- schwerer als Rohrschellen aus PP
- Rohrhaltekräfte von 0.6 kN bis 3.5 kN
- Erfüllung der Anforderungssätze R22 / R23 / R24 / R26 für die Gefährdungsstufen HL1-HL2-HL3 nach EN 45545-2
- Farbe: weiss-grau

Aluminium Rohrschellen:

- -40°C bis +300°C
- Rohrhaltekräfte von 3.5 kN bis 8.9 kN
- Farbe: grau

Function

- fixation and guidance of tubes
- absorption of axial and radial forces
- to absorb or prevent movement

Norm

light series A/B, according to DIN 3015

Material

- tube clamps: PP, PA6, PA66 F, aluminium
- weld-on plates: steel phosphatized or stainless steel 1.4401/1.4571
- mounting rails: bright steel or stainless steel 1.4401/1.4571
- rail nuts, screws, cover plates: zinc-plated steel or stainless steel 1.4401/1.4571

Characteristics

Tube clamps made of PP:

- -30°C to +90°C
- lighter than tube clamps made of PA6
- tube holding power 0.6 kN to 2.3 kN
- color: dark green

Tube clamps made of PA6:

- -40°C to +120°C
- heavier than tube clamps made of PP
- tube holding power 0.6 kN to 3.5 kN
- slightly flame retardant
- color: black

Tube clamps made of PA66 F:

- -40°C to +120°C
- heavier than tube clamps made of PP
- tube holding power 0.6 kN to 3.5 kN
- fulfilment of the requirement sets R22 / R23 / R24 / R26 for the hazard levels HL1-HL2-HL3 according to EN 45545-2
- color: white-grey

Tube clamps made of aluminium:

- -40°C to +300°C
- tube holding power 3.5 kN to 8.9 kN
- color: grey

Función

- fijación y guía de tubos
- absorción de fuerzas axiales y radiales
- prevenir o amortiguar los movimientos

Norma

serie ligera A/B, según DIN 3015

Material

- abrazaderas de tubo: PP, PA6, PA66 F aluminio
- chapas de soldadura: acero fosfatado y acero inoxidable 1.4401/1.4571
- rieles de soporte: acero brillante y acero inoxidable 1.4401/1.4571
- tuercas para rieles de montaje, tornillos, placas de cobertura: acero galvanizado y acero inoxidable 1.4401/1.4571

Propiedades

Abrazaderas de tubo de PP:

- -30 °C a +90 °C
- más ligeras que las abrazaderas de tubo de PA6
- fuerzas de retención del tubo de 0,6 a 2,3 kN
- color: verde oscuro

Abrazaderas de tubo de PA6:

- -40°C a +120°C
- más pesadas que las abrazaderas de tubo de PP
- fuerzas de retención del tubo de 0,6 a 3.5 kN
- ligeramente piroretardante
- color: negro

Abrazaderas de tubo de PA66 F:

- -40°C a +120°C
- más pesadas que las abrazaderas de tubo de PP
- fuerzas de retención del tubo de 0,6 a 3.5 kN
- el cumplimiento de los conjuntos de requisitos R22 / R23 / R24 / R26 para los niveles de peligro HL1-HL2-HL3 según EN 45545-2
- color: blanco-grisáceo

Abrazaderas de tubo de aluminio:

- -40°C a +300°C
- fuerzas de retención del tubo de 3.5 a 8.9 kN
- color: gris

RS TMVA-VZ	946.4170.000	24.9	10.5	12.0	M6	0.700

Typ TMVA mit Verlustsicherung.

Der grosse Flansch der Gummikappe verhindert, dass die Tragschienenmutter während der Montage in die Schiene fällt, und hat zusätzlich eine schall- und vibrationsdämmende Funktion. Dadurch ist das System schnell und einfach zu montieren und zu justieren, auch bei vertikaler Installation.

Lieferung nur in Einheitspackungen à 50 Stk.

Type TMVA with loss protection.

The large flange of the rubber cap prevents the rail nut from falling into the rail during installation and acts also to absorb impacts and vibrations. This makes the system quick and easy to install and adjust, even in a vertical installation.

Delivery in packing units of 50 pcs. only

Tipo TMVA con protección contra pérdida.

La gran brida en la tapa de goma previene que la tuerca caiga en el riel durante la instalación y absorbe también impactos y vibraciones. Esto hace que el sistema sea rápido y fácil de instalar y ajustar, incluso en una instalación vertical.

Suministro únicamente en paquetes unitarios de 50 pzs.

RS TMVA-E1	946.5170.000	24.9	10.5	12.0	M6	0.940

Typ TMVA mit Verlusicherung.

Der grosse Flansch der Gummikappe verhindert, dass die Tragschienenmutter während der Montage in die Schiene fällt, und hat zusätzlich eine schall- und vibrationsdämmende Funktion. Dadurch ist das System schnell und einfach zu montieren und zu justieren, auch bei vertikaler Installation.

Lieferung nur in Einheitspackungen à 50 Stk.

Type TMVA with loss protection.

The large flange of the rubber cap prevents the rail nut from falling into the rail during installation and acts also to absorb impacts and vibrations. This makes the system quick and easy to install and adjust, even in a vertical installation.

Delivery in packing units of 50 pcs. only

Tipo TMVA con protección contra pérdida.

La gran brida en la tapa de goma previene que la tuerca caiga en el riel durante la instalación y absorbe también impactos y vibraciones. Esto hace que el sistema sea rápido y fácil de instalar y ajustar, incluso en una instalación vertical.

Suministro únicamente en paquetes unitarios de 50 pzs.

**Montage-
möglichkeiten**

Installation Options

Opciones de montaje

1. Montage auf Anschweißplatten

Die Anschweißplatten auf einer mit der Belastung abgestimmten Unterlage anschweißen. Hierbei ist auf die Ausrichtung der Schelle zu achten.

Die untere Schellenhälfte auf die Anschweißplatte klemmen, das Rohr einlegen, die zweite Schellenhälfte aufsetzen und mit den Schrauben festziehen. Auf die Vorspannung achten; Schellenhälften dürfen sich nach der Montage nicht berühren.

Nicht mit aufgesetzter Kunststoff-Schelle schweißen!

2. Montage auf Tragschienen

Die Tragschienen werden in Stücken zu 1 m geliefert; andere Längen auf Anfrage. Die Tragschiene anschweißen, Tragschienenmutter in die Schiene einführen und bis zum Anschlag drehen.

Die untere Schellenhälfte auf die Tragschienenmutter aufkleben, das Rohr einlegen, die zweite Schellenhälfte aufsetzen und mit den Schrauben festziehen. Vor dem Festziehen der Schrauben ist eine Positionierung der Schelle möglich. Auf die Vorspannung achten; Schellenhälften dürfen sich nach der Montage nicht berühren.

1. Installation on weld-on plates

Weld the weld-on plates to a base suitable for the load. Here it is important to make sure the clamp is properly aligned.

Fasten the lower half of the clamp to the weld-on plate, insert the tube, set the second half of the clamp in place, and use screws to tighten the clamp. Pay attention to the pretension; clamp halves should not be touching after installation.

Do not weld with plastic clamps in place!

2. Installation on mounting rails

The mounting rails are delivered in pieces of 1 m in length, other lengths available on request.

Weld the mounting rail, place the rail nuts in the rail and turn until they stop. Fasten the lower half of the clamp to the rail nuts, insert the tube, set the second half of the clamp in place, and use screws to tighten the clamp. The clamp can be positioned before the screws are tightened. Pay attention to the pretension; clamp halves should not be touching after installation.

1. Montaje sobre chapas de soldadura

Soldar las chapas de soldadura sobre una base adecuada para la carga prevista. Vigilar la orientación de la abrazadera.

Apretar la mitad inferior de la abrazadera sobre la chapa de soldadura, pasar el tubo, colocar la segunda mitad de la abrazadera y apretar con los tornillos. Vigilar la tensión inicial (las dos mitades de la abrazadera no deben tocarse una vez finalizado el montaje).

¡No soldar con la abrazadera de plástico colocada!

2. Montaje sobre rieles de soporte

Los rieles de soporte se suministran en piezas de 1 m (otros largos a petición). Soldar el riel de soporte o atornillarlo con un ángulo de fijación. Introducir las tuercas de riel de soporte en el riel y girar hasta el tope.

Apretar la mitad inferior de la abrazadera sobre las tuercas de riel de soporte, pasar el tubo, colocar la segunda mitad de la abrazadera y apretar con los tornillos. Antes de apretar los tornillos es posible posicionar la abrazadera. Vigilar la tensión inicial (las dos mitades de la abrazadera no deben tocarse una vez finalizado el montaje).

Hinweis: Beim Einsatz von Innensechskantschrauben werden keine Deckplatten verwendet. Die Innensechskantschrauben liegen in der Schellenhälfte versenkt.

Note: When using hexagon socket screws no cover plates are used. The hexagon socket screws are countersunk in the clamp body.

Nota: Si se usan tornillos de hexágono interior no se utilizan placas de cobertura. Los tornillos de hexágono interior quedan encastrados en el cuerpo de la abrazadera.

6.0 - 12.7	1.0
12.7 - 22.0	1.2
22.0 - 32.0	1.5
32.0 - 38.0	2.0
38.0 - 57.0	2.7
57.0 - 75.0	3.0
75.0 - 76.1	3.5

Rohrbogenmontage

Rohrbögen sind unmittelbar vor und hinter dem Bogen mit Rohrschellen zu befestigen.

Tube elbow installation

Tube elbows should be fastened with tube clamps directly before and after the bend.

Montaje en tubos acodados

Los tubos acodados se deben fijar con abrazaderas de tubo a los dos lados del codo.

Technische Informationen Technical information Información técnica

Schraubenanzugsdrehmomente und axiale Rohrhaltekräfte

Die angegebenen Schraubenanzugsdrehmomente und axialen Rohrhaltekräfte beziehen sich auf die jeweilige Montageart. Die axiale Rohrhaltekraft (gemäß DIN 3015 Teil 10) ist ein Mittelwert, ermittelt aus drei Versuchen bei +23 °C mit einem Stahlrohr nach DIN 2448 aus St 37, bei dem Haftreibung vorausgesetzt wird. Bei Belastung der Schelle in axialer Rohrrichtung mit der angegebenen Prüfkraft (F) gleitet das Rohr in der Schelle nicht.

Screw tightening torques and axial tube holding power

The specified screw tightening torques and axial tube holding power are based on installation as mentioned. The axial tube holding power (pursuant to DIN 3015, Part 10) is a mean value, determined from three tests at +23 °C with a steel tube according to DIN 2448 made of St 37, where static friction is provided. The tube will not slide in the clamp when force is applied to the clamp in the axial tube direction at the specified test load (F).

Par de apriete de los tornillos y fuerzas axiales de retención de tubo

Los pares de apriete indicados para los tornillos y las fuerzas axiales de retención de tubo según el tipo de montaje. La fuerza axial de retención de tubo (según DIN 3015, parte 10) es un valor medio determinado a partir de tres ensayos a +23 °C con un tubo de acero St 37 conforme a DIN 2448 en los que se presume adherencia. Al aplicar una carga sobre la abrazadera RSB en dirección al eje del tubo con la fuerza de ensayo indicada (F), el tubo no se desliza dentro de la abrazadera.

1. Montage mit Sechskantschrauben und Deckplatten nach ISO 4014/4017 (DIN 931/933)

1. Installation with hexagon screws and cover plates according to ISO 4014/4017 (DIN 931/933)

1. Montaje con tornillos hexagonal y placas de cobertura según ISO 4014/4017 (DIN 931/933)

Spezifikationen

Betriebsdruck (PN): 5 bis 40 bar
 Temperatur: -20°C bis +200°C
 Sicherheitsfaktor: 3-fach

Merkmale

Mit der Rohrkompensierverbindung können zwei Rohre einfach miteinander verbunden werden.

* Optionen erhältlich

Dichtung: NBR, NBR LT, VMQ

Specifications

Working pressure (PN): 5 to 40 bar
 Temperature: -20°C to +200°
 Safety factor: 3 times

Characteristics

With the tube compensator, two tubes can be interconnected in a simple way.

* Options available

Seal: NBR, NBR LT, VMQ

Especificaciones

Presión de régimen de trabajo (PN): 5 a 40 bar
 Temperatura: -20°C a +200°C
 Factor de seguridad: 3 veces

Características

Con el compensador de tubos se pueden conectar entre sí dos tubos de manera sencilla.

* Opciones disponibles

Junta: NBR, NBR LT, VMQ

Betriebsdruck

Working pressure

Presión de servicio

Der Versuchsaufbau zur Bestimmung der min. Nenndruckwerte bestand aus zwei mit einer Rohrkompenzierverbindung RK 51900 verbundenen und seitlich nicht fixierten Rohrabschnitten. Daraus resultieren die angegebenen Werte mit Berücksichtigung der 3-fachen Sicherheit.

The test setup for the determination of the min. working pressure values consisted of two tube sections, not fastened at the sides, connected to a tube compensator RK 51900. The values stated are the result of this test and in consideration of a safety factor of 3.

El dispositivo experimental para la determinación de los valores mínimos de la presión nominal se componía de dos secciones tubulares unidas entre sí con un conector de compensación de tubos RK 51900 y no fijadas lateralmente. A partir de aquí se obtienen los valores indicados teniendo en cuenta la triple seguridad.

Versuchsaufbau / test setup / dispositivo experimental

In der Praxis sind in einem geschlossenen Rohrsystem die Rohrabschnitte immer durch Rohrschellen, Wanddurchführungen, Bögen in der Leitung oder andere Befestigungen fixiert, was ein Ausgleiten aus der Rohrkompenzierverbindung verhindert.

Typically, the tube sections of a closed system are always fixed by tube clamps, wall ducts, bends in the tube or other fastenings, which prevent the sliding of the tube out of the compensator.

En la práctica, en un sistema tubular cerrado, las secciones tubulares siempre están fijadas mediante abrazaderas, pasamuros, codos en el conducto u otros sistemas de sujeción, lo cual impide el deslizamiento hacia el exterior del conector de compensación de tubos.

Abhängig von Anzahl, Qualität und Materialauswahl der Sicherungselemente sind deutlich höhere Betriebsdrücke als die hier angegebenen möglich. Werden die in der Praxis empfohlenen Masse für freie Rohrabschnitte eingehalten, sind Drücke von 10 bar (Personenverkehr) bis 16 bar (Güterverkehr) problemlos erreichbar.

Depending on the number, quality and material of the securing elements, significantly higher operating pressures than those specified are possible. If the usually recommended measures for not-fixed tube sections are followed, pressures from 10 bar (passenger transportation) up to 16 bar (freight transportation) can easily be reached.

Dependiendo del número, la calidad y el material elegido para los elementos de sujeción, son posibles valores de presión de servicio considerablemente superiores a los aquí indicados. Si en la práctica se respetan las masas recomendadas para las secciones tubulares, se pueden alcanzar sin problemas presiones de 10 bar (tráfico de personas) hasta 16 bar (tráfico de mercancías).

Kalibrierwerkzeug SERTOflex
Calibration tool SERTOflex
Herramienta de calibrage SERTOflex

AC 86600

Type -d	Mat.-Nr.	g/Stk
AC 86600	988.8660.000	143

Für Nennweiten 6/6,35/8/10/12 mm

Empfohlen zur Kalibrierung der Rohrenden von SERTOflex, da durch das Ablängen Verformungen entstehen können. Damit wird bei fachgerechter Montage die Dichtheit gewährleistet.

Werkstoff: Inox 1.4305

For nominal widths 6/6,35/8/10/12 mm

Recommended for calibration of the SERTOflex pipe ends, as deformations may be caused by cutting them to length. This ensures that there are no leaks if fitting is carried out properly.

Material: Inox 1.4305

Para diámetros nominales 6/6,35/8/10/12 mm

Recomendada para la calibración de los extremos de los tubos de SERTOflex dado que pueden producirse deformaciones durante el corte de los tubos. Estanqueidad garantizada en caso de montaje profesional.

Material: Inox 1.4305

Lecksuch-Spray
Leak detection spray
Aerosol detector de fugas

AC DLS

Type	Mat.-Nr.	g/Stk
AC DLS	YBD.DLS.0001	620

Allgemeine Anwendung für Druckluft, Sauerstoff und weitere Gase. Eignet sich zum schnellen Auffinden von Leckstellen in Druckluft- und Gasleitungen.

FCKW frei
 Doseninhalt: 500 ml

For general use with compressed air, oxygen and other gases. Suitable for fast leak detection in compressed air and gas lines.

CFC-free
 Contents: 500 ml

Utilización general para aire a presión, oxígeno y otros gases. Apto para la localización rápida de puntos de fuga en tuberías de aire a presión y gas.

Libre de CFC
 Contenido del bote: 500 ml

Gewindedichtungsband aus PTFE
Thread seal tape of PTFE
Cinta selladora de roscas de PTFE

AC 840, AC 841

Type	Mat.-Nr.	g/Stk
AC 840-6 (1/4")	988.8400.060	15
AC 841-9 (3/8")	988.8400.090	17
AC 841-12 (1/2")	988.8400.120	16

Gute chemische Beständigkeit für breite Einsatzmöglichkeiten.

Good chemical resistance for a wide range of applications.

Buena resistencia química para una amplia gama de aplicaciones.

Nicht-härtendes Dichtungsband für sauberes und schnelles Umwickeln der kegeligen Einschraubgewinde. Nicht alternd und immer gebrauchsfertig, das beliebte Mittel für eine dauerhafte Abdichtung.

Flexible seal tape for rapid and clean winding on the tapered adaptor thread. No aging and always ready for use, the popular material for a durable sealing.

Cinta selladora no endurecible para envolver de forma rápida y limpia las roscas de conexión cónicas. No envejece y está siempre lista para usar; el material preferido para un sellado duradero.

AC DTS

Type	Mat.-Nr.	g/Stk
AC DTS	YBD.DTS.0001	356

Ein bewährtes Schmier-, Gleit- und Trennmittel für Industrie und Handwerk. Es ist antiadhäsiv, Schmutz abweisend, hitzebeständig bis +260 °C und beständig gegen Wasser, Öl und aggressive Medien.

A proven lubricant and separating agent for industry and trade. It is anti-adhesive, soil-resistant, heat-resistant to +260 °C, and resistant to water, oil and aggressive media.

Un agente lubricante, deslizante y antiadherente de eficacia probada para la industria y los profesionales. Es antiadherente, repele la suciedad, resistente a temperaturas de hasta +260 °C y resistente al agua, aceite y medios agresivos.

FCKW frei, enthält Dichlormethan
 Doseninhalt: 400 ml

CFC-free, contains dichloromethane
 Contents: 400 ml

Libre de CFC, contiene diclorometano
 Contenido del bote: 400 ml

Fettpaste

für die Montage von Edelstahlverschraubungen

Grease

for the assembly of stainless steel fittings

Grasa lubricante

para el montaje de racores de acero inoxidable

ASW

Type	Mat.-Nr.	g/Stk
ASW120	735.0009.001	148
ASW250	735.0009.002	309

Fettpaste ASW ist besonders geeignet für Montagearbeiten, wenn aus optischen Gründen die Anwendung von metallhaltigen Schmierstoffen unerwünscht ist, nickelhaltige Produkte aus Gesundheitsgründen und kupferhaltige Produkte aus elektrochemischen Gründen nicht eingesetzt werden dürfen.

Fettpaste ASW verhindert Festbrennen, Kaltverschweißen und Stick-slip (Ruckgleiten) auch bei hohen Flächenpressungen und geringen Gleitbewegungen (Kriechgeschwindigkeit). Es erleichtert somit die Montage und Demontage von Verschraubungen, auch nach sehr langer Betriebszeit.

Sie wird speziell bei extremen Bedingungen eingesetzt, wie z. B.

- hohen Temperaturen (bis +1400°C)
- aggressiven Medien
- hohem Druck

Fettpaste ASW ist frei von schwefelhaltigen Zusätzen und Halogenen, beständig gegen Heiß-, Kalt- und Salzwasser, die meisten Säuren und Laugen und haft- und abriebfest.

Technische Daten:

Produkt: Fettpaste ASW
 Konsistenz: NGLI-Klasse 0-1
 Farbe: weiß
 Dichte bei +20°C: 1,42 g/cm³, DIN 51757
 Reibungskoeffizient: 0,19 - SRV-Test
 Druckfestigkeit: 3800 - 4000 N (VKA-Test)
 Wasserbeständigkeit: 1-90°C, DIN 51807
 Temperaturbereich: -40°C - +1400°C
 Druckbelastung: 230 N/mm²

Fettpaste ASW ist unempfindlich gegen die meisten Gase, z. B. Propan, Butan, Erdgas, Helium, Freon und Stickstoff. Fettpaste ASW darf allerdings nicht an Sauerstoffflaschen und Acetylenanlagen verwendet werden.

Fettpaste ASW ist frei von Silikon, Blei und anderen toxischen Schwermetallen. EG-Sicherheitsdatenblätter sind auf Anfrage erhältlich.

ASW Grease is particularly suitable for assembly work, if the use of lubricants containing metal components (for the sake of visual effect), products containing nickel (due to health reasons) and the use of products containing copper (due to electro-chemical reasons) have to be avoided.

ASW Grease prevents solidifying and hardening when affected by heat, welding without pre-heating and stick-slip (jerky sliding), also in the case of high surface pressure and minor sliding movements (crawling speed).

The grease is specifically applied under extreme conditions, e.g.

- at high temperatures (up to +1400°C),
- when aggressive materials are used, and
- under high pressure

ASW Grease is free of halogens and additives containing sulphur, durable in hot and cold water, and also salt water as well as most acids and alkaline solutions and adhesion- and abrasion-proof.

Technical Data:

Product: ASW Grease
 Consistency: NGLI-Class 0-1
 Color: White
 Density at +20°C: 1,42 g/cm³, DIN 51757
 Friction coefficient: 0,19 - SRV-Test
 Pressure resistance: 3800 - 4000 N (VKA-Test)
 Durability in water: 1-90°C, DIN 51807
 Temperatur range: -40°C - +1400°C
 Pressure load: 230 N/mm²

ASW Grease is non-sensitive to most gases, e.g. propane, butane, natural gas, helium, freon and nitrogen. However, ASW Grease should not be applied to oxygen bottles and acetylene equipment.

ASW Grease is free of silicone, lead and other toxic heavy metals. EC safety information is available on request.

La grasa lubricante ASW es especialmente adecuada para trabajos de montaje cuando no se desea utilizar lubricantes a base de metales por razones estéticas, no deben usarse productos a base de níquel por cuestiones de salud y existen factores electroquímicos que impiden el uso de productos a base de cobre.

La grasa lubricante ASW impide la adhesión, la soldadura en frío de las rugosidades y el efecto "stick-slip" (deslizamiento intermitente), incluso con presiones superficiales altas y deslizamientos pequeños (velocidad de fluencia). Por consiguiente, facilita el montaje y también el desmontaje de racores que han estado mucho tiempo en servicio.

Se utiliza sobre todo en condiciones extremas como, p. ej.:

- altas temperaturas (hasta +1400°C)
- medios agresivos
- alta presión

La grasa lubricante ASW no contiene aditivos sulfurados o halógenos, es resistente al agua caliente, fría y salada, a la mayoría de ácidos y bases, adherente y resistente al desgaste.

Datos técnicos:

Producto: grasa lubricante ASW
 Consistencia: clase NGLI 0-1
 Color: blanco
 Densidad a +20°C: 1,42 g/cm³, DIN 51757
 Coeficiente de rozamiento: 0,19; ensayo SRV
 Resistencia a la presión: 3800 - 4000 N (ensayo VKA)
 Resistencia al agua: 1-90°C, DIN 51807
 Intervalo de temperatura: -40°C - +1400°C
 Carga por compresión: 230 N/mm²

La grasa ASW es insensible a la mayoría de los gases como, p. ej., propano, butano, gas natural, helio, freón y nitrógeno. No obstante, la grasa ASW no debe utilizarse en botellas de oxígeno o instalaciones de acetileno.

La grasa lubricante ASW está exenta de silicona, de plomo y otros metales pesados tóxicos. Bajo demanda se suministran hojas de datos de seguridad CE.

Für die Vormontage im Schraubstock.
Aus gehärtetem Werkzeugstahl.

For pre-assembly in a vice.
Made of hardened tool-steel.

Para el premontaje en el tornillo de banco.
De acero templado para herramientas.

Der Vormontagegestutzen unterliegt dem üblichen Verschleiß und ist daher in regelmäßigen Abständen mit Konuslehren auf Lehrenhaltigkeit zu prüfen. Nicht lehrenhaltige Vormontagegestutzen sind auszutauschen, um eine Fehlmontage zu vermeiden.

The pre-assembly tool is subject to regular wear and tear and should, therefore, be inspected for accuracy to gauge in regular intervals using a cone gauge. Pre-assembly tools that are not accurate to gauge must be replaced to prevent incorrect assembly.

Los racores de premontaje están sometidos a un desgaste normal, por lo que es necesario comprobar periódicamente que cumplan el calibre utilizando calibres de cono. Los racores de premontaje que no cumplan el calibre deben sustituirse para evitar un montaje incorrecto.

Elektrohydraulisches Vormontagegerät
Electro-hydraulic pre-assembly machine
Máquina de premontaje electrohidráulica

US-FL/01

Type	Mat.-Nr.	Spannung / Voltage / Tensión

US-FL/01/400 Volt	888.1000.000.14	400 V / 50 Hz / 3 Ph

Für die Vormontage von Schneidringverschraubungen von 6 bis 42 mm und Klemmringverschraubungen von 6 bis 25 mm Durchmesser

Der jeweilige Verpressdruck wird vor der Montage manuell eingestellt (empfohlene Werte siehe Kapitel i).

Mit einem zusätzlichen Werkzeug kann diese Maschine auch zum Bördeln von Rohren von 6 bis 42 mm Durchmesser mit einer maximalen Wandstärke von 4 mm eingesetzt werden.

Technische Daten

Maße (LxTxH)	450 x 630 x 270 mm
Gewicht	58 kg
Motorleistung	0,75 kW

Lieferung erfolgt ohne Stecker.

Das Vormontagegerät kann auch in einer manuellen Ausführung angeboten werden.

Für die projektbezogene Montage von Kleinserien oder zum Austesten unter Produktionsbedingungen bietet EXMAR das Vormontagegerät für einen Zeitraum von max. 3 Monaten als Leihgerät an. Kontaktieren Sie uns.

For the pre-assembly of cutting ring fittings from 6 to 42 mm diameter and of clamping ring fittings from 6 to 25 mm diameter

The pressure is set manually before each operation (recommended values see chapter i).

Using an additional tool, this machine can also be used for flaring tubes from 6 to 42 mm diameter with a maximum wall thickness of 4 mm.

Technical data

Dimensions (lxdxh)	450 x 630 x 270 mm
Weight	58 kg
Power	0,75 kW

Delivered without a connector.

A manual version of the pre-assembly device is also available.

For the project-related assembly of small series or for testing under production conditions, EXMAR offers the pre-assembly machine on loan for a maximum period of 3 months. Please contact us.

Para el premontaje de racores de anillo cortante de 6 a 42 mm de diámetro y de racores de anillo de apriete de 6 a 25 mm de diámetro

La presión correspondiente se ajusta manualmente antes del montaje (valores recomendados ver capítulo i).

Con una herramienta suplementaria, la máquina puede utilizarse también para rebordear tubos de 6 a 42 mm diámetro con un grosor de pared máximo de 4 mm.

Datos técnicos

Dimensión (lpxxl)	450 x 630 x 270 mm
Peso	58 kg
Potencia	0,75 kW

El suministro se realiza sin conector.

La máquina de premontaje también se ofrece en versión manual.

Para el montaje de series pequeñas dentro de un proyecto o para comprobaciones en condiciones de producción, EXMAR ofrece la máquina de premontaje durante un tiempo limitado de 3 meses como máximo en concepto de préstamo. Póngase en contacto con nosotros.

Für jeden Rohr-Außendurchmesser (D1) sind je eine Gegenhalteplatte (1) und ein Werkzeugkonus (2) erhältlich. Beide sind mit der Größe beschriftet, um Verwechslungen vorzubeugen.

A counter plate (1) and a tool cone (2) are available for each tube diameter (D1). Both are labelled with the corresponding tube diameters to prevent confusion.

Se dispone de una placa de sujeción (1) y de un cono de herramienta (2) para cada diámetro exterior de tubo (D1). Ambos llevan rotulados sus tamaños para evitar confusiones.

Montagewerkzeuge unterliegen einem Verschleiß und müssen regelmäßig gereinigt und überprüft werden. Verschlissene Werkzeuge bitte umgehend ersetzen, sie können Fehlmontagen verursachen. Bei sachgemäßer Anwendung beträgt die Lebensdauer ca. 5000 Montagen.

Assembly tools are subject to wear and must be cleaned and checked on a regular basis. Worn tools must be replaced without delay to avoid incorrect assembly. When the tools are used as intended, they have a service life of approximately 5000 assemblies.

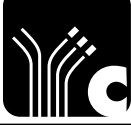

Las herramientas de montaje están sometidas a desgaste y deben limpiarse y verificarse con regularidad. Sustituya inmediatamente las herramientas desgastadas, pues pueden dar lugar a fallos de montaje. Si se utilizan correctamente, su vida útil es de aprox. 5000 montajes.

Spezialreinigung / Spezialbehandlung

Special cleaning / Special treatment

Limpieza especial / Tratamiento especial

Reinigungsanlage

Reinigungsanlage mit 9 Sektionen, Ultraschall-Reinigungswanne mit Lauge, Säure und entionisiertem Wasser, getrennt durch Spülwannen mit Osmosewasser und komplettiert mit zwei Trocknungssektionen. Luftvorhang verhindert die Kontamination der gereinigten Teile mit Verschmutzungen aus der Luft.

Reinraum ISO Klasse 8

Montage und Verpackung der einzelnen Teile in separate Beutel in einem direkt an die Reinigungsanlage angrenzenden, klimatisierten Reinraum, der der ISO Klasse 8 entspricht. Eine jährlich stattfindende Validierung durch eine externe Prüfstelle garantiert die Einhaltung der vorgeschriebenen Werte.

Anwendungsgebiet

Überall, wo eine spezielle Oberflächensauberkeit der medienberührten Teile benötigt wird bieten wir gereinigten US-Teile an. Sie sind einerseits die Grundlage für unsere Optionen mit Spezialschmiermitteln (OX und SI), andererseits die richtige Lösung für Kunden mit eigenen Schmiermitteln. Die Teile durchlaufen die Reinigungsanlage und werden im Reinraum montiert, in Beutel einzeln eingeschweisst und verpackt.

Qualität

Oberflächensauberkeit
 < 33 mg/m² TOC gem. ASTM*
 G93, Level B
 Jeder Auftrag ist rückverfolgbar, Montage und Prüfung in speziell sauberer Umgebung.

*American Society for Testing and materials

Lieferumfang

- einzelverpackt in verschweissten PE-Beuteln
- Spezialetikett

Wichtiger Hinweis

Bitte klären Sie im Voraus unsere Möglichkeiten und Beschränkungen für spezifische Reinigungs- und Schmieroptionen für Ihre Teile genau ab.

Cleaning system

Cleaning plant consists of 9 sections, including an ultrasound cleaning bath with alkali, with acid and with de-ionised water, separated by rinsing baths with osmotic water and completed with two drying sections. A so-called air curtain prevents contamination of the cleaned components by dirt from the air.

Clean room ISO class 8

Assembly and packaging of the individual components into separate bags is carried out in an air-conditioned clean room which complies with ISO Class 8 directly next to the cleaning plant. An annual validation by an external testing laboratory guarantees compliance with the prescribed values.

Application area

Wherever special surface cleanliness is required for parts that come into contact with the media we offer cleaned US components. They form the basis of our options with special lubricants (OX and SI) and on the other hand are the right solution of customers who use their own lubricants. The components pass through the cleaning system and are assembled and individually packed in the ISO Class 8 clean room.

Quality

Surface cleanliness
 < 33 mg/m² TOC as per ASTM*
 G93, Level B
 Every order is traceable; assembly and testing are done in a special, clean environment.

*American Society for Testing and materials

Scope of supply

- individually packaged in heat-sealed PE bags
- special label

Important information

Please clarify in advance our possibilities and restrictions for specific cleaning and lubrication options for your components.

Sistema de limpieza

La planta de limpieza consta de 9 secciones, incluyendo un baño de limpieza por ultrasonido con álcali, con ácido y con agua desionizada, separadas por baños de enjuague con agua osmótica y completadas con dos secciones de secado. Una llamada cortina de aire evita la contaminación de los componentes limpiados por la suciedad del aire.

Sala limpia ISO clase 8

El ensamblaje y el embalaje de los componentes individuales en bolsas separadas se lleva a cabo en una sala limpia con aire acondicionado que cumple con la norma ISO Clase 8 directamente junto a la planta de limpieza. Una validación anual por un laboratorio de pruebas externo garantiza el cumplimiento de los valores prescritos.

Área de aplicación

Dondequiera que se requiera una limpieza especial de la superficie de las piezas que entran en contacto con los medios, ofrecemos componentes limpios US. Son la base de nuestras opciones con lubricantes especiales (OX y SI) y por otro lado son la solución correcta de los clientes que utilizan sus propios lubricantes. Los componentes pasan por el sistema de limpieza y se ensamblan y embalan individualmente en la sala limpia ISO Clase 8.

Calidad

Limpieza de la superficie
 < 33 mg/m² TOC según ASTM*
 G93, Nivel B
 Cada pedido es rastreado; el montaje y las pruebas se hacen en un ambiente especial y limpio.

*Sociedad Americana de Pruebas y materiales

Alcance del suministro

- empaquetados individualmente en bolsas de PE selladas
- etiqueta especial

Información importante

Por favor, aclare de antemano nuestras posibilidades y limitaciones para las opciones específicas de limpieza y lubricación de sus componentes.

Vorbeschichtete Einschraubgewinde mit Loctite 5061

Pre-coated male adaptor threads with Loctite 5061

Roscas recubiertas con Loctite 5061

Durch vorbeschichtete Gewinde erreichen Sie eine optimale Abdichtung von konischen Außengewinden.

Das wasserbasierte, nichthärtende und nichttoxische Gewindedichtmittel Loctite® 5061 wird maschinell aufgetragen. Auf diese Weise ist sichergestellt, dass die Dichtmasse gleichmäßig und direkt bei den potentiellen Leckagestellen im Gewindegrund und auf den Gewindeflanken aufgebracht wird. Dadurch wird optimal für höchste Dichtheit und Sicherheit gesorgt. Vorbeschichtete Gewinde von EXMAR sind vielseitig einsetzbar.

- Dichtmittel Loctite® 5061 Dri-Seal®
- montagefertig
- umweltfreundlich
- ungiftig, lösungsmittelfrei
- sehr gute Medienbeständigkeit
- Zulassung von: DVGW, KTW, SVGW

Technische Daten *

- chemische Basis: Polyacrylat wässrig, nicht härtend
- Temperatur: -50 °C bis +150 °C
- Druck (PN): 16 bar, andere Drücke möglich
- Justierbarkeit: 45° (DIN 30660)
- Einsatzmedien: Luft, Öl, Wasser (heiss, kalt)

Hinweis: Loctite® 5061 ist nicht geeignet für den Einsatz mit reinem Sauerstoff.

*Die Angaben stammen vom Hersteller von Loctite® 5061. Änderungen sind vorbehalten. Die Klärung der Einsatztauglichkeit von beschichteten Gewinden der EXMAR liegt in der Verantwortung des Konstrukteurs und muss vorgängig geprüft werden. EXMAR lehnt jegliche Haftung ab.

Bestellhinweis

EXMAR-Produkte, die mit beschichteten Gewinden geliefert werden sollen, müssen bei der Bestellung klar mit der Erweiterung **CT** nach der Materialnummer oder der Typenbezeichnung gekennzeichnet sein.

Beispiel: WEV-22LR 3.4 CT
oder 708.2406.768.21.CT

With pre-coated threads you obtain optimal sealing of tapered outside threads.

The water-based, non-hardening, non-toxic sealing compound Loctite® 5061 is applied by machine. This assures that the sealing compound is applied evenly and directly at potential leakage points at the base and the flank of the thread, thus providing extreme leak-tightness and reliability. Pre-coated threads from EXMAR may be used in a wide variety of applications.

- Loctite® 5061 Dri-Seal® sealing compound
- ready for assembly
- environmentally friendly
- non-toxic, solvent-free
- very good media resistance
- approved by: DVGW, KTW, SVGW

Technical Data *

- chemical base: polyacrylate, aqueous, non-hardening
- temperature: -50 °C to +150 °C
- pressure (PN): 16 bar, others possible
- adjustability: 45° (DIN 30660)
- media: air, oil, water (hot, cold)

Note: Loctite® 5061 is unsuitable for use with pure oxygen.

*The data comes from the manufacturer of Loctite® 5061. These are subject to change without notice. Clarification of the suitability for use of coated threads from EXMAR is the responsibility of the designer and must be carried out in advance. EXMAR will accept no liability there after.

Ordering information

EXMAR products which need to be supplied with coated threads must be clearly marked with **CT** after the material number or the type description when ordering.

e.g: WEV-22LR 3.4 CT
or 708.2406.768.21.CT

Las roscas recubiertas permiten conseguir un sellado óptimo de roscas exteriores cónicas.

El sellador de roscas Loctite® 5061, de base acuosa no endurecible, no tóxico, se aplica mediante procedimientos mecánicos. De este modo se asegura la aplicación uniforme y directa de la masa selladora en los posibles puntos de pérdida del fondo y de los flancos de la rosca para obtener una estanquidad y seguridad óptimas. Las roscas recubiertas de EXMAR tienen numerosas aplicaciones.

- sellador Loctite® 5061 Dri-Seal®
- listo para el montaje
- respetuoso con el medio ambiente
- no tóxico, no contiene disolventes
- muy buena resistencia a líquidos y gases
- homologaciones: DVGW, KTW, SVGW

Datos técnicos *

- base química: poliácridato acuoso, no endurecible
- temperatura: -50 °C a +150 °C
- presión (PN): 16 bar, otras presiones posibles
- margen de ajuste: 45° (DIN 30660)
- medios en los que se aplica: aire, aceite, agua (caliente, fría)

Advertencia: Loctite® 5061 no sirve para sellar oxígeno puro.

*Información proporcionada por el fabricante de Loctite® 5061. Reservado el derecho a realizar modificaciones. El fabricante que las utilice es el responsable de verificar de antemano la idoneidad de las roscas recubiertas de EXMAR para cada aplicación. EXMAR declina toda responsabilidad.

Instrucciones de pedido

Los productos EXMAR que deban suministrarse con roscas recubiertas han de identificarse inequívocamente con el suplemento **CT** después del número de material o de la denominación de tipo en el pedido.

Ejemplo: WEV-22LR 3.4 CT
o 708.2406.768.21.CT

Maßgeschneiderte Lösungen – für Sie entwickelt von EXMAR Engineering

Beratung

Wir beraten Sie kompetent und mit großer Erfahrung in der Produktentwicklung. Sie bekommen von uns Lösungsvorschläge, die in der harten Realität bestehen können. Ihr Vorteil - unsere Erfahrung!

Engineering

Wir entwickeln für Sie maßgeschneiderte Produkte – zusammen mit Ihnen, wenn Sie wollen. Damit nur einwandfreie Ware unser Haus verläßt, prüfen wir alles vorher in unserem eigenen Labor. Sie erhalten nur einwandfreie und geprüfte Waren. Ihre Idee – unser Engineering!

Optimierte Produkte

Wir analysieren Ihre vorhandenen Produkte und spüren mögliches Optimierungspotenzial auf. Vielleicht lassen sich Fertigung und Montage oder die Herstellung vereinfachen. Sie erhalten dann durch ein Redesign optimierte Produkte. Ihre Einsparung – unsere Produktoptimierung!

EXMAR Engineering develops tailor-made solutions – also for you

Consulting

Our many years experience in product development enables us to advise you in a knowledgeable, competent manner and to propose appropriate application solutions. – Our experience is your advantage!

Engineering

In close co-operation with you and supported by the latest technology, we can develop the right products for your specific requirements. The quality of the components is validated internally, to ensure that only top-grade products leave our works – You provide the idea, we provide the engineering!

Product streamlining

We analyse, optimise and redesign. Existing products are examined meticulously and tested to determine whether manufacture and assembly can be optimised. Our redesigns simplify the manufacture of your products – EXMAR product streamlining saves you money!

Soluciones a su medida desarrolladas por EXMAR Engineering

Asesoramiento

Asesoramiento competente y amplia experiencia en el desarrollo de productos. Le propondremos soluciones que superarán con creces las duras condiciones del día a día. Su ventaja: nuestra experiencia.

Ingeniería

Desarrollamos para usted productos de ajuste preciso; si lo desea, puede colaborar en el proceso. Para que de nuestra fábrica solamente salgan productos en perfecto estado, los ensayamos a fondo en nuestro propio laboratorio. Recibirá exclusivamente productos inmaculados y verificados. Su idea: nuestra ingeniería.

Productos optimizados

Analizamos su gama de productos actual y exploramos posibles márgenes de optimización. Si consideramos que puede ser posible simplificar la producción y el montaje o la fabricación, recibirá productos optimizados en el marco de un rediseño. Su ahorro: nuestra optimización del producto.

Sonderanfertigungen

Special designed products

Modelos especiales

Schwierige Verbindungsaufgaben – Sonderanfertigungen von EXMAR

Herstellverfahren

Wir verfügen über modernst eingerichtete Produktions- und Bearbeitungswerkstätten. Zusammen mit großer Erfahrung im Pressen, Drehen oder Spritzen können wir Ihnen einwandfreie Produkte garantieren. Das schließt auch vor- oder nachgelagerte Prozesse wie Löten, Schweißen oder Oberflächenveredeln mit ein. Ihr Nutzen – unsere Vielseitigkeit!

Werkstoffe

Wir kennen uns in den Materialien aus. Vielfältige Herstellverfahren setzen auch Kenntnisse über die zu verarbeitenden Materialien voraus. Egal ob Edelstahl oder Sonderwerkstoffe wie Hastelloy®, Monel® usw., für jede Aufgabenstellung können wir das geeignete Material auswählen und verarbeiten. Sie erhalten den optimalen Werkstoff für Ihre Anwendung. Ihre Auswahl – unsere Materialvielfalt!

Funktionalität

Wir liefern unsere EXMAR Produkte für den Maschinen- und Apparatebau genauso wie für die Lebensmittel-, Pharma- oder Hightechindustrie. Überall hat sich die große Funktionalität bewährt. Sie erhalten individuelle Lösungen für genau Ihre spezielle Anwendung. Ihr Einsatzbereich – unsere Funktionalität

The special designs from EXMAR eliminate the problems that arise with connections

Manufacturing Process

Our hi-tech equipment in production and machining, as well as the wealth of experience in pressing, turning or spraying, enables us to guarantee you top-class products. Our other centres of excellence include brazing, welding and surface finishing offers you the complete manufacturing process

– Our versatility is your advantage!

Materials

Our varied manufacturing processes enable us to deal with a variety of material specifications. Irrespective of whether it is stainless steel or special material such as Hastelloy®, Monel®, etc., we have the necessary material and knowledge for the manufacture and you receive the ideal material for your application – material diversity is more important than ever!

Functionality

Due to their individual nature, EXMAR products can be found in a number of applications. These include mechanical engineering, food and beverage, water, heating and ventilation, pharmaceutical and other high-tech industries – optimized functionality, a maximum of application possibilities!

Tareas de conexión complejas, modelos especiales de EXMAR

Procedimiento de fabricación

Disponemos de centros de producción y elaboración con los equipamientos más modernos. Esto, unido a nuestra dilatada experiencia en el prensado, el torneado o la inyección, nos permite garantizar productos impecables e incluye también procesos anteriores o siguientes como, por ejemplo, la soldadura indirecta o directa o el afinado de superficies.

Su ventaja: nuestra versatilidad.

Materiales

Tenemos amplia experiencia en el campo de los materiales. Numerosos procedimientos de fabricación exigen conocimientos sobre los materiales que se procesan. Seleccionamos y elaboramos el material adecuado para cada tarea, ya sea acero inoxidable o materiales especiales como Hastelloy®, Monel®, etc.; usted recibirá siempre el material óptimo para su aplicación.

Su selección: nuestra diversidad de materiales.

Funktionalidad

Suministramos nuestros productos EXMAR tanto para la construcción de maquinaria y aparatos como a la industria alimentaria, farmacéutica o de alta tecnología; en todos los sectores se ha acreditado la extraordinaria funcionalidad. Recibirá soluciones personalizadas para su aplicación específica. Su campo de aplicación: nuestra funcionalidad.

Baugruppen
Pre-assembled kits
Grupos

Komplexe Aufgaben lösen – mit Baugruppen von EXMAR

With assemblies from EXMAR, you solve all the problems in one hit

Solución de tareas complejas con grupos de EXMAR

Von der Planung bis zur Distribution

Wir führen einzelne Komponenten zu Baugruppen zusammen. Für Sie übernehmen wir dabei die Planung, Fertigung und die gesamte Distribution.
Ihr Termin – unsere Lieferung just in time!

From planning to distribution

We fit individual components together to create assemblies. We undertake the planning, fabrication and distribution for you – Just in time with us as your partner!

Desde la planificación a la distribución

Combinamos componentes individuales en grupos y nos encargamos por usted de la planificación, la fabricación y la distribución completa. Su plazo: nuestra entrega en la fecha prevista (just in time)

Know-how

Wir haben das notwendige Know-how. Denn für unsere Kunden montieren wir täglich hunderte von Komponenten zu einbaufertigen Einheiten. Sie profitieren von unserem Wissen, denn das Gesamte ist mehr als die Summe der Einzelteile. Ihre Baugruppen – unsere Montagekompetenz!

Knowledge

EXMAR assembles hundreds of components on a daily basis to form ready-to-fit units. We have many years knowledge of pre-assembly experience – We can do this for you!

Conocimientos

Disponemos de los conocimientos necesarios. A diario ensamblamos cientos de componentes en unidades listas para montar para nuestros clientes. Usted se beneficia de nuestros conocimientos porque el conjunto es más que la suma de los elementos. Sus grupos: nuestra competencia de montaje.

Kostenvorteil

Wir wollen mit unserer Baugruppenfertigung Ihre Zeit sparen. Sie sparen aber nicht nur wertvolle Montagezeiten. Auch die Disposition, Logistik und Lagerbewirtschaftung gestaltet sich wesentlich einfacher, was Ihren Kosten gut tut. Ihr Kostenvorteil – unsere Bestrebung!

Cost-Benefits

With assemblies from EXMAR, you not only save valuable fitting time, but also simplifies the layout, logistics and inventory management and maintenance issues. This has a positive effect on reducing costs – Outsourcing, your cost-benefit!

Reducción de costes

El objetivo de nuestra fabricación de grupos es ahorrarle tiempo. Sin embargo, además de ahorrar precioso tiempo de montaje, se reducen costes en la planificación de necesidades, logística y gestión de almacenes. Su reducción de costes: nuestro afán.

Konfektionierte Leitungen

Ready-to-fit pipes

Tuberías confeccionadas

Einbaufertige Leitungen – EXMAR Top-Qualität

Ausführungen

Wir produzieren Ihre Rohrleitungen maßgeschneidert, passgenau und einbaufertig. Sie wählen aus einer Vielzahl von Rohrumformungs- und Konfektionierungsmöglichkeiten aus – gelötet oder geschweißt, gebogen oder gewickelt.

Ihr Anruf – unsere Leitung!

Materialien

Wir bieten Ihnen gerne Rohre in den verschiedensten Variationen an. Sie erhalten bei uns nicht nur Edelstahl, sondern auch Kupfer- oder Messingrohre. Oder sollen es gar warm verformte Kunststoffrohre sein? Wir machen es möglich.

Ihre Frage – unsere vielfältige Antwort!

Konfektionieren

Wir konfektionieren die gebogenen Leitungen nach Ihren Anforderungen und Wünschen. Sie bekommen Rohrleitungen, versehen mit EXMAR Armaturen, die sich mühelos ein- und ausbauen lassen.

With EXMAR you get top-quality, ready-to-fit pipes

Designs

Whether brazed or welded, curved or wound, EXMAR produces your pipes in a customised, ready-to-fit state. You have the possibility to select from a multitude of pipe shapes and manufacturing processes – Give us a call!

Materials

Pipes don't have to be made only from stainless steel! We can also offer you brass or copper pipes in a variety of different forms. Or do you require hot-formed plastic pipes? We can meet your specifications – Give us a try!

Ready-to-fit

We can assemble pipe work with EXMAR fittings according to your specifications. Pipes with EXMAR fittings can be installed or removed without difficulty.

Tuberías listas para instalar: calidad puntera EXMAR

Versiones

Producimos sus tuberías a medida, con precisión de ajuste y listas para instalar. Puede elegir entre numerosas posibilidades de conformado y confección de tuberías: soldadura indirecta o directa, doblado o enrollado.

Su llamada: nuestra línea.

Materiales

Ofrecemos tubos en todo tipo de variantes. Además de tubos de acero inoxidable, podemos suministrar también tubos de cobre, latón o incluso tubos de plástico deformados en caliente. Nosotros lo hacemos posible.

Su pregunta: nuestra respuesta múltiple.

Confeccionado

Confeccionamos las tuberías dobladas con arreglo a sus especificaciones. Le suministraremos tuberías equipadas con valvulerías EXMAR sumamente fáciles de montar y desmontar.

Características de los materiales de en los productos EXMAR

Standard

FKM/FPM – Fluorkautschuk

Fluorelastomer zählt zu den bedeutendsten Werkstoffentwicklungen der 50er Jahre. Der Unterschied zwischen FPM und FKM liegt nur in der Bezeichnung: FPM (nach DIN / ISO) und FKM (nach ASTM). Der Ausgangswerkstoff ist FDA-konform (CFR 21, §177.2600). Es ist auch unter dem Handelsnamen Viton® bekannt.

FKM zeichnet sich durch hohe Temperatur-, Witterungs-, Ozon- und Chemikalienbeständigkeit aus. Der thermische Anwendungsbereich reicht von -20°C bis +200°C, kurzzeitig +250°C.

FKM ist gegenüber fast allen Hydraulikflüssigkeiten auf Mineralölbasis und synthetischer Basis hoch beständig, ebenso gegen Ozon, Sauerstoff, Kraftstoffe, Aromate, viele organische Lösungsmittel und Chemikalien. Einschränkungen müssen für den Einsatz in Heisswasser, Dampf und bei Tieftemperaturen gemacht werden. Auf Grund nur geringer Kälteflexibilität und mässiger Heisswasser- und Dampfbeständigkeit sind für diesen Einsatz spezielle Werkstoffe zu wählen. Nicht beständig ist FKM ausserdem gegen polare Lösungsmittel wie Aceton, Bremsflüssigkeiten auf Glykolbasis, Ammoniakgas, Alkalien und niedermolekulare organische Säuren (Ameisensäure und Essigsäure).

Auf Anfrage

PEEK – Polyetheretherketon

PEEK ist einer der wichtigsten Vertreter der thermoplastischen PTFE-Kunststoffe, der seine hervorragenden Eigenschaften bis zu Temperaturen von +260°C hält.

PEEK ist sehr beständig gegen Wasserdampf, Hydrolyse, Kraftstoffe, Alkohole, Fette, Öle und Laugen. Das Material wird z.B. eingesetzt bei Führungsringen, Kugelhahnsitzen, etc., die höchsten Anforderungen entsprechen müssen. Es ist auch sehr gut geeignet für Tieftemperaturen bis -100°C.

EPDM – Ethylen-Propylen-Dien-Elastomer

EPDM Elastomere sind sehr alterungs- und witterungsbeständig, auch bei UV-Belastung und Ozonbelastung. Sie weisen geringe Wasserdampfdurchlässigkeit und extrem tiefe Versprödungstemperaturen auf. Wegen seiner hohen Elastizität und guten chemischen Beständigkeit wird EPDM für verschiedenste Dichtungen wie z.B. O-Ringe und Flachdichtungen verwendet. Die Einsatztemperatur liegt zwischen -40°C und +160°C, kurzzeitig bis +180°C.

EPDM hat eine ausgezeichnete Beständigkeit gegen Heisswasser und Wasserdampf und eine gute Beständigkeit gegen polare Flüssigkeiten wie Aceton, Methanol usw. Nicht beständig ist der Werkstoff gegenüber aliphatischen und aromatischen Kohlenwasserstoffe. (Mineralöle, Benzin, Kraftstoffe) und Fetten.

FFKM/FFPM – Perfluorkautschuk

Chemisch ist FFKM dem Polytetrafluorethylen (PTFE) sehr ähnlich und verbindet die Elastizität und die Dichtungskraft eines echten Elastomers mit der chemischen Beständigkeit von PTFE. Verglichen mit rein PTFE-Dichtungen zeigen FFKM-Teile kein Wegkriechen, kein Fließen und geringe bleibende Verformung.

Standard

FKM/FPM – Fluorocarbon rubber

Fluororubber figures among the most significant developments in materials technology of the 1950s. The difference between FPM and FKM is only the name: FPM (according to DIN / ISO) and FKM (according to ASTM). The initial material is FDA-compatible (CFR 21, §177.2600). It is also known under the trading name Viton®.

FKM features high temperature, weathering, ozone and chemical resistance. The temperature application range is from -20°C to +200°C, short term +250°C.

FKM is highly resistant to nearly all mineral-oil and synthetic-based hydraulic fluids, as well as to ozone, oxygen, fuels, aromatic compounds, many organic solvents and chemicals. There are however restrictions for use in hot water, steam and at low temperatures. Due to the diminished low-temperature flexibility and moderate hot water and steam resistance, special materials should be selected for these applications. FKM is also not resistant to polar solvents, such as acetone, glycol-based brake fluids, ammonia gas, alkalis and low molecular-weight organic acids (formic acid and acetic acid).

On request

PEEK – Polyetheretherketone

PEEK is one of the most important representatives of the thermoplastic PTFE plastics which maintains its excellent properties up to temperatures of +260°C.

PEEK is very resistant to water vapour, hydrolysis, fuels, alcohols, greases, oils and alkalis. The material is used for example in guide rings, ball valve hubs etc. that have to meet the highest requirements. It is also well suited to low temperatures down to -100°C.

EPDM – Ethylene-Propylene-Diene-Rubber

EPDM elastomers are very resistant to ageing and weathering, even with UV exposure and ozone influence. They exhibit low water vapour permeability and extremely low brittleness temperature. Due to its high elasticity and good chemical resistance, EPDM is used for diverse seals, such as e.g. O-rings and flat gaskets. The working temperature ranges from -40°C to +160°C, short term up to +180°C.

EPDM possesses excellent resistance to hot water and steam and good resistance to polar liquids, such as acetone, methanol, etc. The material is not resistant to aliphatic and aromatic hydrocarbons (mineral oils, benzene, fuels) and greases.

FFKM/FFPM – Perfluoroelastomer

Chemically, FFKM is very similar to polytetrafluorethylene (PTFE) and it combines the elasticity and sealing strength of a true elastomer with the chemical resistance of PTFE. Compared to pure PTFE seals, FFKM parts do not demonstrate creep behaviour or yield and little permanent deformation. FFKM perfluoroelastomer

Standard

FKM/FPM – caucho fluorado

El fluoroelastomero es uno de los más importantes desarrollos de material de los años 50. La diferencia entre FPM y FKM solamente afecta a la denominación: FPM (según DIN / ISO) y FKM (según ASTM). El material de partida cumple la FDA (CFR 21, art. 77.2600). También se conoce por el nombre comercial de Viton®.

FKM se caracteriza por una elevada resistencia a la temperatura, los agentes meteorológicos, el ozono y las sustancias químicas. El rango de aplicación térmica va desde -20°C a +200°C, brevemente hasta +250°C.

FKM es altamente resistente a casi todos los líquidos hidráulicos sobre base de aceite mineral y sintética, así como al ozono, oxígeno, combustibles, compuestos aromáticos, multitud de disolventes y sustancias químicas orgánicas. Es necesario establecer restricciones para el uso en agua caliente, vapor y a bajas temperaturas. Debido a la limitada flexibilidad en frío y la moderada resistencia al agua caliente y al vapor, para tales aplicaciones deben seleccionarse materiales especiales. Además, FKM no es resistente a disolventes polares como la acetona, los líquidos de frenos sobre base de glicol, el gas amoniaco, las sustancias alcalinas y los ácidos orgánicos de baja molecularidad (ácido fórmico y ácido acético).

A petición

PEEK – polieteretercetona

PEEK es uno de los principales productos representativos de los termoplásticos PTFE, que conserva sus excelentes propiedades hasta temperaturas de +260°C.

PEEK es altamente resistente al vapor de agua, hidrólisis, combustibles, alcoholes, grasas, aceites y lejías. El material se utiliza, por ejemplo, en anillos guía, asientos de llaves esféricas, etc., que han de hacer frente a las exigencias más elevadas. Resulta idóneo asimismo para bajas temperaturas hasta de -100°C.

EPDM – elastómero etileno propileno dieno

Los elastómeros EPDM son altamente resistentes al envejecimiento y los agentes meteorológicos, incluso bajo la acción de radiación ultravioleta y de ozono. Presentan una reducida permeabilidad al vapor de agua y temperaturas de fragilización extremadamente bajas. Debido a su elevada elasticidad y buena resistencia química, EPDM se utiliza para las juntas más diversas, como por ejemplo anillos tóricos y juntas planas. La temperatura de utilización varía entre -40°C y +160°C, brevemente hasta +180°C.

EPDM presenta una resistencia excepcional al agua caliente y el vapor de agua y una buena resistencia a líquidos polares como acetona, metanol, etc. Este material no es resistente a hidrocarburos alifáticos y aromáticos, (aceites minerales, bencina, combustibles) y grasas.

FFKM/FFPM – caucho de perfluoruro

FFKM es químicamente muy similar al politetrafluoretileno (PTFE) y combina la elasticidad y la fuerza de obturación de un auténtico elastómero con la resistencia química del PTFE. En comparación con juntas de PTFE puro, las piezas de FFKM no presentan escurrimiento ni fluencia y una reducida deformación permanente. Las

FFKM-Perfluor-Elastomer Teile bewahren ihre elastischen Eigenschaften im Langzeitbetrieb von bis zu +315 °C und im periodischen Betrieb bis zu +350 °C selbst in Berührung mit korrosiven Chemikalien.

Wegen seines vergleichsweise hohen kg-Preises ist der Einsatz auf Anwendungen beschränkt, bei denen es im Kontakt mit sehr aggressiven Medien steht, besonders hohe Sicherheits- oder Reinheitsanforderungen bestehen oder mögliche hohe Störfallkosten den Einsatz rechtfertigen. Dies kann beispielsweise in der chemischen, der erdölfördernden und -verarbeitenden Industrie, dem Apparate- und Kraftwerksbau, der Halbleiter-, der Lebensmittelindustrie oder in der Luft- und Raumfahrt der Fall sein.

FFKM-Teile widerstehen dem Angriff von nahezu allen Chemikalien wie z.B. Äther, Lösungsmittel, Ketone, Ester, Amine, Kraftstoffe, Säuren und Laugen.

PTFE – Polytetrafluorethylen

PTFE ist aufgrund seiner hervorragenden chemischen, physikalischen, thermischen und elektrischen Eigenschaften ein wichtiger Werkstoff für die verschiedensten Industriezweige. Der Werkstoff ist in reiner Form physiologisch unbedenklich und FDA-konform (CFR 21, § 177.1550). Die Einsatztemperatur liegt zwischen -200 °C bis +260 °C (kurzzeitig bis +300 °C). PTFE hat einen ausgesprochen niedrigen Reibungskoeffizienten, neigt jedoch zum Kaltfluss und hat nur geringe Druck- und Verschleissfestigkeit.

PTFE ist beständig gegen nahezu alle organischen und anorganischen Chemikalien (ausser elementares Fluor unter Druck oder bei hohen Temperaturen, Fluor-Halogen-Verbindungen und Alkalimetallschmelzen). Bei Raumtemperatur ist PTFE physiologisch stabil, der Kontakt mit aggressiven Medien ändert die Werkstoffeigenschaften nicht.

VMQ – Silikon-Elastomer

VMQ® zeichnet sich besonders durch den grossen thermischen Anwendungsbereich aus. Die sehr gute Kälteflexibilität, die gute Ozonbeständigkeit und die guten dielektrischen Eigenschaften sind weitere Vorteile. Schlechter als bei anderen Elastomeren ist die Gasdurchlässigkeit. Die Einsatztemperatur liegt zwischen -60 °C und +250 °C.

NBR – Acrylnitril-Butadien-Elastomer

Die Kurzbezeichnung NBR ist abgeleitet von Nitrile Butadiene Rubber. NBR ist wegen der guten Beständigkeit gegen die meisten Öle und Fette auf Mineralölbasis der in der Dichtungstechnik am häufigsten eingesetzte Werkstoff. Der thermische Einsatzbereich liegt normalerweise zwischen -30 °C und +100 °C, kurzzeitig bis +130 °C; bei höheren Temperaturen verhärtet der Werkstoff. Ausserdem zeigt NBR ein günstiges Alterungsverhalten und geringen Abrieb.

NBR ist beständig gegen Hydrauliköle, Wasserglykole und Öl in Wasser-Emulsionen, Mineralöle und Mineralölprodukte, tierische und pflanzliche Öle, Benzin, Heizöl, Wasser bis ca. +70 °C, Butan, Propan, Methan, Ethan. Stark quellend ist NBR bei aromatischen Kohlenwasserstoffen (z.B. Benzol), chlorierten Kohlenwasserstoffen (z.B. Trichlorethylen), Estern, polaren Lösungsmitteln wie Aceton sowie in Bremsflüssigkeiten auf Glykoletherbasis.

NBR – LT

NBR-LT (Low Temperature) besitzt die gleichen Beständigkeiten und Eigenschaften wie NBR bei einem thermischen Einsatzbereich von -50 °C bis +100 °C.

parts maintain their elastic properties in long-term operation at up to +315 °C and in periodic operation up to +350 °C, even when in contact with corrosive chemicals.

Because of its comparably high kilogram price, the applications are limited to those with contact to highly aggressive media, particularly in situations where there are high safety and purity specifications or where the costs in the event of failure would be very high. Such applications are found, for example, in the chemical, petroleum producing and processing industries, equipment manufacturing, power plant construction, semiconductor and food industries or in the aerospace industry.

FFKM parts are resistant to nearly all chemicals, such as ethers, solvents, ketones, esters, amines, fuels, acids and alkalis.

PTFE – Polytetrafluoroethylene

Due to its outstanding chemical, physical, thermal and electrical properties, PTFE is an important material in a variety of industrial sectors. The material is non-toxic in its pure form and FDA-compatible (CFR 21, § 177.1550). The working temperature is between -200 °C and +260 °C (short term up to +300 °C). PTFE has an exceptionally low coefficient of friction, tends, however, to cold flow and only has low resistance to pressure and wear.

PTFE is resistant to nearly all organic and inorganic chemicals (except elementary fluorine under pressure or at high temperatures, fluorine-halogen compounds and alkali metal fusions). At room temperature, PTFE is physiologically stable; contact with aggressive media does not alter its material properties.

VMQ – Silicone-Elastomer

VMQ is particularly characterised by its broad range of thermal application. The very good cold flexibility, the good ozone resistance and the good dielectric properties are additional advantages. The gas permeability is not as favourable as with other elastomers. The working temperature range is between -60 °C and +250 °C.

NBR – Acrylonitrile-Butadiene-Elastomer

The abbreviation NBR stands for Nitrile Butadiene Rubber. NBR is the most frequently used material in sealing technology because of its good resistance to most mineral oils and greases. The thermal range of application is normally between -30 °C and +100 °C, short term up to +130 °C; at higher temperatures the material hardens. Additionally, NBR exhibits favourable ageing characteristics and low surface abrasion.

NBR is resistant to hydraulic oils, water glycols and oils in aqueous emulsions, mineral oils and mineral-oil products, animal and vegetable oils, benzene, fuel oil, water up to ca. +70 °C, butane, propane, methane, ethane. NBR swells greatly with aromatic hydrocarbons, e.g. benzene, chlorinated hydrocarbons (e.g. trichloroethylene), esters, polar solvents, such as acetone, as well as in glycol ether-based brake fluids.

NBR – LT

NBR-LT (Low Temperature) has the same durability and properties as NBR with a thermal application range of -50 °C to +100 °C.

piezas de elastómero de perfluoruro FFKM conservan las características elásticas durante el funcionamiento prolongado a temperaturas de hasta +350 °C, incluso en contacto con sustancias químicas corrosivas.

Debido a su comparativamente elevado precio por kilogramo, su utilización está restringida a aplicaciones en que entre en contacto con medios muy agresivos, si existen elevados requisitos en cuanto a seguridad y limpieza o cuando su uso esté justificado por los posibles elevados costes derivados de un fallo. Tal puede ser el caso, por ejemplo, en la industria química, de prospección y procesamiento del petróleo, la construcción de equipamientos y centrales eléctricas, la industria de los semiconductores, el sector alimentario o la navegación aérea y espacial.

Las piezas de FFKM soportan la agresión de todas las sustancias químicas como, por ejemplo, éter, disolventes, cetonas, ésteres, aminas, combustibles, ácidos y lejías.

PTFE – politetrafluoretileno

El PTFE constituye, gracias a sus excepcionales características químicas, físicas, térmicas y eléctricas, un material importante para los más diversos sectores de la industria. El material es, en estado puro, fisiológicamente inocuo y cumple la FDA (CFR 21, art. 177.1550). La temperatura de utilización varía entre -200 °C y +260 °C (brevemente hasta 300 °C). PTFE presenta un coeficiente de rozamiento notablemente reducido, aunque propende al flujo en frío y posee una reducida resistencia a la presión y al desgaste.

PTFE es resistente a la casi totalidad de sustancias químicas orgánicas e inorgánicas (excepto el flúor elemental bajo presión o a temperaturas elevadas, compuestos, de flúor-halógenos y materiales licuados de metales alcalinos). A temperatura ambiente, el PTFE es fisiológicamente estable, el contacto con medios agresivos no altera las características del material.

VMQ – elastómero de silicona

VMQ se caracteriza especialmente por el amplio rango de aplicación térmica. Otras ventajas adicionales son la magnífica flexibilidad en frío, la buena resistencia al ozono y las notables propiedades dieléctricas. La permeabilidad a los gases es peor que la de otros elastómeros. La temperatura de utilización se encuentra entre -60 °C y +250 °C.

NBR – elastómero de acrilonitrilo-butadieno

La sigla NBR proviene de Nitrile Butadiene Rubber. NBR es el material utilizado con mayor frecuencia en la técnica de juntas a su buena resistencia contra la mayoría de aceites y grasas con base de aceite mineral. El rango de utilización térmica se encuentra normalmente entre -30 °C y +100 °C, durante períodos breves hasta +130 °C; a temperaturas más elevadas se endurece el material. Además, NBR presenta un favorable comportamiento respecto al envejecimiento y un rozamiento reducido.

NBR es resistente a los aceites hidráulicos, glicoles de agua y aceite en emulsiones acuosas, aceites minerales y productos derivados de los mismos, aceites animales y vegetales, gasolina, gasóleo de calefacción, agua hasta unos +70 °C, butano, propano, metano, etano. NBR es fuertemente expansivo en presencia de hidrocarburos aromáticos, por ejemplo, benzol, hidrocarburos clorados (por ejemplo, tricloroetileno), ésteres, disolventes polares como acetona, así como líquidos de frenos sobre base de éteres glicólicos.

NBR – LT

NBR-LT (Low Temperature) posee las mismas resistencias y propiedades que NBR en un rango de aplicación térmica de -50 °C a +100 °C.

Einleitung zur Beständigkeitstabelle

Im Sinne der Zuverlässigkeit und Langlebigkeit von EXMAR Produkten erfordert der Umgang mit flüssigen oder gasförmigen Fluiden eine hohe Sorgfalt bei der Auswahl der Werkstoffe, die mit den Fluiden in Kontakt kommen. Dieses gilt insbesondere für aggressive Fluide. Die nachfolgende Tabelle zur chemischen Beständigkeit von Elastomeren, Kunststoffen und Metallen für eine Vielzahl gasförmiger und flüssiger Medien soll die Auswahl geeigneter Materialien beim Einsatz von EXMAR Produkten erleichtern.

Die chemische Beständigkeit der bei EXMAR verwendeten Werkstoffe ist abhängig von vielen Faktoren. Hierzu gehören u.a. die Temperatur des Mediums, der Verschmutzungsgrad des Mediums, Beimengungen unerwünschter Begleitstoffe (z.B. Wasserspuren in gasförmigem SO₂), die Konzentration des Mediums, die gleichzeitige Einwirkung mechanischer Kräfte wie statische oder dynamische Belastung sowie die Konstruktionsmerkmale des Produktes.

All diese Faktoren beeinflussen in der Praxis z.B. das Korrosionsverhalten der metallischen sowie die chemische Beständigkeit der polymeren Werkstoffe. Die in den Beständigkeitstabellen getroffenen Angaben können daher nicht alle Betriebsbedingungen und Anwendungsfälle, wie sie im praktischen Gebrauch von EXMAR Produkten auftreten, berücksichtigen.

Daher stellen die in den Beständigkeitstabellen gemachten Angaben lediglich Empfehlungen dar, für die wir jedoch keine Haftung übernehmen können. Aus den Angaben können weder Gewährleistungsansprüche noch Garantieforderungen abgeleitet werden. Die einsatzspezifische Auswahl der Werkstoffe, die Anwendung, Verwendung und Verarbeitung der bezogenen Produkte liegen ausschliesslich im Verantwortungsbereich des Kunden/Anwenders. Es empfiehlt sich im Zweifelsfall, unsere Produkte – u.U. auch mit unterschiedlichen Werkstoffkombinationen – versuchsweise einzubauen, um deren Verhalten bei realen Betriebsbedingungen prüfen zu können.

Introduction to the resistance table

For the optimal reliability and durability of EXMAR products in applications with liquid or gaseous media, it is essential to exercise extreme care when selecting the materials that come into contact with the media. This is especially true for aggressive liquids. The following table on the chemical resistance of elastomers, plastics and metals to numerous gaseous and liquid media is intended to assist EXMAR customers in the selection of suitable materials for their applications.

The chemical resistance of materials used by EXMAR depends on many factors, such as the temperature of the medium, the degree of contamination of the medium, the admixture of unwanted impurities (e.g. traces of water in gaseous SO₂), the concentration of the medium, the simultaneous effect of mechanical forces, e.g. static or dynamic stress, as well as the design characteristics of the product.

In practice, all these factors can influence, for example, the corrosion behaviour, the metallic and chemical resistance of polymer materials. The data contained in the chemical resistance tables cannot, therefore, cover all the working conditions and applications which you will meet in your daily use of EXMAR products.

For this reason, the information given in the chemical resistance tables should only be considered recommendations for which we assume no liability. No warranty claims or guarantees can be inferred from this information. The application-specific selection of materials, use, implementation and processing of purchased products lies solely within the scope of responsibility of the customer/user. If there is any doubt, we recommend installing our products - if indicated, in a variety of material combinations - in test installations to be able to determine their behaviour under real operating conditions.

Introducción a la tabla de resistencias

Con respecto a la fiabilidad y duración de los productos EXMAR, el manejo de fluidos líquidos o gaseosos exige extremar las precauciones en la elección de los materiales que entrarán en contacto con los fluidos. Esto es aplicable especialmente a los fluidos agresivos. La siguiente tabla contiene la resistencia química de elastómeros, plásticos y metales respecto a numerosos medios fluidos y gaseosos y pretende facilitar la elección de los materiales adecuados a la hora de utilizar productos EXMAR.

La resistencia química de los materiales utilizados en EXMAR depende de muchos factores. Esto incluye, entre otros, la temperatura del medio, el grado de suciedad del medio, mezclas de sustancias acompañantes no deseadas (p. ej., trazas de agua en SO₂ gaseoso), la concentración del medio, la acción simultánea de fuerzas mecánicas como cargas estáticas o dinámicas, y las características constructivas del producto.

En la práctica, todos estos factores influyen, p. ej., en la resistencia a la corrosión de los metales y la resistencia química de los polímeros. Por tanto, los datos que figuran en las tablas de resistencias no pueden tener en cuenta todas las condiciones de servicio y todos los casos de aplicación relacionados con la utilización práctica de productos EXMAR.

En consecuencia, los datos contenidos en las tablas de resistencias representan solamente recomendaciones de las que, sin embargo, no podemos responsabilizarnos. Del mismo modo, no pueden deducirse reclamaciones o derechos de garantía de los datos ofrecidos. La selección de los materiales en función de la finalidad, así como la aplicación, utilización y procesamiento de los productos adquiridos son responsabilidad exclusiva del cliente/usuario. En caso de duda, se recomienda montar nuestros productos y probar, en su caso, diferentes combinaciones de materiales para poder ensayar su comportamiento en condiciones de servicio reales.

Aufbau und Inhalt der Beständigkeitstabellen

Die Beständigkeitstabelle umfasst drei Bereiche chemischer Flüssigkeiten und Gase. Diese sind Grundchemikalien, Handelsprodukte sowie Lebensmittel. In einzelnen wurde die Beständigkeit dieser Fluide auf bei EXMAR häufig eingesetzte elastomere Werkstoffe, Kunststoffe sowie Metalle und Legierungen klassifiziert. Informationen zu der chemischen Beständigkeit der in den Beständigkeitstabellen nicht aufgeführten Materialien sind auf Anfrage erhältlich.

Für die gebräuchlichsten chemischen Substanzen findet sich in den Tabellen zum besseren Verständnis eine chemische Formel (Linienformel). Mit dem Zusatz „rein“ hinter der chemischen Bezeichnung des Mediums ist technische Reinheit gemeint, die in den meisten Fällen weit über 95% Wirkstoffgehalt liegt. In der Regel tragen organische flüssige oder gasförmige Substanzen diesen Zusatz. So bedeutet z.B. „Essigsäure - rein“, dass es sich um mindestens 98%-ige Essigsäure handelt. Der Zusatz „wässrig“ wird meistens in Verbindung von mit Wasser mischbaren Substanzen (z.B. Ethanol) oder aber für wässrige Lösungen anorganischer Salze verwendet. Wegen der Vielzahl verschiedener möglicher Konzentrationen werden generell mittlere Konzentrationen angenommen. Nur wenn es ausdrücklich vermerkt ist, handelt es sich dabei um gesättigte wässrige Lösungen.

Die Bezugstemperatur für die jeweils angegebene chemische Beständigkeit ist in jedem Falle Raumtemperatur. Bei höheren Temperaturen muss bei Kunststoffen und Elastomeren mit einer wärmebedingt schlechteren Beständigkeit gerechnet werden.

Zeichenerklärung

- + geringe oder keine Beeinträchtigung des Materials, beständig
- o schwacher bis mässiger Angriff, bedingt beständig
- starker Angriff bis vollständige Zerstörung, unbeständig

Bei der Einstufung eines Materials als bedingt beständig ist vor allem die Zeit der Einwirkung zu berücksichtigen. Bei langer Einwirkungsdauer kann es häufig zu einem starken Angriff bzw. zur vollständigen Zerstörung des Materials kommen. Dieses wirkt sich dann u.U. auf die Einsatzdauer der verwendeten Teile aus. Aus diesem Grunde sind diese Teile auch als Verschleißteile einzustufen, für die hinsichtlich des möglichen Verschleißes keine Garantie übernommen werden kann.

Häufig können aufgrund unterschiedlicher Betriebsbedingungen keine eindeutigen Angaben gemacht werden. Auch in diesem Falle wird das Zeichen "o" verwendet für bedingt beständig.

Quellennachweis

Sämtliche Angaben der Beständigkeitstabellen stützen sich auf Erfahrungswerte der Industrie und auf Daten der Werkstoffhersteller (Quellen: www.buerkert.ch, www.buerkle.de).

Layout and content of the resistance table

The resistance table comprises three types of chemical liquids and gases: basic chemicals, trade products as well as foodstuffs. Specifically, the resistance of these fluids has been classified for the elastomer materials, plastics, metals and alloys frequently used in EXMAR products. Information on the chemical resistance of materials not listed in the tables is available on request.

A chemical formula for the most common substances has been included in the tables. The word „pure“ added to the chemical denomination of the medium refers to technical purity, which in most cases exceeds an active substance content of 95%. Organic liquid or gaseous substances generally bear this term. So, for example, „acetic acid - pure“ means that this is at least a 98% acetic acid. The word „aqueous“ is usually used in combination with substances that are miscible with water (e.g. ethanol) or for aqueous solutions of inorganic salts as well. Due to the diversity of the different concentrations possible, average concentrations are generally assumed. Only when it is explicitly mentioned does it concern a saturated aqueous solution.

The reference temperature for the respective chemical resistance indicated is always room temperature. At elevated temperatures, a poorer heat-related resistance must be expected for plastics and elastomers.

Signs and symbols

- + little or no damage to the material, resistant
- o slight to moderate attack, conditionally resistant
- strong attack to complete destruction, not resistant

If a material is classified as conditionally resistant, the amount of exposure time must be taken into account. For longer periods of exposure, the intensity of the attack is often greater, often resulting in complete destruction of the material. This can under certain circumstances have an effect on the service life of the respective part. This is why these parts are categorised as wearing parts, for which no guarantee can be given regarding the possibility of wear and tear.

Explicit statements are frequently not possible due to the varying operating conditions. In such cases, the "o" symbol for conditionally resistant is also used.

References

All the information contained in the resistance tables is based on empirical values of industry and on the data from material manufacturers (sources: www.buerkert.ch, www.buerkle.de).

Estructura y contenido de las tablas de resistencias

La tabla de resistencias engloba tres sectores de líquidos y gases químicos, a saber: sustancias químicas básicas, productos comerciales y alimentos. Se ha clasificado específicamente la resistencia a estos fluidos de los materiales elastoméricos, plásticos, metales y aleaciones más utilizados en EXMAR. La información sobre la resistencia química de los materiales que no aparecen en las tablas puede enviarse a petición del cliente.

Las tablas contienen una fórmula química (fórmula lineal) de las sustancias químicas más usuales para su mejor comprensión. El suplemento "puro" después de la denominación química del medio se refiere a la pureza técnica, que en la mayoría de los casos se sitúa muy por encima del 95% en contenido de principio activo. Generalmente llevan este suplemento las sustancias orgánicas líquidas o gaseosas. La expresión "ácido acético puro" significa, por ejemplo, que se trata por lo menos de ácido acético al 98%. El suplemento "acuoso" se utiliza sobre todo para sustancias miscibles con agua (p. ej., etanol) o para soluciones acuosas de sales inorgánicas. Debido a la infinidad de diferentes concentraciones posibles, se suponen generalmente concentraciones medias. Solamente si se hace mención expresa, se trata de soluciones acuosas saturadas.

La temperatura de referencia para la resistencia química indicada en cada caso es siempre la temperatura ambiente. Con temperaturas más altas cabe esperar una reducción de la resistencia de los plásticos y elastómeros por efecto del calor.

Explicación de los símbolos

- + poca o nula influencia en el material, resistente
- o ataque débil a moderado, resistencia condicionada
- ataque intenso a destrucción total, no resistente

A la hora de clasificar un material como de resistencia condicionada debe tenerse en cuenta sobre todo el tiempo de actuación. Con tiempos de actuación largos no es infrecuente que se produzca un ataque intenso o la destrucción completa del material y que esto repercuta en el periodo de uso de las piezas utilizadas. Por esta razón, las piezas utilizadas deben clasificarse también como piezas de desgaste para las que no se aceptan garantías debido precisamente al posible desgaste.

Las diferencias en las condiciones de servicio a menudo impiden emitir datos inequívocos, en cuyo caso se utiliza también el carácter "o" para designar "resistencia condicionada".

Índice de fuentes

Todos los datos de las tablas de resistencias se basan en valores empíricos de la industria y en datos de los fabricantes de los materiales (fuentes: www.buerkert.ch, www.buerkle.de).

Chemikalien- beständigkeit	Resistance to chemicals	Resistencia a sustancias químicas		FKM	EPDM	PTFE	FFKM	PEEK	POM	NBR	PU	LD-PE	1.4401/1.4571	1.4305/1.4104

Abgase - salzsäurehaltig	Waste gases - containing hydrochloric acid	Gases de escape que contienen ácido clorhídrico		+	+	+	+	o		+		+	o	-
Abgase - schwefeldioxidhaltig (trocken)	Waste gases - containing sulphur dioxide (dry)	Gases de escape que contienen dióxido de azufre (seco)		+	+	+	+	+		o		+	+	+
Abgase - schwefelsäurehaltig - (Schwefeltrioxid feucht)	Waste gases - containing sulphuric acid - (sulphur trioxide moist)	Gases de escape que contienen ácido sulfúrico (trioxido de azufre húmedo)		+	+	+	+	-		o		+	+	o
Abgase - schwefeltrioxidhaltig (trocken)	Waste gases - containing sulphur trioxide (dry)	Gases de escape que contienen trióxido de azufre (seco)		+	+	+	+	+		o		+	+	+
Acetaldehyd - rein	Acetaldehyde - pure	Acetaldehído puro	CH ₃ CHO	o	+	+	+	+	+	-	+	o	+	+
Acetessigester (säurefrei, rein)	Ethyl acetoacetate (acid-free, pure)	Éster acetoacético (libre de ácidos, puro)	CH ₃ COCH ₂ CO ₂ C ₂ H ₅	-	-	+	+			-			+	+
Aceton - rein	Acetone - pure	Acetona - pura	CH ₃ COCH ₃	-	+	+	+	+	+	-	-	o	+	+
Acetophenon - rein	Acetophenone - pure	Acetofenona - pura	C ₆ H ₅ COCH ₃	-		+	+		+	-		+	+	+
Acetylaceton - rein	Acetyl acetone - pure	Acetilacetona - pura	CH ₃ COCH ₂ COCH ₃	-	-	+	+			-			+	+
Acetylchlorid - rein	Acetyl chloride - pure	Acetil cloruro - puro	CH ₃ COCl	-	-	+	+		-	-		+	o	o
Acetylen - rein	Acetylene - pure	Acetileno - puro	HCCH	-	+	+	+	+	+	-	+	+	+	+
Acronaldispersionen (Polyacrylsäureester für Klebstoffe)	Acronal dispersion (polyacrylate for adhesives)	Dispersiones Acronal (éster del ácido poliacrílico para adhesivos)		+	+	+				-			+	+
Acronallösungen	Acronal solutions	Soluciones Acronal		-	o	+				-			+	+
Acrylnitril - rein	Acrylonitrile - pure	Acrlonitrilo - puro	CH ₂ CHCN	-	-	+	+	+		-	-	o	+	+
Acrylsäureethylester - rein	Ethyl acrylate - pure	Éster etílico del ácido acrílico - puro	CH ₂ CHCOOC ₂ H ₅	-	o	+	+			-	-		+	+
Adipinsäure - wässrig	Adipic acid - aqueous	Ácido adipínico - acuoso	HO ₂ C(CH ₂) ₄ CO ₂ H	+	+	+	+		+	+		+	+	+
Akkusäure (20 %-ige Schwefelsäure, wässrig)	Battery acid (20 % sulphuric acid, aqueous)	Ácido de batería (ácido sulfúrico 20 %, acuoso)	H ₂ SO ₄	+	+	+	+	o	-	o		+	+	o
Alaun (KaliumAluminiumsulfat) - wässrig	Alum (potassium aluminium sulphate) - aqueous	Alumbre (sulfato de aluminio y potasio) acuoso	KAl(SO ₄) ₂ * 12H ₂ O	+	+	+	+	+	o	+	+	+	+	o
Albumin - rein	Albumin - pure	Albúmina - pura		+	+	+				+			+	+
Allylalkohol - rein	Allyl alcohol - pure	Alcohol alílico - puro	CH ₂ CHCH ₂ OH	-	+	+	+	+		+		-	+	+
Aluminiumacetat - wässrig	Aluminium acetate - aqueous	Acetato de aluminio - acuoso	Al(OOCCH ₃) ₃	+	+	+	+		+	o		+	+	+
Aluminiumchlorid - wässrig	Aluminium chloride - aqueous	Cloruro de aluminio - acuoso	AlCl ₃	+	+	+	+	+	-	+	o	+	o	o
Aluminiumfluorid - wässrig	Aluminium fluoride - aqueous	Fluoruro de aluminio - acuoso	AlF ₃	+	+	+	+		o	+		+	-	-
Aluminiumsulfat - wässrig	Aluminium sulphate - aqueous	Sulfato de aluminio - acuoso	Al ₂ (SO ₄) ₃	+	+	+	+	+	o	+		+	o	o
Ameisensäure - rein	Formic acid - pure	Ácido fórmico - puro	HCO ₂ H	-	o	+	o	o	-	-	-	+	+	-
Ameisensäure - wässrig	Formic acid - aqueous	Ácido fórmico - acuoso	HCO ₂ H	-	o	+	-	+	o	-	-	+	+	o
Aminoessigsäure (Glykokoll)	Amino acetic acid (glycocol)	Ácido aminoacético (glicocol)	NH ₂ CH ₂ COOH	+	+	+			+	o		+	+	+
Ammoniak (flüssig) - rein	Ammonia (liquid) - pure	Amoniaco (líquido) - puro	NH ₃	-	2o	+	o	+	+	-	-	+	+	+
Ammoniak (gasförmig) - rein	Ammonia (gaseous) - pure	Amoniaco (gaseoso) - puro	NH ₃	-	+	+	o	+	+	-	-	+	+	+
Ammoniak-Wasser (Salmiakgeist)	Ammonium hydroxide (spirits of ammonia)	Amoniaco-agua (solución acuosa de amoniaco)	NH ₄ OH	-	+	+	o	+	+	-	-	+	+	+
Ammoniumacetat - wässrig	Ammonium acetate - aqueous	Acetato de amonio - acuoso	CH ₃ COONH ₄	+	+	+	+			+		+	+	+
Ammoniumcarbonat - wässrig	Ammonium carbonate - aqueous	Carbonato de amonio - acuoso	(NH ₄) ₂ CO ₃	+	+	+	+			+	-	+	+	+
Ammoniumchlorid - wässrig	Ammonium chloride - aqueous	Cloruro de amonio - acuoso	NH ₄ Cl	+	+	+	+	+	+	+	-	+	o	o
Ammoniumcitrat - wässrig	Ammonium citrate - aqueous	Citrato de amonio - acuoso		+	+	+	+			+			+	+
Ammoniumfluorsilikat - wässrig	Ammonium fluosilicate - aqueous	Fluorosilicato de amonio - acuoso		+	+	+	+			+			+	+
Ammoniumfluorid - wässrig	Ammonium fluoride - aqueous	Fluoruro de amonio - acuoso	NH ₄ F	+	+	+	o			+		+	o	o
Ammoniumformiat - wässrig	Ammonium formate - aqueous	Formiato de amonio - acuoso	HNCOONH ₄	+	+	+	+			+			+	+
Ammoniumnitrat - wässrig	Ammonium nitrate - aqueous	Nitrato de amonio - acuoso	NH ₄ NO ₃	+	+	+	+	+		+	+	+	+	+
Ammoniumoxalat - wässrig	Ammonium oxalate - aqueous	Oxalato de amonio - acuoso	NH ₄ O ₂ CCO ₂ NH ₄	+	+	+	+			+		+	+	+
Ammoniumpersulfat - wässrig	Ammonium persulphate - aqueous	Persulfato de amonio - acuoso	(NH ₄) ₂ S ₂ O ₈	+	+	+	+			-	+	+	o	o
Ammoniumphosphat - wässrig	Ammonium phosphate - aqueous	Fosfato de amonio - acuoso	(NH ₄) ₂ HPO ₄	+	+	+	+			+	+	+	+	+
Ammoniumthiocyanat - wässrig	Ammonium thiocyanate - aqueous	Tiocianato de amonio - acuoso	NH ₄ NCS	+	+	+			+	+		+		
Ammoniumsulfat - wässrig	Ammonium sulphate - aqueous	Sulfato de amonio - acuoso	(NH ₄) ₂ SO ₄	+	+	+	+	+	+	+	+	+	o	o
Ammoniumsulfid - wässrig	Ammonium sulphide - aqueous	Sulfuro de amonio - acuoso	(NH ₄) ₂ S	o	+	+	+			+		+	+	+
Ammoniumsulfit - wässrig	Ammonium sulphite - aqueous	Sulfito de amonio - acuoso	(NH ₄) ₂ SO ₃	+	+	+	+			+			+	o
Amylacetat - rein	Amyl acetate - pure	Acetato de amilo - puro	CH ₃ COO(CH ₂) ₄ CH ₃	-	o	+	+	+		-	-	o	+	+
Amylalkohol - rein	Amyl alcohol - pure	Alcohol amílico - puro	H ₃ C(CH ₂) ₄ OH	+	o	+	+			+	+	+	+	+
Ananassaft	Pineapple juice	Zumo de piña				+						+	+	+
Anilin - rein	Aniline - pure	Anilina - pura	C ₆ H ₅ NH ₂	o	+	+	o	+	+	-	-	o	+	+
Anilinhydrochlorid - wässrig	Aniline hydrochloride - aqueous	Clorhidrato de anilina - acuoso	C ₆ H ₅ NH ₃ Cl	3o	+	+	+			o		-	-	
Anisöl	Anis seed oil	Aceite de anís				+				o			+	+
Anisöl - rein	Anis seed oil - pure	Anisöl - puro	C ₆ H ₅ OCH ₃	-	o	+	+			o	-	-	+	+
Anon (Cyclohexanon) - rein	Anon (cyclohexanone) - pure	Anona (ciclohexanona) - pura	C ₆ H ₁₀ O	-	-	+	+	+		-	-	-	+	+
Anthracenöl - rein	Anthracene oil - pure	Aceite de antraceno - puro		-	-	+	+			-			+	+

Chemikalien- beständigkeit	Resistance to chemicals	Resistencia a sustancias químicas		FKM	EPDM	PTFE	FFKM	PEEK	POM	NBR	PU	LD-PE	1.4401/1.4571	1.4305/1.4104
Anthrachinonsulfonsäure - wässrig	Anthraquinone sulphonic acid - aqueous	Ácido sulfónico antraquinono - acuoso	$C_6H_4COCOC_6H_4SO_3H$	+	+	+	+			o			o	o
Antifrogen-N	Antifrogen-N	Antifrogen-N		+	+	+				+			+	+
Antimonchlorid - wässrig	Antimony chloride - aqueous	Cloruro de antimonio - acuoso	$SbCl_3$	3+	+	+	+	+		o	+	+	-	-
Apfelsaft, Apfelsmus	Apple juice, Applesauce	Zumo de manzana, puré de manzana				+		+				+	+	+
Apfelsäure - wässrig	Malic acid - aqueous	Ácido málico - acuoso	$(HO)CH(COOH)CH_2COOH$	+	+	+	+			+	o		+	+
Apfelsinensaft	Orange juice	Zumo de naranja				+						+		+
Apfelwein	Cider	Sidra		+	+	+				+			+	+
Aprikosensaft	Apricot juice	Zumo de albaricoque				+							+	+
Arabinsäure - wässrig	Arabic acid - aqueous	Ácido arábico - acuoso		+	+	+	+			+			+	+
Argon - rein	Argon - pure	Argón - puro	Ar	+	+	+	+	+		+	+		+	+
Arsenige Säure - wässrig	Arsenious acid - aqueous	Ácido arsenioso - acuoso	$H_3AsO_3 (As_2O_3+H_2O)$	+	+	+	+			-	+	o	+	+
Arsensäure - wässrig	Arsenic acid - aqueous	Ácido arsénico - acuoso	H_3AsO_4	+	+	+	+			-	+	o	+	+
Arsenichlorid - wässrig	Arsenic trichloride - aqueous	Tricloruro de arsénico - acuoso	$AsCl_3$	+	+	+	+			+			o	o
Arylsilikate - wässrig	Aryl silicates - aqueous	Aryl silicatos - acuosos		o	o	+	+			o			+	+
Ascorbinsäure - wässrig	Ascorbic acid - aqueous	Ácido ascórbico - acuoso		+	+	+	+			+		+		
Asparginsäure - wässrig	Aspartic acid - aqueous	Ácido aspártico - acuoso	$(HOOC)CH(NH_2)CH_2COOH$	+	+	+	+			+			+	+
ASTM-Kraftstoff A	ASTM fuel A	Combustible ASTM A		o	-	+	+			o			+	+
ASTM-Kraftstoff B	ASTM fuel B	Combustible ASTM B		o	-	+	+			o			+	+
ASTM-Kraftstoff C	ASTM fuel C	Combustible ASTM C		o	-	+	+			o			+	+
ASTM-Öl Nr. 1	ASTM oil no. 1	Aceite ASTM n.º 1		+	-	+	+			+			+	+
ASTM-Öl Nr. 2	ASTM oil no. 2	Aceite ASTM n.º 2		+	-	+	+			o			+	+
ASTM-Öl Nr. 3	ASTM oil no. 3	Aceite ASTM n.º 3		o	-	+	+			o			+	+
ATE-Bremsflüssigkeit	ATE brake fluid	Líquido de frenos ATE		-	+	+	+	+		-			+	+
Ätherische Öle	Essential oils	Aceites esenciales		-	-	+	+			-		-	+	+
Bariumchlorat - wässrig	Cottonseed oil	Clorato de bario - acuoso	$Ba(ClO_3)_2$	+	+	+	+			+			+	+
Bariumchlorid - wässrig	Barium chloride - aqueous	Cloruro de bario - acuoso	$BaCl_2$	+	+	+	+	+		+	+	+	+	o
Bariumhydroxid - wässrig	Barium hydroxide - aqueous	Hidróxido de bario - acuoso	$Ba(OH)_2$	+	+	+	+			+	+	+	+	+
Bariumsulfid und -polysulfid, wässrig	Barium sulphide and polysulphide, aqueous	Sulfuro y polisulfuro de bario, acuoso	BaS	+	+	+	+	+		+	+	+	+	+
Baumwollsaamenöl	Cottonseed oil	Aceite de semillas de algodón		o	-	+	+			o			+	+
Benzaldehyd - wässrig	Benzaldehyde - aqueous	Benzaldehído - acuoso	C_6H_5CHO	+	+	+	+	+	+	o	o	o	+	+
Benzidinsulfonsäuren - wässrig	Benzidine sulphonic acids - aqueous	Ácidos bencidin sulfónicos - acuosos	$(NH_2)_2C_6H_4C_6H_4(SO_3H)(NH_2)$	+	+	+	+			+			+	+
Benzin (Hexan) - rein	Gasoline (hexane) - pure	Gasolina (hexano) - pura	C_6H_{14}	+	-	+	+	+	+	o		-	+	+
Benzin-Benzol-Spiritus - (Superkraftstoff-Methanol-Gemisch)	Gasoline-benzene alcohol (premium gasoline/methanol mixture)	Gasolina-benceno-alcohol - (mezcla de combustible súper/metanol)		o	-	+	+	+		-			+	+
Benzoessäure - wässrig	Benzoic acid - aqueous	Ácido benzoico - acuoso	C_6H_5COOH	+	+	+	+	+	+	+		-	+	+
Benzol - rein	Benzene - pure	Benceno - puro	C_6H_6	+	-	+	+	+	+	+		-	o	+
Benzolsulfonsäure - wässrig	Benzene sulphonic acid - aqueous	Ácido benceno sulfónico - acuoso	$C_6H_5SO_3H$	+	+	+	+	-		+		+	+	+
Benzylalkohol - rein	Benzyl alcohol - pure	Alcohol bencílico - puro	$C_6H_5CH_2OH$	o	+	+	+	+	+	-	-	-	+	+
Benzylbutylphthalat - wässrig	Benzyl butyl phthalate - aqueous	Ftalato de bencil-butilo - acuoso		-	-	+	+			-			+	+
Bergamottöl	Bergamot oil	Aceite de bergamota		-	-	+	+			-			+	+
Bernsteinsäure - wässrig	Succinic acid - aqueous	Ácido succínico - acuoso	$HOOCCH_2CH_2COOH$	+	+	+	+			o	+		+	+
Bienenwachs	Beeswax	Cera de abejas		+	+	+				+	+		+	+
Bier	Beer	Cerveza		+	+	+				+	+		+	+
Bisulfit (Natriumbisulfit) - wässrig	bisulphite (sodium hydrogen sulphite) - aqueous	Bisulfito (bisulfito de sodio) - acuoso	$NaHSO_3$	o	+	+	+	+		o			+	o
Blausäure - wässrig	Hydrocyanic acid - aqueous	Ácido cianhídrico - acuoso	HCN	+	o	+	+			-	o	+	+	o
Bleiacetat - wässrig	Lead acetate - aqueous	Acetato de plomo - acuoso	$Pb(CH_3COO)_2$	+	+	+	+	+	+	o	+	+	+	+
Bleichlauge (Natriumhypochlorit)	Bleaching lye (sodium hypochlorite)	Agente blanqueante (hipoclorito de sodio)		o	+	+	+	+		-	-	o	o	o
Bleinitrat - wässrig	Lead nitrate - aqueous	Nitrato de plomo - acuoso	$Pb(NO_3)_2$	+	+	+	+			+			+	+
Bleitetraethyl (Tetraethylblei) - rein	Lead tetraethyl (tetraethyl lead) - pure	Tetraetilo de plomo (plomo tetraetilo) - puro	$Pb(CH_2CH_3)_4$	+	o	+	+			o			+	+
Bohröle (Schneidöle)	Drilling oils (cutting oils)	Aceites de perforación (aceites de corte)		o	-	+	+			o			+	+
Borax - wässrig	Borax - aqueous	Bórax - acuoso	$Na_2B_4O_7$	+	+	+	+			+	+		+	+
Borfluorwasserstoffsäure (Fluorborssäure)	Borofluoric acid (fluoboric acid)	Ácido borofluorhídrico (ácido fluorobórico)	$HFbF_4$	+	+	+	o			+	-		-	-
Borsäure - wässrig	Boric acid - aqueous	Ácido bórico - acuoso	H_3BO_3	+	+	+	+	o	+	+	+	+	+	+
Bremsflüssigkeit (ATE-Bremsflüssigkeiten)	Braking fluid (ATE braking fluids)	Líquido de frenos (líquidos de frenos ATE)		-	+	+	+	+		-			+	+
Brom (flüssig) - rein	Bromine (liquid) - pure	Bromo (líquido) - puro	Br_2	-	-	+	+	-	-	-	-	o	o	o
Bromwasserstoffsäure (wässrig)	Hydrobromic acid - aqueous	Ácido bromhídrico (acuoso)	HBr	+	+	+	+	-	-	-	-	o	-	-
Butadien (gasförmig) - rein	Butadiene (gaseous) - pure	Butadieno (gaseoso) - puro	$CH_2=CHCH=CH_2$	o	o	+	+			o	o	-	+	+
Butan (gasförmig und flüssig)	Butane (gaseous and liquid)	Butano (gaseoso o líquido)	C_4H_{10}	+	-	+	+	+	+	+	+	+	+	+
Butandiol - wässrig (10 %)	Butylene ether glycol - aqueous (10 %)	Butanodiol - acuoso (10 %)	$HO(CH_2)_4OH$	o	+	+	o	+	+	+			+	+
Butanol (Butylalkohol) - rein	Butanol (butyl alcohol) - pure	Butanol (alcohol butílico) - puro	C_4H_9OH	+	+	+	+	+	+	o	o	o	+	+
Butindiol - rein	Butyne diol - pure	Butinodiol - puro	$HOCH_2C_2CH_2OH$	o	o	+	+			o			o	+

Chemikalien- beständigkeit	Resistance to chemicals	Resistencia a sustancias químicas		FKM	EPDM	PTFE	FFKM	PEEK	POM	NBR	PU	LD-PE	1.4401/1.4571	1.4305/1.4104
Butoxyl (Methoxybutylacetat) - rein	Butoxyl (methoxybutyl acetate) - pure	Butoxilo (acetato de metoxibutila) - puro	$\text{CH}_3\text{OC}_4\text{H}_9\text{O}_2\text{CCH}_3$	o	o	+				+			+	+
Butter	Butter	Mantequilla		+	+	+				+	+	+	+	+
Buttermilch	Buttermilk	Suero de mantequilla		+	+	+				+			+	+
Buttersäure - wässrig	Butyric acid - aqueous	Ácido butírico - acuoso	$\text{H}_3\text{CCH}_2\text{CH}_2\text{COOH}$	o	o	+	o	+	-	o	-	-	+	o
Butylacetat - rein	Butyl acetate - pure	Acetato de butilo - puro	$\text{CH}_3(\text{CH}_2)_3\text{O}_2\text{CCH}_3$	-	+	+	+	+		-	-		+	+
Butylalkohol (Butanol) - rein	Butyl alcohol (butanol) - pure	Alcohol butílico (butanol) - puro	$\text{CH}_3(\text{CH}_2)_3\text{OH}$	+	+	+	+	+		o	o	o	+	+

Butylphthalat - rein	Butyl phthalate - pure	Ftalato de butilo - puro	$\text{C}_6\text{H}_4(\text{CO})_2(\text{OCH}_2\text{CH}_2\text{CH}_2\text{CH}_2\text{O})_2$	-	-	+	+			-			+	+
Calciumbisulfit - wässrig	Calcium bisulphite - aqueous	Bisulfito de calcio - acuoso	$\text{Ca}(\text{HSO}_3)_2$	+	+	+	+	+	-	+	o	+	+	o
Calciumchlorid - wässrig	Calcium chloride - aqueous	Cloruro de calcio - acuoso	CaCl_2	+	+	+	+	+		+	+	+	o	o
Calciumhydroxid (Kalkmilch) - wässrig	Calcium hydroxide (lime-milk) - aqueous	Hidróxido de calcio (lechada de cal) - acuoso	$\text{Ca}(\text{OH})_2$	+	+	+	+	+	+	+	o	+	+	+
Calciumhypochlorit (Chlorkalk) - wässrig	Calcium hypochlorite (chlorinated lime) - aqueous	Hipoclorito de calcio (cloruro de cal) - acuoso	$\text{Ca}(\text{OCl})_2$	o	+	+	+	+	+	-	-	+	o	o
Calciumnitrat - wässrig	Calcium nitrate - aqueous	Nitrato de calcio - acuoso	$\text{Ca}(\text{NO}_3)_2$	+	+	+	+	+		+	+	+	o	o
Carbolinum (Teeröl, Pflanzenschutzmittel)	Carbolinum (creosote; pesticide)	Carbolino (creosota, plaguicidas)		o	o	+	+		+	o		+	+	+
Carbolsäure (Phenol) - wässrig	Carbolic acid (phenol) - aqueous	Ácido carbólico (fenol) - acuoso	$\text{C}_6\text{H}_5\text{OH}$	o	o	+	+	+		o	-	+	+	+
Caro'sche Säure - wässrig	Caro's acid - aqueous	Ácido de Caro - acuoso	H_2SO_5	-	-	+				-			-	-
Cellosolve (Glykoethylether) - rein	Cellosolve (glycol ethyl ether) - pure	Cellosolve (etil glicol éter) - puro	$\text{HO}(\text{CH}_2)_2\text{OCH}_2\text{CH}_3$	-	-	+	+		+	-	-		+	+
Celluloselacke	Cellulose lacquers	Pinturas celulósicas		-	o	+	+			-			+	+
Champheröl - rein	Camphor oil - pure	Aceite de alcanfor - puro		+	-	+	o			+			+	+
Chlophene (Chlordiphenyl)	Chlophene (chlorobiphenyl)	Clófeno (clorodifenilo)		+	o	+				+			+	+
Chlor (flüssig) - rein	Chlorine (liquid) - pure	Cloro (líquido) - puro	Cl_2	o	-	+	+	-	-	-	-	-	+	+
Chlor (gasförmig) - feucht (Chlorwasser)	Chlorine (gaseous) - wet (chlorine water)	Cloro (gaseoso) - húmedo (agua de cloro)	Cl_2	o	-	+	o	-	-	-	-	-	-	-
Chlor (gasförmig) - trocken	Chlorine (gaseous) - dry	Cloro (gaseoso) - seco	Cl_2	o	-	+	+	+		-	-	-	+	-
Chloralhydrat (Chloral) - wässrig	Chloral hydrate (chloral) - aqueous	Hidrato de cloral (cloral) - acuoso	$\text{CCl}_3\text{CH}(\text{OH})_2$	o	o	+	+			-	-	o	o	o
Chlorbenzole - rein	Chlorobenzene - pure	Clorobenceno - puro	$\text{C}_6\text{H}_5\text{Cl}$	-	-	+	+	+	+	-	o	-	+	+
Chlorbleichlauge (Natriumhypochlorit) - wässrig	Sodium hypochlorite bleach - aqueous	Lejía de cloro blanqueante (hipoclorito de sodio) - acuosa	NaOCl	o	+	+	+	+	-	-		o	o	o
Chlordioxid - wässrig	Chlorine dioxide - aqueous	Dióxido de cloro - acuoso	ClO_2	-	-	+	o			-	-		o	o
Chloressigsäure - wässrig	Chloroacetic acid - aqueous	Ácido cloroacético - acuoso	ClCH_2COOH	-	o	+	+	+	-	-	-	o	o	-
Chlorethanol (Ethylenchlorhydrin) - rein	Chloroethanol (ethylene chlorohydrine) - pure	Cloroetanol (clorhidrina de etileno) - puro	$\text{ClCH}_2\text{CH}_2\text{OH}$	o	-	+	+		o	-			+	+
Chlorkalk (Calciumhypochlorit) - wässrig	Chlorinated lime (calcium hypochlorite) - aqueous	Cloruro de cal (hipoclorito de calcio) - acuoso	$\text{Ca}(\text{OCl})_2$	o	+	+	+	+	-	-	-	+	o	o
Chlormethan (Methylchlorid) - rein	Chloromethane (methyl chloride) - pure	Clorometano (cloruro de metilo) - puro	ClCH_3	o	-	+	+		+	-	-	o	+	+
Chlornaphthalin - rein	Chloronaphthaline - pure	Cloronaftalina - pura	$\text{C}_{10}\text{H}_7\text{Cl}$	o	-	+	+			-			+	+
Chloroform (Trichlormethan) - rein	Chloroform (trichloromethane) - pure	Cloroformo (triclorometano) - puro	CHCl_3	o	-	+	+	+	-	-	-	-	+	+
Chlorphenole - rein	Chlorophenol - pure	Clorofenol - puro	$\text{C}_6\text{H}_4(\text{OH})(\text{Cl})$	-	-	+	+			-			+	+
Chlorphenoxyessigsäure	Chlorophenoxyacetic acid - pure	Ácido clorofenoxiacético	$(\text{OC}_6\text{H}_4)_2\text{CHCOOH}$	+	+	+				+			+	+
Chlorsäure - wässrig	Chloric acid - aqueous	Ácido clórico - acuoso	HClO_3	-	o	+	+			-	-	+	-	-
Chlorsulfonsäure - rein	Chlorosulphonic acid - pure	Ácido clorosulfónico - puro	ClSO_3H	-	-	+	+	-	-	-	-	-	o	o
Chlorwasser (Chlor - feucht)	Chlorine water (chlorine - wet)	Agua de cloro (cloro - húmedo)	Cl_2	o	-	+	o	-	-	-	-	-	-	-
Chlorwasserstoffgas - rein	Hydrogen chloride gas - pure	Cloruro de hidrógeno - puro	HCl	+	o	+	+	+	-	o			+	o
Chlorxylenol - rein	Chlorxylenol - pure	Cloroxileno - puro	$\text{C}_6\text{H}_2(\text{OH})(\text{CH}_3)_2(\text{Cl})$	-	-	+	+			-			+	+
Cholinchlorid - wässrig	Choline chloride - aqueous	Cloruro de colina - acuoso	$[\text{HOCH}_2\text{CH}_2\text{N}(\text{CH}_3)_3]\text{Cl}$	+	+	o	+			+				
Chromalaun - wässrig	Chrome alum - aqueous	Alumbre de cromo - acuosa	$\text{KCr}(\text{SO}_4)_2 \cdot 12\text{H}_2\text{O}$	+	+	+	+			+			o	o
Chromsäure - wässrig	Chromic acid - aqueous	Ácido crómico - acuoso	H_2CrO_4	+	o	+	+	o	-	-	-	+	o	o
Chromsulfat - wässrig	Chromous sulfate - aqueous	Sulfato de cromo - acuoso	$\text{Cr}_2(\text{SO}_4)_3$	+	+	+	+			+			o	o
Citral (Citronellöl) - rein	Citral (citronella oil) - pure	Citral (esencia de citronela) - puro		-	-	+				-			+	+
Cyanalkali (Kaliumcyanid) - wässrig	Potassium cyanide - aqueous	Cianuro potásico - acuoso	KCN	+	+	+	+	+	o	+	o	+	+	+
Cyclanone (Fettalkoholsulfonat)	Cyclanone (fatty alcohol sulphonate)	Cyclanone (sulfonato de alcohol graso)		+	+	+				+	+		+	+
Cyclohexan - rein	Cyclohexane - pure	Ciclohexano - puro	C_6H_{12}	o	-	+	+	+	+	-	-	-	+	+
Cyclohexanol - rein	Cyclohexanol - pure	Ciclohexanol - puro	$\text{C}_6\text{H}_{11}\text{OH}$	+	-	+	+	+	+	-	-	+	+	+
Cyclohexanon (Anon) - rein	Cyclohexanon (Anon) - pure	Ciclohexanona (anon) - pura	$\text{C}_6\text{H}_{10}\text{O}$	-	-	+	+	+	+	-	-	-	+	+
Cymol - rein	Cymene - pure	Cimeno - puro	$\text{C}_6\text{H}_4(\text{CH}_3)[\text{CH}(\text{CH}_3)_2]$	-	-	+				-			+	+
Dekahydronaphthalin (Dekalin) - rein	Decahydronaphthalene (decalin) - pure	Decahidronaftalina (decalina) - pura	$\text{C}_{10}\text{H}_{18}$	+	-	+				-			+	+
Desmodur T	Desmodur T	Desmodur T		+	+	+				+			+	+
Desmophen	Desmophen	Desmophen		+	+	+				+			+	+
Dextrin - wässrig	Dextrin - aqueous	Dextrina - acuosa		+	+	+	+			+	+		+	+
Dextrose (Glukose) - wässrig	Dextrose (glucose) - aqueous	Dextrosa (glucosa) - acuosa	$\text{C}_6\text{H}_{12}\text{O}_6$	+	+	+	+	+	+	+	+	+	+	+
Diacetonalkohol (wasserfrei) - rein	Diacetone alcohol (anhydrous) - pure	Diacetona alcohol anhidro - puro	$(\text{CH}_3)_2\text{C}(\text{OH})\text{CH}_2\text{COCH}_3$	-	+	+	+			+	-	+	+	+
Dibutylphthalat - rein	Dibutyl phthalate - pure	Ftalato de dibutilo - puro	$\text{C}_6\text{H}_4(\text{COOC}_4\text{H}_9)_2$	-	o	+	+			+	-	o	+	+

Kiefernadelöl (Fichtennadelöl)	Pine needle oil	Aceite de aguja de pino (aceite de aguja de picea)		+	-	+	+			o		-	+	+
Kieselfluorwasserstoffsäure (Kieselflussäure) - wässrig	Hydrofluosilicic acid (silicofluoric acid) - aqueous	Ácido fluorosilícico (ácido silícico) - acuoso		o	o	+	+		-	o	-	+	o	o
Knochenöl	Bone oil	Aceite de hueso		+	-	+	+			o				+
Kochsalz (Natriumchlorid)	Salt (sodium chloride)	Sal de cocina (cloruro de sodio)		+	+	+	+	+	+	+		+	o	o
Kochsalz (Natriumchlorid) - wässrig	Salt (sodium chloride) - aqueous	Sal de cocina (cloruro de sodio) - acuosa	NaCl	+	+	+	+	+	+	+	+	+	o	o
Kohlendioxid - feucht	Carbon dioxide - wet	Dióxido de carbono - húmedo	CO ₂	+	+	+	+	+	+	+	+	+	+	+
Kohlendioxid - trocken	Carbon dioxide - dry	Dióxido de carbono - seco	CO ₂	+	+	+	+	+	+	+	+	+	+	+
Kohlenmonoxid (Kohlenoxid)	Carbon monoxide (carbon oxide)	Monóxido de carbono (óxido de carbono)	CO	+	+	+	+	+		+	+			+
Kohlensäure - wässrig	Carbonic acid - wet	Ácido carbónico - acuoso	H ₂ CO ₃	+	+	+	+	+	+	+	+	+	+	+
Kokosnussöl	Coconut oil	Aceite de coco		o	-	+	+	+		o		o	+	+
Königswasser	Aqua regia	Agua regia	HNO ₃ + HCl	-	-	+	+	-	-	-	-	-	-	-
Kresol - wässrig (s. Lysol)	Cresol - aqueous (see Lysol)	Cresol - acuoso (ver lisol)	C ₆ H ₄ (OH)(CH ₃)	o	-	+	+	+	-	-	-	+	o	o
Kupferacetat - wässrig	Acetate of copper - aqueous	Acetato de cobre - acuoso	Cu(CH ₃ COO) ₂	+	+	+	+	+		o		+	+	+
Kupferchlorid - wässrig	Copper chloride - aqueous	Cloruro de cobre - acuoso	CuCl ₂	+	+	+	+	+		+	+		-	-
Kupfersulfat - wässrig	Copper sulphate - aqueous	Sulfatos de cobre - acuosos	CuSO ₄	+	+	+	+	+	+	+	+		o	o
Lachgas (Distickstoffmonoxid, Stickoxydul)	Laughing gas (nitrogen monoxide, nitrous oxide)	Gas hilarante (monóxido de dinitrógeno, óxido nitroso)	N ₂ O	+	+	+	+	+		+	+			+
Lebensmittelfette und -öle	Food greases and oils	Grasas y aceites alimentarios		o	-	+	+	+	+	o				+
Lebertran	Cod liver oil	Aceite de hígado de bacalao		+	o	+	+			o		o	+	+
Leinöl	Linseed oil	Aceite de linaza		o	-	+	+	+	+	o		o	+	+
Leuchtgas (Stadtgas, Ferngas)	Coal gas (town gas, grid gas)	Gas de alumbrado (gas ciudad, gas a distancia)		+	+	+	+			+	o	+	+	+
Linolsäure	Linoleic acid	Ácido linoléico		o	-	+	+			o				+
Lithiumchlorid - wässrig	Lithium chloride - aqueous	Cloruro de litio - acuoso	LiCl	+	+	+	+			+			o	o
Lysol (siehe auch Kresole)	Lysol (see also cresol)	Lisol (véase también cresol)		o	-	+	+	+		-		-	+	o
Magnesiumchlorid - wässrig	Magnesium chloride - aqueous	Cloruro de magnesio - acuoso	MgCl ₂	+	+	+	+	+	+	+	+	+	o	o
Magnesiumsulfat - wässrig	Magnesium sulphate - aqueous	Sulfato de magnesio - acuoso	MgSO ₄	+	+	+	+	+	+	+	+	+	+	+
Maiskeimöl	Corn oil	Aceite de germen de maíz		o	-	+	+	+		o				+
Maleinsäure - wässrig	Maleic acid - aqueous	Ácido maleico - acuoso		+	+	+	+	+		+	-	+	+	o
Manganchlorid - wässrig	Manganese chloride - aqueous	Cloruro de manganeso - acuoso	MnCl ₂	+	+	+	+			+			o	o
Mangansulfat - wässrig	Manganese sulphate - aqueous	Sulfato de manganeso - acuoso	MnSO ₄	+	+	+	+			+				+
Maschinenöl siehe a) Paraffinöle b) Mineralöle; Motorenöle	Machine oil, see a) paraffin oils b) mineral oils; motor oils	Aceite para máquinas, véase a) aceites de parafina b) aceites minerales; aceites de motor		+	-	+	+	+	+	+		o	+	+
Melasse, Melassewürze	Molasses, molasses extract	Melaza, condimento de melaza		+	+	+	+	+	+	+	+	+	+	+
Mercaptane	Mercaptans	Mercaptanos		o	-	+	+			-				+
Mersole (Alkansulfonsäurechloride)	Mersol (alkane sulfochloride)	Mersoles (cloruros de ácido alcanosulfónico)		+	o	+				+			o	o
Methan (Sumpfgas) - rein	Methane (marsh gas) - pure	Metano (gas de los pantanos) - puro	CH ₄	+	-	+	+	+	+	+	o			+
Methanol (Methylalkohol)	Methanol (methyl alcohol)	Metanol (alcohol metílico)	CH ₃ OH	-	+	+	+	+	+	-	o	+	+	+
Methoxybutanol - rein	Methoxybutanol - pure	Metoxibutanol - puro	CH ₃ O(CH ₂) ₃ CH ₂ OH	+	+	+	+			+		o	+	+
Methylacetat - rein	Methyl acetate - pure	Metilacetato - puro	CH ₃ COOCH ₃	-	o	+	+	+	+	-		+	o	o
Methylalkohol (Methanol) - rein	Methyl alcohol (methanol) - pure	Alcohol metílico (metanol) - puro	CH ₃ OH	-	+	+	+	+	+	-	o	+	+	+
Methylamin - wässrig	Methylamine - aqueous	Metilamina - acuosa	CH ₃ NH ₂	o	o	+	-	+	+	-		o	o	o
Methylchlorid (Chlormethan) - rein	Methyl chloride (chloromethane) - pure	Cloruro de metilo (clorometano) - puro	CH ₃ Cl	+	-	+	+	+	+	-	-	o	+	+

Chemikalien- beständigkeit	Resistance to chemicals	Resistencia a sustancias químicas		FKM	EPDM	PTFE	FFKM	PEEK	POM	NBR	PU	LD-PE	1.4401/1.4571	1.4305/1.4104
Methylenchlorid (Dichlormethan) - rein	Methylene chloride (dichloromethane) - pure	Cloruro de metileno (diclorometano) - puro	CH ₂ Cl ₂	o	-	+	+	o	o	-	-	-	+	+
Methylethylketon - rein	Methyl ethyl ketone - pure	Metiletilcetona - pura	CH ₃ COCH ₂ CH ₃	-	o	+	+	o	+	-	-	-	+	+
Milch	Milk	Leche		+	+	+		+	+	+		+	+	+
Milchsäure - wässrig	Lactic acid - aqueous	Ácido láctico - acuoso		+	o	+	+	+	o	o	+	+	o	o
Mineralöle-aromatenfrei (Paraffinöl, Motorenöle)	Mineral oils - free of aromatic compounds (paraffin oils, motor oils)	Aceites minerales sin aromatizantes (aceite de parafina, aceites de motor)		+	-	+	+	+	+	+		o	+	+
Mineralwasser	Mineral water	Agua mineral		+	+	+		+	+	+		+	o	o
Morpholin - rein	Morpholine - pure	Morfolina - pura		o	o	+	o			-		+	+	+
Motorenöle (Mineralöle; Maschinenöle)	Motor oils (mineral oils, machine oils)	Aceites de motor (aceites minerales; aceites para máquinas)		+	-	+	+	+	+	+		o	+	+
Natriumarsenat und Natriumarsenit - rein	Sodium arsenate and sodium arsenite - pure	Arsenatos y arsenitos de sodio - puros	Na ₂ AsO ₄ u. Na ₃ AsO ₃	+	+	+	+			+			+	+
Natriumbenzoat - wässrig	Sodium benzoate - aqueous	Benzoato de sodio - acuoso	C ₆ H ₅ COONa	+	+	+	+		+	+		+	+	+
Natriumbicarbonat - wässrig	Sodium bicarbonate - aqueous	Bicarbonato de sodio - acuoso	NaHCO ₃	+	+	+	+	+	+	+		+	+	+
Natriumbisulfat - wässrig	Sodium bisulphate - aqueous	Bisulfato de sodio - acuoso	NaHSO ₄	+	+	+	+		+	+		+	o	o
Natriumbisulfit - wässrig (Bisulfit)	Sodium bisulphite - aqueous (bisulphite)	Bisulfito de sodio - acuoso (bisulfito)	NaHSO ₃	+	+	+	+	+	-	o		+	+	o
Natriumbromat - wässrig	Sodium bromate - aqueous	Bromato de sodio - acuoso	NaBrO ₃	+	+	+	+	+	+	+		+	o	o
Natriumbromid - wässrig	Sodium bromide - aqueous	Bromuro de sodio - acuoso	NaBr	+	+	+	+	+	+	+		+	o	o
Natriumcarbonat (Soda) - wässrig	Sodium carbonate (soda) - aqueous	Carbonato de sodio (soda) - acuoso	Na ₂ CO ₃	+	+	+	+	+	+	+		+	+	+
Natriumchloracetate	Sodium chloroacetate	Cloroacetato de sodio		+	+	+	+			+		+	+	+
Natriumchlorat - wässrig	Sodium chlorate - aqueous	Clorato de sodio - acuoso	NaClO ₃	o	o	+	+	+	+	o	+	+	o	o
Natriumchlorid (Kochsalz) - wässrig	Sodium chloride (salt) - aqueous	Cloruro de sodio (sal de cocina) - acuosa	NaCl	+	+	+	+	+	+	+	+	+	o	o
Natriumchlorit - wässrig	Sodium chlorite - aqueous	Cloruro de sodio - acuoso	NaClO ₂	o	o	+	+			-		o	o	-
Natriumchromat - wässrig	Sodium chromate - aqueous	Cromato de sodio - acuoso	NaCrO ₄	o	+	+	+	o		o		+	o	o
Natriumcyanid - wässrig	Sodium cyanide - aqueous	Cianuro de sodio - acuoso	NaCN	+	+	+	+	+	o	+	o	+	+	+
Natriumdodecylbenzolsulfonat - wässrig	Sodium dodecylbenzenesulfonate - aqueous	Dodecilsulfonato de sodio - acuoso		+	+	+				+	+	+	+	+
Natriumfluorid - wässrig	Sodium fluoride - aqueous	Fluoruro de sodio - acuoso	NaF	+	+	+	+		+	+	+	+	+	o
Natriumglutamat - wässrig	Monosodium glutamate - aqueous	Glutamato de sodio - acuoso		+	+	+	+			+			+	+
Natriumhydrogencarbonat - wässrig	Sodium bicarbonate - aqueous	Bicarbonato de sodio - acuoso	NaHCO ₃	+	+	+	+	+	+	+		+	+	+
Natriumhydroxid - wässrig	Sodium hydroxide - aqueous	Hidróxido de sodio - acuoso	NaOH	-	+	+	+	o		-	+	+	+	+
Natriumhypochlorit (Chlorbleichlauge) - wässrig	Sodium hypochlorite bleach - aqueous	Hipoclorito de sodio (lejía de cloro blanqueante) - acuosa	NaOCl	o	+	+	+	+	-	-		o	o	o
Natriumjodid - wässrig	Sodium iodide - aqueous	Ioduro de sodio - acuoso	NaI	+	+	+	+			+	+	+	o	o
Natriummercaptopbenzthiazol - rein	Sodium mercaptobenzothiazole - pure	Mercaptobenzotiazol de sodio - puro		+	o	+	+			o		+	+	+
Natriumnitrat - wässrig	Sodium nitrate - aqueous	Nitrato de sodio - acuoso	NaNO ₃	+	+	+	+	+	+	+	+	+	+	-
Natriumnitrit - wässrig	Sodium nitrite - aqueous	Nitrito de sodio - acuoso	NaNO ₂	+	+	+	+	+	+	+	+	+	+	+
Natriumpentachlorphenolat - rein	Sodium pentachlorophenolate - pure	Pentachlorofenolato de sodio - puro	C ₆ Cl ₅ ONa	+	+	+				+		+	+	+
Natriumperborat - wässrig	Sodium perborate - aqueous	Perborato de sodio - acuoso	NaBO ₃	+	+	+	+		+	o		+	+	+
Natriumpersulfat - wässrig	Sodium persulphate - aqueous	Persulfato de sodio - acuoso	K ₂ S ₂ O ₈	+	+	+	+			o		+	o	o
Natriumphosphat - wässrig	Sodium phosphate - aqueous	Fosfato de sodio - acuoso	Na ₃ PO ₄	+	+	+	+		+	+	+	+	o	o
Natriumpropionat - wässrig	Sodium propionate - aqueous	Propionato de sodio - acuoso	CH ₃ CH ₂ COONa	+	+	+				+		+	+	+
Natriumpyrosulfit - wässrig	Sodium metabisulphite - aqueous	Pirosulfito de sodio - acuoso	Na ₂ S ₂ O ₅	+	+	+			-	o	+	+	+	o
Natriumsilikate - wässrig	Sodium silicate - aqueous	Silicato de sodio - acuoso		+	+	+	+	+		+		+	+	+
Natriumstannat - wässrig	Sodium stannate - aqueous	Estanato de sodio - acuoso	Na ₂ SnO ₃	+	+	+	+			+			+	+
Natriumsulfat - wässrig	Sodium sulphate - aqueous	Sulfato de sodio - acuoso	Na ₂ SO ₄	+	+	+	+	+	+	+		+	+	+
Natriumsulfid - wässrig	Sodium sulphide - aqueous	Sulfuro de sodio - acuoso	Na ₂ S	+	+	+	+	+	+	+		+	+	+
Natriumsulfit - wässrig	Sodium sulphite - aqueous	Sulfito de sodio - acuoso	Na ₂ SO ₃	+	+	+	+	+	+	+		+	+	o
Natriumtartrat - wässrig	Sodium tartrate - aqueous	Tartrato de sodio - acuoso		+	+	+	+			+		+	+	+
Natriumthiosulfat - wässrig	Sodium thiosulphate - aqueous	Tiosulfato de sodio - acuoso	Na ₂ S ₂ O ₃	+	+	+	+		+	+		+	o	o
Natriumzinkat - wässrig	Sodium zincate - aqueous	Zincato de sodio - acuoso	Na ₂ [Zn(OH) ₄]	+	+	+				o			+	+
Natronlauge (Natriumhydroxid) - wässrig	Soda lye (sodium hydroxide) - aqueous	Sosa cáustica (hidróxido de sodio) - acuoso	NaOH	o	+	+	+	+	+	o	+	+	+	+
Nekal BX - wässrig (Färbereizmittel)	Nekal BX - aqueous (dyeing surfactant)	Nekal BX - acuoso (tensoactivo de tintorería)		+	+	+	o			+			+	+
Nickelbäder	Nickel baths	Baños de níquel		+	+	+				+			+	o
Nickelsulfat - wässrig	Nickel sulphate - aqueous	Sulfato de níquel - acuoso	Ni(SO ₄) ₂	+	+	+	+	+	+	+	+	+	+	o
Nitrobenzoesäuren - wässrig	Nitrobenzoic acids - aqueous	Ácidos de nitrobenzenceno - acuosos		+	+	+	+			+		o	+	+
Nitrobenzol - rein	Nitrobenzene - pure	Nitrobenzenceno - puro	C ₆ H ₅ NO ₂	o	-	+	+	o	o	-	-	-	+	+
Nitrose Gase - feucht und trocken	Nitrous fumes - wet and dry	Gases nitrosos - húmedos y secos	(NO, NO ₂ , N ₂ O ₄)	-	o	+	o	+	-	-			+	+
Nitrotoluole (o-, m-, p) - rein	Nitrotoluene (o-, m-, p) - pure	Nitrotolueno (o-, m-, p) - puro	C ₆ H ₄ (NO ₂)(CH ₃)	o	-	+	o	o	o	o		o	+	+
Oxalsäure - wässrig	Oxalic acid - aqueous	Ácido oxálico - acuoso	HOCCOOH	+	+	+	+	+	-	o			+	o
Obstbaum-Karbolinum (Karbolinum)	Fruit tree carbolineum (carbolineum)	Carbolíneo de árboles frutales (carbolíneo)		o	o	+	+			o	-	-	+	+
Oleum (rauchende Schwefelsäure)	Pyrosulfuric acid (fuming sulfuric acid)	Óleum (ácido sulfúrico fumante)	H ₂ SO ₄	o	-	+	+	-	-	-			+	o
Oliveöl	Olive oil	Aceite de oliva		o	-	+	+	+	+	o	-	+	+	+

Chemikalien- beständigkeit	Resistance to chemicals	Resistencia a sustancias químicas		FKM	EPDM	PTFE	FFKM	PEEK	POM	NBR	PU	LD-PE	1.4401/1.4571	1.4305/1.4104
4Ozon - feucht und trocken	4Ozone - wet and dry	4Ozono - húmedo y seco	O ₃	o	o	+	o	o	-	-	+	-	+	+
Paraffinöl (Mineralöle)	Paraffin oil (mineral oils)	Aceite de parafina (aceites minerales)		+	-	+	+	+	+	+	+	+	+	+
Perchlorethylen (Tetrachlorethylen) - rein	Perchloroethylene (tetrachloroethylene) - pure	Percloroetileno (tetracloroetileno) - puro	Cl ₂ CCl ₂	o	-	+	o	+	+	-	-	-	+	+
Peressigsäure - wässrig (6 %)	Peracetic acid - aqueous (6 %)	Ácido peracético - acuoso (6 %)	CH ₃ CO ₃ H	+	+	+	+			-			+	+
Petroleum - rein	Petroleum - pure	Petróleo - puro		+	-	+	+	+	+	+		o	+	+
Petroleumbenzin, Petrolether	Petroleum benzine, petroleum ether	Gasolina de petróleo, éter de petróleo		+	-	+	+	+		+		-	+	+
Pflanzenschutzmittel (Karbolineum)	Pesticide (carbolineum)	Plaguicida (carbolíneo)		o	o	+	+			o			+	+
Phenol - wässrig	Phenol - aqueous	Fenol - acuoso	C ₆ H ₅ OH	o	o	+	+	o	-	o	-	+	+	+
Phosgen (flüssig) - rein	Phosgene (liquid) - pure	Fosgeno (líquido) - puro	COCl ₂	o	-	+	+						+	+
Phosgen (gasförmig) - rein	Phosgene (gaseous) - pure	Fosgeno (gaseoso) - puro	COCl ₂	+	-	+	+					-	+	+
Phosphorchloride - rein	Phosphorous chloride - pure	Cloruro de fósforo - puro		o	-	+	+	+	-	-		-	o	o
Phosphorsäure - wässrig	Phosphoric acid - aqueous	Ácido fosfórico - acuoso	H ₃ PO ₄	+	o	+	+	+	-	o	+	+	+	-
Pikrinsäure (Trinitrophenol) - rein	Picric acid (trinitrophenol) - pure	Ácido pírico (trinitrofenol) - puro	C ₆ H ₂ (OH)(NO ₂) ₃	o	-	+	+	+		o	-	o	+	+
Pinen (Terpentinöl) - rein	Pinene (terpentine oil) - pure	Pineno (esencia de trementina) - puro		o	-	+	+	+	+	o		-	+	+
Pottasche (Kaliumcarbonat) - wässrig	Potash (potassium carbonate) - aqueous	Patasa (carbonato de potasio) - acuoso	K ₂ CO ₃	+	+	+	+	+	+	+	o	+	+	+
Propan (flüssig und gasförmig) - rein	Propane (liquid and gaseous) - pure	Propano (líquido y gaseoso) - puro	C ₃ H ₈	+	-	+	+	+	+	+	+	-	+	+
Propanol (Isopropanol) - rein	Propyl alcohol (isopropyl alcohol) - pure	Propanol (isopropanol) - puro	CH ₃ CH(OH)CH ₃	+	+	+	+	+	+	-	o	+	+	+
Propylenglykol - rein	Propylene glycol - pure	Propilenglicol - puro	HOCH ₂ CH ₂ CH ₂ OH	+	+	+	+	+	+	+	+	+	+	+
Pydraul-A 150	Pydraul-A 150	Pydraul-A 150		+	o	+				-			+	
Pydraul-A 200	Pydraul-A 200	Pydraul-A 200		+	o	+				-			+

Allgemeine Verkaufs- und Lieferbedingungen

1. Allgemeines und Geltungsbereich

Die Allgemeinen Geschäftsbedingungen gelten für alle SERTO Group Gesellschaften (SERTO AG, SERTO GmbH, SERTO S.A.R.L., EXMAR GmbH, SERTO Italiana S.r.l. und SERTO CZ s.r.o.) im folgenden "Lieferant" genannt. Die Angebote, Auftragsbestätigungen, Lieferungen und Leistungen erfolgen ausschließlich aufgrund dieser Geschäftsbedingungen. Änderungen, Ergänzungen oder entgegenstehende Bedingungen des Auftraggebers/Käufers/Bestellers gelten nur dann, wenn sie von uns im Einzelfall ausdrücklich schriftlich bestätigt werden. Mit der Auftragserteilung, spätestens jedoch mit dem Empfang der Ware, gelten unsere Allgemeinen Verkaufs- und Lieferbedingungen vom Käufer als angenommen.

2. Angebot und Vertragsabschluss

Unsere Angebote sind freibleibend. Schriftlich, mündlich oder fermündlich erteilte Aufträge werden erst durch unsere schriftliche Auftragsbestätigung für uns verbindlich. Bei Fertigung nach Kundenmuster/-zeichnung behalten wir uns eine Mehr- bzw. Minderlieferung bis zu 10 % (bei Auftragsmenge kleiner als 10 Stück behalten wir uns eine Mehr- bzw. Minderlieferung von 1 Stück) vor. Bei Bestellung auf der Grundlage der jeweils neuesten Ausgabe unserer Unterlagen, wie Kataloge, Preislisten oder Prospekte, ist zu berücksichtigen, dass unsere Angaben (insbesondere die technischen) insoweit unverbindlich sind, soweit nicht anderes ausdrücklich vereinbart ist oder sich aus einer entsprechenden Bezeichnung in den Unterlagen ergibt. Im Übrigen verstehen sich unsere Angaben in Unterlagen, wie Katalogen oder Prospekten, als Aufforderung zur Abgabe eines Angebotes. Eine vertragliche Bindung unsererseits bedarf einer schriftlichen Auftragsbestätigung, welche zugleich den Umfang der vertraglichen Verpflichtung festlegt. Weichen in der Auftragsbestätigung Angaben vom Angebot des Auftraggebers/Käufers/Bestellers ab, hat dieser unverzüglich zu widersprechen, wenn der Vertrag nicht zu diesen geänderten Bedingungen zustande kommen soll. Nachträgliche Ergänzungen, Änderungen oder Nebenabreden bedürfen der Schriftform. Wenn sich die Zahlungsfähigkeit oder die Vermögensverhältnisse des Auftraggebers/Käufers/Bestellers nach Vertragsabschluss so wesentlich verändert haben, dass unser Anspruch auf die Gegenleistung gefährdet wird, sind wir berechtigt, die Erfüllung des Vertrages zu verweigern, bis der Auftraggeber/Käufer/Besteller die Gegenleistung bewirkt oder Sicherheit für sie geleistet hat. Ist der Auftraggeber/Käufer/Besteller nicht in der Lage, innerhalb angemessener Frist die geforderte Sicherheit zu leisten, so sind wir zum Rücktritt berechtigt.

3. Preise / Lieferung

Preise des Lieferanten sind freibleibend und werden von der SERTO GmbH, SERTO S.A.R.L., SERTO Italiana S.r.l. und EXMAR GmbH in Euro und von der SERTO AG in Schweizer Franken (CHF) angegeben und gelten ab Werk (INCOTERMS 2020), jedoch ausschließlich Verpackung, Transportkosten, Zuschläge für Mindestauftragswert (Mindermengenzuschläge), Versicherung und der jeweils gültigen gesetzlichen Mehrwertsteuer. Die Umsatzsteuer wird gesondert ausgewiesen zu dem am Tage der Rechnungsstellung gültigen Steuersatz. Lieferungen erfolgen immer ab Werk.

4. Lieferungen, Liefer- und Leistungszeit

Die Vereinbarung von Terminen und Fristen bei Vertragsabschluss bedarf der Schriftform. Dasselbe gilt für deren nachträgliche Vereinbarung oder Änderung. Die Einhaltung einer Lieferfrist setzt den rechtzeitigen

General terms of sale and delivery

1. General and Scope of Validity

The General Terms and Conditions shall apply to all companies within the SERTO Group (SERTO AG, SERTO GmbH, SERTO S.A.R.L., EXMAR GmbH, SERTO Italiana S.r.l. and SERTO CZ s.r.o.), hereinafter referred to as the "Supplier". These General Terms and Conditions shall be exclusively valid for offers, order confirmations, deliveries and services. Modifications, supplements or conflicting conditions of the customer/purchaser/orderer shall only be applicable when expressly confirmed in writing in each individual case. By placing the order, or at the latest upon receipt of the goods, the purchaser acknowledges our General Terms and Conditions of Sale and Delivery.

2. Offers and Contracts

Our offers are subject to change. Orders placed in writing, verbally or by telephone shall only become binding for us with our written order confirmation. For manufactures according to customer samples/drawings, we reserve the right to an excess or short delivery of up to 10 % (for order quantities under 10 pieces, we reserve the right to an excess or short delivery of 1 piece). With respect to orders based on the most recent version of our documentation, such as catalogues, price lists or brochures, it shall be borne in mind that our information (in particular technical data) is non-binding in so far as no other agreements are specifically made or corresponding designation is contained in the documentation. In addition, our information in documentation, such as catalogues or brochures, shall be understood as an invitation to submit a quotation. A binding contract for our part requires a written order confirmation which establishes the extent of the contractual obligation. Should the order confirmation show information which deviates from that in the offer of the customer/purchaser/orderer, he must notify us immediately if the contract is not to be pursued under these altered conditions. Subsequent additions, modifications or other agreements must be made in writing. If, after conclusion of the contract, the ability to pay or the financial circumstances of the customer/purchaser/orderer have deteriorated to the extent that our right to compensation is jeopardised, we shall be entitled to refuse fulfilment of the contract until which time the customer/purchaser/orderer shall effect such consideration or provide a security for it. Should the customer/purchaser/orderer not be able to provide the required security within an appropriate time, we shall be entitled to withdraw from the contract.

3. Prices/Delivery

The Supplier's prices shall be subject to change and are given by SERTO GmbH, SERTO S.A.R.L., SERTO Italiana S.r.l. and EXMAR GmbH in Euro, by SERTO AG in Swiss francs (CHF), ex works (INCOTERMS 2020), but excluding packaging, transport costs, minimum order charge, insurance and the applicable statutory value-added tax. The sales tax shall be shown separately at the rate applicable on the day of invoicing. Deliveries shall always be made ex works.

4. Deliveries, Time of Delivery and Performance

The dates and deadlines must be agreed in writing upon conclusion of the contract. The same holds true for subsequent agreements or amendments. Adherence to a delivery time shall be subject to the timely receipt of all documents, parts and information to be supplied by the customer/purchaser/orderer as well as any advance payments contractually or legally owed by the customer/purchaser/orderer. If these requirements are not met, the delivery time shall be extended accordingly. The day of delivery shall be considered the

Condiciones generales de venta y entrega

1. Generalidades y ámbito de aplicación

Las condiciones generales de venta serán aplicables a todas las sociedades de SERTO Group (SERTO AG, SERTO GmbH, SERTO S.A.R.L., EXMAR GmbH, SERTO Italiana S.r.l. y SERTO CZ s.r.o.), en lo sucesivo denominadas el "Proveedor". Las ofertas, confirmaciones de pedido, entregas y prestaciones se realizarán únicamente en base a las presentes condiciones generales de venta. Las modificaciones, añadiduras o condiciones opuestas del contratante/comprador/cliente solo serán aplicables cuando en cada caso particular nosotros lo hayamos confirmado expresamente por escrito. Nuestras condiciones generales de venta y entrega se considerarán aceptadas por el comprador en el momento de la adjudicación del pedido, a más tardar no obstante en el momento de la recepción de los productos.

2. Oferta y conclusión del contrato

Nuestras ofertas no son vinculantes. Los pedidos adjudicados de forma escrita, oral o telefónica serán vinculantes para nosotros una vez los hayamos confirmado por escrito. En caso de fabricación según el diseño/dibujo del cliente, nos reservamos el derecho a entrega por encima o por debajo del pedido de hasta el 10% (en caso de una cantidad de pedido inferior a las 10 unidades, nos reservamos el derecho a entrega por encima o por debajo del pedido de 1 unidad). En caso de realización del pedido sobre la base de la edición más actualizada en cada momento de nuestra documentación, como catálogos, listas de precios o prospectos, deberá tenerse en cuenta que nuestros datos (sobre todo los datos técnicos) no son vinculantes en la medida en que no se haya acordado expresamente algo distinto o que ello resulte de la mención correspondiente en la documentación. Por lo demás, los datos contenidos en nuestra documentación, como catálogos o prospectos, se entenderán como requerimiento para la presentación de una oferta. Para que exista compromiso contractual por nuestra parte, es necesaria la confirmación por escrito del pedido que, a su vez, determinará el alcance de la obligación contractual. En caso de discrepancia entre los datos de la confirmación del pedido y los datos de la oferta del contratante/comprador/cliente, éste deberá objetar de inmediato para que el contrato no se celebre de acuerdo con estas condiciones modificadas. Las añadiduras, modificaciones o cláusulas accesorias posteriores deberán realizarse por escrito. Cuando la solvencia o la posición económica del contratante/comprador/cliente haya cambiado tanto tras la formalización del contrato hasta el punto de que nuestro derecho a la contraprestación se viera comprometido, estamos facultados para negarnos a ejecutar el contrato hasta que el contratante/comprador/cliente haga efectiva la contraprestación o constituya una garantía para tal fin. En caso de que el contratante/comprador/cliente no sea capaz de constituir la garantía exigida dentro de un plazo razonable, estamos facultados a desistir del contrato.

3. Precios / entrega

Los precios del Proveedor no son vinculantes y se expresan en euros en el caso de SERTO GmbH, SERTO S.A.R.L., SERTO Italiana S.r.l. y EXMAR GmbH, y en francos suizos (CHF) en el caso de SERTO AG, y se consideran franco fábrica (INCOTERMS 2020), sin incluir el embalaje, los costes de transporte, suplementos por valor mínimo del contrato (suplementos por cantidades pequeñas), el seguro y el impuesto sobre el valor añadido legalmente vigente. El impuesto sobre el volumen de negocio se contemplará por separado en virtud del tipo impositivo vigente el día de la emisión de la factura. Las entregas se realizarán siempre franco fábrica.

4. Entregas, fecha de entrega y fecha de prestación

La estipulación de fechas y de plazos en el momento de formalización del contrato debe realizarse por escrito. Lo

Condiciones generales continuación

Eingang sämtlicher vom Auftraggeber/Käufer/Besteller zu liefernden Unterlagen, Teile und Angaben sowie die Erbringung von vertraglich oder gesetzlich geschuldeten Vorleistungen des Auftraggeber/Käufer/Bestellers voraus. Werden diese Voraussetzungen nicht erfüllt, verlängert sich die Lieferfrist entsprechend. Als Tag der Lieferung gilt der Tag, an dem die Ware dem Auftraggeber/Käufer/Besteller abholbereit gemeldet wurde. Falls Versendung geschuldet ist, gilt als Tag der Lieferung der Tag, an dem die Ware an die Transportperson übergeben wird. Liefer- und Leistungsschwierigkeiten aufgrund von Ereignissen höherer Gewalt, die erst nach Abschluss des Vertrages eintreten und uns auch erst danach ohne Verschulden bekannt werden (wie z. B. unvorhersehbare Betriebsstörungen, Streiks, Aussperrungen, unvermeidbare Materialbeschaffungsschwierigkeiten und dergleichen), haben wir nicht zu vertreten. Ist das Leistungshindernis vorübergehender Art, so verlängert sich die Liefer- und Leistungszeit angemessen. Hat das Ereignis höherer Gewalt dauerndes Unvermögen zur Folge, so sind wir berechtigt, wegen des noch nicht erfüllten Teiles ganz oder teilweise von dem Vertrag zurückzutreten. Bei Abrufaufträgen, deren Erfüllung aus mehreren Teillieferungen besteht, können aus Lieferstörungen bei einer Teillieferung keine Rechte wegen anderer Teillieferungen dieses Auftrages geltend gemacht werden, es sei denn, der Auftraggeber/Käufer/Besteller weist nach, dass die teilweise Erfüllung des Vertrages für ihn kein Interesse hat. Dasselbe gilt, wenn die Teillieferung im Verhältnis zur Gesamtlieferung geringfügig ist. Bei Abrufaufträgen, deren Erfüllung aus mehreren Teillieferungen besteht, sind wir berechtigt, die gesamte Bestellmenge sofort herzustellen. Etwaige Änderungswünsche des Auftraggebers/Käufers/Bestellers können nach Erteilung unserer Auftragsbestätigung nicht mehr berücksichtigt werden. Zu Teillieferungen und Teilleistungen sind wir in zumutbarem Umfang berechtigt. Unvermeidbare Mengenabweichungen/Fertigungsergebnisse nach oben oder unten bis zu 10 % sind ohne entsprechende Anpassung des Kaufpreises anzuerkennen.

5. Gefahrübergang

Wir liefern auf Gefahr und Kosten des Auftraggebers/Käufers/Bestellers. Die Gefahr geht auf den Auftraggeber/Käufer/Besteller über, sobald die Ware zwecks Versendung unser Werk oder eines unserer Außenlager verlassen hat. Wird der Versand durch Umstände verzögert oder unmöglich, die der Auftraggeber/Käufer/Besteller zu vertreten hat, so geht die Gefahr am Tage der Meldung der Versandbereitschaft auf den Auftraggeber/Käufer/Besteller über. Angelieferte Gegenstände sind, auch wenn sie Mängel aufweisen, vom Auftraggeber/Käufer/Besteller unbeschadet der Rechte aus Abschnitt 6. entgegenzunehmen.

6. Gewährleistung

Geringfügige und/oder unerhebliche Abweichungen oder Änderungen gegenüber den Katalogen oder früher gelieferten Waren gelten nicht als Mangel. Unsere Angaben zum Liefer- und Leistungsgegenstand in unseren Katalogen, Prospekten und Preislisten stellen lediglich Beschreibungen, Kennzeichnungen und Richtwerte dar. Die Zusicherung von Eigenschaften und der Ausschluss branchenüblicher Abweichungen bedürfen in jedem Einzelfall der ausdrücklichen schriftlichen Vereinbarung. Für die von uns gelieferten Waren gelten die jeweils in den Ländern gültigen Untersuchungs- und Rügepflichten. Der Auftraggeber/Käufer/Besteller hat uns etwaige Mängel unverzüglich, erkennbare Mängel spätestens innerhalb 1 Woche nach Eingang der Ware, verdeckte Mängel spätestens innerhalb von 1 Woche nach Entdeckung unter eingehender Beschreibung schriftlich mitzuteilen. Die

day on which the goods are reported to the customer/purchaser/orderer as ready for pickup. If shipping is owed, the day of delivery shall be the day on which the goods are consigned to the forwarder. We shall not bear responsibility for delivery and performance difficulties due to force majeure events that take effect after conclusion of the contract and that are only known to us after the fact through no fault of our own (such as e.g. unforeseeable interruptions in operation, strikes, lockouts, unavoidable difficulties in material procurement and the like). If the obstacle to performance is of a temporary nature, the delivery and performance time shall be extended accordingly. If, however, the event of force majeure should result in a permanent inability to perform, we shall be entitled to withdraw as a whole or in part from the contract concerning the part not yet fulfilled. For call orders consisting of several partial shipments, no rights may be asserted for other partial shipments of this order on the basis of delivery problems for one partial shipment unless the customer/purchaser/orderer submits proof that partial fulfilment of the contract is of no interest to him. The same applies should the partial shipment be insignificant in comparison to the overall delivery. For call orders consisting of several partial shipments, we shall be entitled to manufacture the entire order amount immediately. Any change requests on the part of the customer/purchaser/orderer cannot be taken into account after our order confirmation has been issued. We are entitled to make partial deliveries and partial performance to a reasonable extent. Unavoidable upward or downward deviations in amounts / manufacturing results of up to 10% shall be allowed without any adjustments in the purchase price.

5. Passing of risk

We deliver at the risk and cost of the customer/purchaser/orderer. Risk passes to the customer/purchaser/orderer as soon as the goods leave our plant or one of our external storage areas for shipment. If shipment is delayed or not possible due to circumstances for which the customer/purchaser/orderer is responsible, the risk shall pass to the customer/purchaser/orderer on the day of notification of readiness to dispatch. The customer/purchaser/orderer shall accept delivered goods even if they exhibit defects irrespective of the rights stipulated in Paragraph 6.

6. Warranty

Minor and/or insignificant deviations or modifications compared to the catalogues or previously supplied goods shall not be considered a defect. The information regarding our goods and services provided in our catalogues, brochures and price lists merely constitutes descriptions, identifications and reference values. The assurance of characteristics and the exclusion of deviations customary in the trade shall be subject to explicit written agreement in each individual case. For goods supplied by us, the inspection duties and the complaint notification obligation valid in the respective countries shall apply. The customer/purchaser/orderer must report any defects immediately to us in writing and in full; visible defects are to be reported at the latest within one week of receipt of the goods, hidden defects at the latest within one week of detection. Warranty claims may not be put forward after the notification period has elapsed, as well as after 24 months of the passing of risk. For justified and accurately timed notifications of defect, our warranty obligation shall be limited, at our discretion, to reworking the goods or replacing them. Regardless of the fact whether we rework or supply new parts, only parts that exhibit a defect in the material or in our workmanship shall be replaced. Should subsequent deliveries or improvements fail, the customer/purchaser/orderer may only choose to demand a reduction in payment or termination of the contract. Claims for damages by the customer/

mismo será de aplicación para su estipulación posterior o modificación. El cumplimiento de una fecha de entrega establece como condición la entrada puntual de todos los documentos, piezas y datos que el contratante/comprador/cliente deba entregar, así como el pago de los anticipos adeudados contractual o legalmente por parte del contratante/comprador/cliente. Si no se cumplen estas condiciones, se prorrogará el plazo de entrega correspondientemente. El día de entrega será el día en que los productos del contratante/comprador/cliente se hayan declarado listos para ser recogidos. En caso de que se adeude la expedición, se considerará el día de entrega el día en que se haga entrega de los productos al transportista. No nos responsabilizamos de las dificultades de entrega y de prestación con motivo de acontecimientos de fuerza mayor que surjan tras la formalización del contrato y que se nos comuniquen también posteriormente sin mediar incumplimiento (por ejemplo, averías imprevisibles, huelgas, cierres patronales, dificultades en el aprovisionamiento de materiales y similares). Si la circunstancia imprevista es de tipo temporal, la fecha de entrega y de prestación se prorrogará de forma razonable. En caso de que el suceso de fuerza mayor provoque una imposibilidad duradera, estamos facultados a desistir del contrato total o parcialmente con motivo de la parte que todavía no se haya cumplido. Cuando un pedido sea abierto y su cumplimiento consista en varias entregas parciales, en caso de dificultades en una entrega parcial, no podrá ejercitarse ningún derecho sobre otras entregas parciales de este pedido, salvo que el contratante/comprador/cliente demuestre que el cumplimiento parcial del contrato no reviste para él interés alguno. Lo mismo será válido cuando la entrega parcial sea insignificante en relación con la entrega íntegra. Cuando un pedido sea abierto y su cumplimiento consista en varias entregas parciales, estamos facultados a fabricar de inmediato la cantidad de pedido total. Una vez hayamos confirmado el pedido, ya no podrán tenerse en cuenta las eventuales peticiones de cambio del contratante/comprador/cliente. Estamos facultados a realizar entregas parciales y prestaciones parciales dentro de un marco razonable. Los ajustes en las cantidades/resultados de producción inevitables que oscilen hasta en un 10% tanto hacia arriba como hacia abajo se reconocerán sin necesidad de adaptar de forma correspondiente el precio de compra.

5. Transferencia de riesgos

Realizamos la entrega por cuenta y riesgo del contratante/comprador/cliente. El riesgo se transferirá al contratante/comprador/cliente tan pronto como los productos hayan salido de nuestra fábrica o de uno de nuestros almacenes externos para la expedición. En caso de que el envío se retrasara o resultara imposible por circunstancias atribuibles al contratante/comprador/cliente, el riesgo se transferirá al contratante/comprador/cliente el día de la comunicación de la disponibilidad del envío. El contratante/comprador/cliente aceptará los productos entregados, incluso en el caso de que presenten deficiencias, sin perjuicio de los derechos del apartado 6.

6. Garantía

Las desviaciones o modificaciones insignificantes en relación con los catálogos o los productos entregados anteriormente no se considerarán deficiencias. Nuestros datos sobre el objeto de la entrega y de la prestación contenidos en nuestros catálogos, prospectos y listas de precios representan únicamente descripciones, identificaciones y valores de referencia. La promesa de características y la exclusión de las desviaciones habituales en el sector precisarán en cada caso particular del acuerdo expreso por escrito. Para los productos que entregamos serán de aplicación las obligaciones de examen y denuncia vigentes en cada país. El contratante/comprador/cliente deberá comunicarnos con una descripción detallada por escrito las posibles deficiencias de inmediato, las deficiencias reconocibles en el plazo a más tardar de 1 semana tras la entrada de los productos, las deficiencias ocultas en el

Condiciones generales continuación

Geltendmachung von Gewährleistungsansprüchen ist ausgeschlossen, falls Mängelrügefristen versäumt werden, ferner falls seit Gefahrübergang 24 Monate verstrichen sind. Im Falle rechtzeitiger und berechtigter Mängelrügen ist unsere Gewährleistungspflicht nach unserer Wahl auf Nachbesserung oder Ersatzlieferung beschränkt. Bessern wir nach oder liefern wir neu, werden nur Teile ersetzt, die einen Fehler in Werkstoff oder in der von uns geleisteten Werkarbeit aufweisen. Schlagen Nachlieferungen oder -besserungen fehl, so kann der Auftraggeber/Käufer/Besteller nur Herabsetzung der Vergütung oder nach seiner Wahl Rückgängigmachung des Vertrages verlangen. Für Schadensersatzansprüche des Auftraggebers/Käufers/Bestellers gilt Abschnitt 7. Schadensersatz wegen eines etwaigen Mängelfolgeschadens steht dem Auftraggeber/Käufer/Besteller nur für den Fall zu, dass bei Nichtvorliegen von uns ausdrücklich zugesicherter Eigenschaften das Risiko eines Mängelfolgeschadens durch die zugesicherte Eigenschaft ausgeschlossen werden sollte. Jegliche Gewährleistung ist ausgeschlossen für Mängel, die auf Nichtbefolgen oder Nichteinhalten der Montageanweisung und Einbauempfehlungen, auf fahrlässiger oder unsachgemäßer Behandlung, auf anderen Einsätzen oder anderer Verwendung unserer Waren oder unserer Leistungen als vertraglich vorgesehen, auf angegebenen Fremdmitteln oder auf Änderungen oder Instandsetzungsarbeiten beruhen, die seitens des Auftraggebers/Käufers/Bestellers oder Dritter unsachgemäß ohne unsere vorherige Genehmigung vorgenommen worden sind. Liegt ein Ausschlussstatbestand vor, trägt der Auftraggeber/Käufer/Besteller die Beweislast dafür, dass der von ihm geltend gemachte Mangel nicht durch ein zum Ausschluss führendes Verhalten verursacht wurde.

7. Schadensersatzansprüche

Wir haften nicht für bei Vertragsabschluss nicht vorhersehbare Schäden aller Art infolge Nichtlieferung oder verspäteter Lieferung, infolge einer Verletzung sonstiger vertraglicher Pflichten, für die Verletzung von Pflichten bei Vertragsabschluss sowie für Schäden aus unerlaubter Handlung. Das gilt nicht, wenn uns Vorsatz oder grobe Fahrlässigkeit zur Last fällt, wenn es sich um Fälle anfänglichen Unvermögens oder um die Verletzung einer für die Erreichung des Vertragszwecks wesentlichen Verpflichtung oder um die Verletzung einer betrieblichen Organisationspflicht zur Vermeidung von Konstruktions-, Fabrikations- und Gebrauchsmängeln handelt.

8. Eigentumsvorbehalt

Bis zur Erfüllung - bei Zahlung durch Wechsel oder Scheck bis zur erfolgten Einlösung - aller Saldo-Forderungen, die uns, aus welchem Rechtsgrund auch immer, gegen den Auftraggeber/Käufer/Besteller zustehen, bleibt die Ware unser Eigentum. Daneben werden uns die folgenden Sicherheiten gewährt, die wir auf Verlangen nach Wahl des Käufers/Bestellers freigeben, soweit ihr Wert die Forderungen um mehr als 15 % übersteigt. Eine Be- und Verarbeitung erfolgt stets unentgeltlich für uns als Hersteller, jedoch ohne Verpflichtung für uns, so dass wir in jedem Zeitpunkt und Grad der Verarbeitung an den Erzeugnissen Eigentum behalten. Der Auftraggeber/Käufer/Besteller verwahrt unser Eigentum unentgeltlich. Bei Verbindung/Vermischung mit uns nicht gehörenden Waren durch den Verkäufer/Käufer/Besteller und einem dadurch bedingten Eigentumsverlust wird bereits jetzt vereinbart, dass das entstehende Miteigentum des Auftraggebers/Käufers/Bestellers an der neuen Sache in Höhe des Rechnungsbetrages im Verhältnis zum Wert der neuen Ware nach Verarbeitung anteilmäßig zum Zeitpunkt der Verbindung/Vermischung auf uns übergeht und diese unentgeltlich durch den Auftraggeber/Käufer/Besteller verwahrt wird. Der

purchaser/orderer are governed under Paragraph 7. The customer/purchaser/orderer shall be entitled to compensation for any consequential damages caused by a defect only in the event that the risk of consequential damages due to the guaranteed characteristic should be excluded when an expressly guaranteed characteristic is not present. Any warranty is excluded for defects based on non-compliance or non-adherence to the assembly instructions and installation recommendations, on negligent or improper handling, on other applications or other uses of our goods or services than foreseen in the contract, on given outside resources or on modifications or repair work undertaken improperly by the customer/purchaser/orderer or third parties without our prior approval. If there is a state of exclusion, the customer/purchaser/orderer shall bear the burden of proving that the defect asserted by him was not caused by behaviour leading to exclusion.

7. Claims for damages

We shall not be held liable for all types of damages unforeseeable at the time of concluding the contract due to non-delivery or delayed delivery, due to violation of other contractual obligations, for violations of obligations upon conclusion of the contract as well as for damages due to unlawful acts. This does not apply unless it can be shown that we have acted wilfully or with gross negligence, unless it is a case of initial inability or the violation of an obligation essential to meeting contractual ends or the violation of the organisational duty of the company to prevent defects arising from design, production and use.

8. Retention of title

Until the customer/purchaser/orderer has settled all outstanding claims - in case of payment by draft or cheque until redemption of such - to which we are entitled for any legal reason, the goods shall remain our property. In addition, the following securities shall be granted us, which we may release on request at the discretion of the purchaser/orderer, provided their value exceeds the claims by more than 15%. Processing or working the goods is always free for us as the manufacturer, but without any obligation on our part, so that we retain title to the goods at all times and every degree of the processing. The customer/purchaser/order shall keep custody of our property free of charge. Should the customer/purchaser/orderer merge or combine our goods with other goods not belonging to us, thus causing a loss of ownership, it is hereby agreed that we shall acquire a share in the joint ownership of the customer/purchaser/orderer in the new item in the total amount of the invoice proportional to the value of the new goods after processing at the time of combining/merging and that the customer/purchaser/orderer shall keep custody of them gratuitously. The customer/purchaser/orderer shall be obligated to protect our property/joint property from deterioration, spoilage or loss with the proper care and diligence, also against his customers/purchasers/orderers. The customer/purchaser/orderer shall be entitled to process and to sell the reserved-title goods in the normal course of business, provided that he is not in arrears. Claims deriving from the resale of the reserved-title goods or other legal reasons pertaining to these goods, including all types of balance claims, are hereby assigned to us by way of security in full together with all ancillary rights. We provisionally authorise him to collect in his own name and for his own account all claims ceded to us and to forward the proceeds to us when payment is due. Has the authorisation to collect been revoked, the customer/purchaser/orderer shall be required at our request to disclose the assignments and to make available to us the necessary information and documents. It is not permitted to pledge or assign the reserved-title goods as a security. If a third party attempts to secure the reserved-title goods, the customer/

plazo a más tardar de 1 semana tras su descubrimiento. La aplicación de derechos de garantía quedará excluida en caso de que se descuiden los plazos de notificación de deficiencias, y además si hubieran transcurrido 24 meses desde la transmisión del riesgo. En caso de notificación de deficiencias puntual y procedente, nuestra obligación de garantía se limitará a elección nuestra a la reparación o al reemplazo. Tanto si optamos por la reparación como por el reemplazo, solo se sustituirán las piezas que presenten un defecto en los materiales o en el trabajo realizado por nosotros. En caso de que el reemplazo o la reparación fracasaran, el contratante/comprador/cliente podrá únicamente exigir la reducción de la remuneración o, a su elección, la cancelación del contrato. Para los derechos de indemnización por daños y perjuicios del contratante/comprador/cliente, será de aplicación el apartado 7. La indemnización por daños y perjuicios con motivo de posibles daños derivados de deficiencias solo le corresponderá al contratante/comprador/cliente cuando, en caso de ausencia de características aseguradas expresamente por nosotros, el riesgo de un daño derivado de deficiencias debería haberse excluido a través de la característica asegurada. Se excluye toda garantía para deficiencias que consistan en la inobservancia o el incumplimiento de las instrucciones de montaje y las recomendaciones de instalación, en la manipulación negligente o inadecuada, en aplicaciones o usos de nuestros productos o servicios distintos a los estipulados contractualmente, en medios ajenos especificados o en modificaciones o trabajos de conservación que el contratante/comprador/cliente o terceros hayan realizado de forma inadecuada o sin nuestro consentimiento previo. En caso de que exista un motivo de exclusión, recaerá sobre el contratante/comprador/cliente la carga de que la deficiencia reclamada no es resultado de un comportamiento que ha dado lugar a la exclusión.

7. Derechos de indemnización por daños y perjuicios

No nos responsabilizamos de los daños y perjuicios de todo tipo no previsibles en el momento de formalización del contrato con motivo de la no entrega o de la entrega con demora a causa de un incumplimiento de otras obligaciones contractuales, tampoco de la infracción de las obligaciones estipuladas en el momento de formalización del contrato, ni de los daños y perjuicios derivados de actos ilícitos. Esto no será aplicable cuando nosotros hubiéramos actuado con dolo o negligencia grave, cuando se trate de casos de comienzo de incapacidad o de la vulneración de una obligación esencial para el cumplimiento del efecto del contrato o de la vulneración de una obligación organizativa empresarial para evitar deficiencias de construcción, de fabricación y de uso.

8. Reserva de dominio

Los productos serán propiedad nuestra hasta el cumplimiento de todos los saldos deudores - en caso de pago por letra de cambio o de cheque, hasta que se efectúe el cobro - que el contratante/comprador/cliente nos adeude, independientemente de la causa jurídica. Además se nos concederán las siguientes garantías, que liberaremos previa petición a elección del comprador/cliente, siempre que su valor exceda las obligaciones de pago en más de un 15%. En tanto que fabricantes, el tratamiento y la transformación siempre nos corresponden de forma gratuita, sin ningún tipo de obligación para nosotros, de modo que conservamos el dominio de los productos en todo momento y en cualquier grado de transformación. El contratante/comprador/cliente custodiará nuestro dominio de forma gratuita. En caso de que el vendedor/comprador/cliente una/combine productos que no nos pertenecen y de ahí resulte una pérdida de dominio, se acuerda por el presente que la copropiedad resultante del contratante/comprador/cliente sobre la nueva cosa se nos transfiera por valor del importe de la factura final en relación con el valor del nuevo producto tras la transformación proporcional en el momento de la unión/combinación, y el

AGB Fortsetzung

Auftraggeber/Käufer/Besteller verpflichtet sich, unser Eigentum/Miteigentum mit der Sorgfalt eines ordentlichen Kaufmanns vor Verderb, Minderung oder Verlust zu bewahren, auch gegenüber seinen Auftraggebern/Käufern/Bestellern. Der Auftraggeber/Käufer/Besteller ist berechtigt, die Vorbehaltsware im ordnungsgemäßen Geschäftsverkehr zu verarbeiten und zu veräußern, solange er nicht im Verzug ist. Die aus dem Weiterverkauf oder einem sonstigen Rechtsgrund bezüglich der Vorbehaltsware entstehenden Forderungen, auch jede Art von Saldoforderungen, tritt er bereits jetzt sicherungshalber in vollem Umfang und mit allen Nebenrechten an uns ab. Wir ermächtigen ihn widerruflich, die uns abgetretenen Forderungen für eigene Rechnung und in eigenem Namen einzuziehen und den Erlös an uns bei Fälligkeit unserer Forderungen abzuführen. Ist die Einziehungsermächtigung widerrufen, so wird der Auftraggeber/Käufer/Besteller auf unsere Aufforderungen hin die Abtretung offen legen und uns die erforderlichen Auskünfte und Unterlagen zur Verfügung stellen. Verfügungen oder Sicherungsübereignungen der Vorbehaltsware sind unzulässig. Bei Zugriffen Dritter auf die Vorbehaltsware hat der Auftraggeber/Käufer/Besteller auf unser Eigentum hinzuweisen und uns unverzüglich zu benachrichtigen. Kosten und Schäden trägt der Auftraggeber/Käufer/Besteller. Bei vertragswidrigem Verhalten des Auftraggebers/Käufer/Bestellers, durch das der Wert der Ware als Sicherungsobjekt nicht unwesentlich gefährdet wird, sind wir berechtigt, die Vorbehaltsware nach Mahnung auf seine Kosten zurückzunehmen; der Auftraggeber/Käufer/Besteller ist zur Herausgabe verpflichtet. Die Geltendmachung des Eigentumsvorbehaltes sowie die Pfändung der Vorbehaltsware durch uns gilt nicht als Rücktritt vom Vertrag.

9. Zahlung

Alle Rechnungen sind innerhalb von 20 Tagen nach Rechnungsdatum ohne Abzug zu bezahlen. Bankgebühren gehen zu Lasten des Auftraggebers/Käufer/Bestellers. Alle Zahlungen sind direkt an uns zu leisten. Unsere Vertreter oder Reisenden sind nicht zum Inkasso berechtigt. Soweit der Auftraggeber/Käufer/Besteller keine besondere Nachricht gibt, werden Zahlungen jeweils auf die älteste offene Rechnung angerechnet. Eventuell gesondert schriftlich vereinbarte Skonti, die nur gewährt werden, wenn keine fälligen Rechnungen zur Bezahlung ausstehen, sind aus dem Rechnungsbruttobetrag zu ziehen, also aus der Summe aus Warenwert, Kosten für Nebenleistungen und Mehrwertsteuer. Gerät der Auftraggeber/Käufer/Besteller in Verzug, sind wir berechtigt, vom Eintritt des Verzuges an als Entschädigung ohne Nachweis Zinsen in Höhe von 2 % über dem jeweiligen Diskontsatz zuzüglich der gesetzlichen Mehrwertsteuer zu verlangen, unbeschadet unserer Möglichkeit, einen höheren tatsächlichen Schaden, insbesondere in Höhe des von den Geschäftsbanken üblicherweise berechneten Zinssatzes für offene Kontokorrentkredite, geltend zu machen. Kommt der Auftraggeber/Käufer/Besteller seinen Zahlungsverpflichtungen schuldhaft nicht nach, sind wir berechtigt, sofortige Bezahlung der insgesamt bestehenden Restschuld oder sicherheitshalber die einseitige Herausgabe der gelieferten Ware zu fordern, auch wenn wir Wechsel oder Schecks angenommen haben. Wir sind bei noch zu liefernden Waren außerdem berechtigt, Vorauszahlung oder zusätzliche Sicherheitsleistungen zu verlangen. Eine Zahlung gilt erst dann als erfolgt, wenn wir über den Betrag verfügen können, Zahlungen per Wechsel oder Scheck gelten erst nach endgültiger Einlösung als eingegangen. Sämtliche mit der Einziehung verbundenen Kosten gehen zu Lasten des Auftraggebers/Käufer/Bestellers. Für etwaige Nachteile wegen nicht formrichtigen oder rechtzeitigen Vorlegens oder Protesterhebung haften wir nur, wenn uns Vorsatz oder grobe Fahrlässigkeit zur Last fällt. Gegenüber

Terms and Conditions continuation

purchaser/orderer shall inform them of our ownership and notify us immediately. Costs and damages shall be borne by the customer/purchaser/orderer. In case of breach of contract on the part of the customer/purchaser/orderer by which the value of the goods as a security is not insignificantly endangered, we shall be authorised to take back upon reminder the reserved-title goods at his cost; the customer/purchaser/orderer shall be obligated to surrender the goods. Neither the assertion of title retention nor the pledging of the reserved-title goods shall constitute a withdrawal from the contract.

9. Payment

All invoices shall be payable in full within 20 days of the invoice date. Bank fees are to be paid by the customer/purchaser/orderer. All payments are to be made directly to us. Our representatives or travelling salespeople are not authorised to collect payment. Unless otherwise noted by the customer/purchaser/orderer, incoming payments shall be applied to the oldest unpaid invoice. Any special discounts agreed upon in writing, which are only granted if there are no outstanding invoices to be paid, are to be taken from the gross invoice amount, i.e. from the sum of the value of the goods, costs for additional services and value-added tax. If the customer/purchaser/orderer falls behind in payments, we shall be entitled to charge interest in the amount of 2% above the current discount rate plus the statutory value-added tax as compensation without proof from the time of default, regardless of the possibility to claim for higher actual damages, especially in the amount of the interest rate normally charged by commercial banks for overdrafts. If the customer/purchaser/orderer culpably does not meet his payment obligations, we shall be entitled to demand immediate payment of the entire outstanding balance or by way of security the provisional return of the supplied goods, even if we have accepted drafts or cheques. We shall furthermore be entitled to request advance payment or additional securities for goods not yet delivered. A payment shall be deemed effected when we can dispose of the amount; draft or cheque payments shall only be considered as being received upon final redemption. All costs incurred in the collection of payments shall be borne by the customer/purchaser/orderer. We shall only be liable for any disadvantages due to incorrect or untimely presentation or protest if we are charged with wilful or gross negligence. The customer/purchaser/orderer shall only be entitled to offset such claims against our payment demand which are undisputed by us or have been determined to be legally valid. The assertion of the right to retention is excluded. This pertains in particular to rights and demands derived from warranty claims.

10. Confidentiality

Unless otherwise expressly agreed in writing, the information provided to us in connection with orders shall not be regarded as confidential. Data made known to us during processing of the contract are stored in accordance with the applicable data protection laws.

11. Chemicals

Our chemical products, e.g. lubricants or sealants may only be used for commercial purposes by the customer or purchaser. They must not be given to private persons and must not be accessible to children or young people.

12. Data protection

The company may process and use the data recorded within the limits of the conclusion of the contract for execution of obligations under the contract. The company takes the measures necessary to secure the data in accordance with the legal regulations. The customer fully agrees to the storage and contractual use of his data by the company and is aware that

Condiciones generales continuación

contratante/comprador/cliente la custodiará de forma gratuita. El contratante/comprador/cliente se compromete a conservar nuestro dominio/copropiedad con la diligencia de un buen comerciante frente a su deterioro, reducción o pérdida, también frente a sus contratantes/compradores/clientes. El contratante/comprador/cliente está facultado a transformar o vender los productos de reserva en el marco de las actividades comerciales ordinarias siempre que no se haya retrasado en los pagos. Las obligaciones de pago que se originen de la reventa o por cualquier otra causa jurídica relacionada con los productos de reserva, también cualquier tipo de saldos deudores, nos las cederán en calidad de garantía ya ahora en toda su integridad y con todos los derechos accesorios. Le autorizamos de forma revocable a recaudar las obligaciones de pago que se nos han cedido por cuenta propia y en nombre propio, así como a entregarnos el importe al vencimiento de nuestras obligaciones. En caso de que se revoque la autorización, el contratante/comprador/cliente deberá dar a conocer públicamente a petición nuestra la cesión y poner a nuestra disposición la información y los documentos necesarios. Las daciones en prenda o las transmisiones en garantía de los productos de reserva no están permitidas. En caso de acceso de terceros a los productos de reserva, el contratante/comprador/cliente deberá hacer constar nuestro dominio e informarnos de inmediato. El contratante/comprador/cliente correrá con los costes y los daños y perjuicios. En caso de comportamiento contrario al contrato del contratante/comprador/cliente, por el cual el valor de los productos en tanto que objeto de cobertura se ponga en riesgo de forma considerable, estamos facultados (previa intimación) a retirar los productos de reserva por su cuenta; el contratante/comprador/cliente estará obligado a su devolución. La reivindicación de la reserva de dominio así como la pignoración de los productos de reserva por nuestra parte no será válida como desistimiento de contrato.

9. Pago

Todas las facturas deberán pagarse sin deducción dentro de los 20 días posteriores a la fecha de la factura. Las tasas bancarias correrán a cargo del contratante/comprador/cliente. Todos los pagos se nos abonarán directamente. Nuestros representantes no están autorizados a recibir cobros. Siempre y cuando el contratante/comprador/cliente no lo notifique en particular, los pagos se realizarán empezando por la factura pendiente más antigua. Los posibles descuentos acordados por escrito por separado, que solo se concederán cuando no existan facturas vencidas pendientes de pago, se extraerán del importe bruto de la factura, es decir, de la suma del valor de los productos, los costes por servicios accesorios y el IVA. En caso de que el contratante/comprador/cliente incurriese en mora, estaremos facultados para exigir, desde el inicio del retraso y como indemnización sin comprobante, intereses por valor de un 2% por encima del tipo de descuento correspondiente más el IVA vigente. Todo ello sin perjuicio de nuestra opción de reivindicar daños y perjuicios reales por un valor más elevado, en particular por el importe del interés que calculan habitualmente los bancos comerciales para créditos públicos de cuenta corriente. En caso de que el contratante/comprador/cliente no pudiese hacer frente por su culpa a sus obligaciones de pago, estaremos facultados a exigir el pago inmediato de la deuda pendiente íntegra o, por precaución, la devolución provisional de los productos entregados, incluso si hubiésemos aceptado letras de cambio o cheques. Además, en caso de productos que todavía no se hayan entregado, tendremos derecho a exigir un pago anticipado o garantías adicionales. Un pago se considerará abonado cuando podamos disponer del importe; los pagos por letra de cambio o cheque se considerarán realizados una vez hecho el cobro definitivo. Todos los costes vinculados al cobro correrán a cargo del contratante/comprador/cliente. En caso de posibles perjuicios a causa de una presentación o protesto que no se ajuste a la forma o impuntual, solo nos responsabilizaremos en caso de que nosotros hubiéramos actuado con dolo o

AGB Fortsetzung

unseren Zahlungsforderungen kann der Auftraggeber/Käufer/Besteller nur mit solchen Forderungen aufrechnen, die von uns unbestritten oder die rechtskräftig festgestellt sind. Die Geltendmachung von Zurückbehaltungsrechten ist ausgeschlossen. Dies gilt insbesondere auch für Rechte und Forderungen, die aus Gewährleistungsansprüchen hergeleitet werden.

10. Geheimhaltung

Falls nicht ausdrücklich schriftlich anders vereinbart, gelten die Informationen, die uns im Zusammenhang mit Bestellungen bekannt werden, nicht als vertraulich. Daten, die uns bei der Vertragsabwicklung zugänglich werden, werden im Sinne des jeweils anwendbaren Datenschutzgesetzes gespeichert.

11. Chemikalien

Unsere chemischen Produkte wie z.B. Schmierstoffe oder Abdichtmittel dürfen vom Auftraggeber/Käufer/Besteller nur für gewerbliche Zwecke verwendet werden. Sie dürfen nicht an Private abgegeben werden und dürfen nicht in die Hände von Kindern/Jugendlichen gelangen.

12. Datenschutz

Die Unternehmung darf die im Rahmen des Vertragschlusses aufgenommenen Daten zur Erfüllung der Verpflichtungen aus dem Vertrag verarbeiten und verwenden. Die Unternehmung ergreift die Maßnahmen, welche zur Sicherung der Daten gemäß den gesetzlichen Vorschriften erforderlich sind. Der Kunde erklärt sich mit der Speicherung und vertragsgemäßen Verwertung seiner Daten durch die Unternehmung vollumfänglich einverstanden und ist sich bewusst, dass die Unternehmung auf Anordnung von Gerichten oder Behörden verpflichtet und berechtigt ist, Informationen von Kunden diesen oder Dritten bekannt zu geben. Hat der Kunde es nicht ausdrücklich untersagt, darf die Unternehmung die Daten zu Marketingzwecken verwenden sowie für Werbezwecke an Ihre Partner weitergeben. Die zur Leistungserfüllung notwendigen Daten können auch an beauftragte Dienstleistungspartner oder sonstige Dritte weitergegeben werden.

Des Weiteren findet die Datenschutzerklärung Anwendung. Die Datenschutzerklärung ist auf der EXMAR Website zu finden.

13. Teilwirksamkeit

Auch bei rechtlicher Unwirksamkeit einzelner Punkte bleibt der Vertrag im Übrigen für beide Teile wirksam. Sollten im Übrigen einzelne der vorstehenden Bedingungen unwirksam oder aus einem sonstigen Grund nicht anwendbar sein, so bleiben die übrigen Bestimmungen gültig. Eine unwirksame Bestimmung ist durch eine entsprechende Regelung des dispositiven Rechts zu ersetzen.

14. Anwendbares Recht / Gerichtsstand

Erfüllungsort ist der Ort des Lieferwerks. Die Vertragsparteien vereinbaren die Anwendung des materiellen Rechts am Sitz des Lieferanten. Die Anwendbarkeit des UN Übereinkommens über den internationalen Warenkauf (WKR/CISG) wird ausdrücklich ausgeschlossen. Für mögliche bzw. allfällige Streitigkeiten aus diesem Vertrag vereinbaren die Parteien die Zuständigkeit der ordentlichen Gerichte am Sitz des Lieferanten. Der Lieferant ist jedoch berechtigt, den Auftraggeber/Käufer/Besteller an dessen Sitz zu belangen.

(Version 01/2020)

Terms and Conditions continuation

the company is obliged and entitled to disclose information from the customer to these or third parties at the order of courts or authorities. If the customer has not expressly forbidden it, the company may use the data for marketing purposes as well as pass it on to its partners for advertising purposes. The data necessary for performance may also be passed on to commissioned service partners or other third parties. Furthermore, the Data Protection Declaration applies. The Data Protection Declaration can be found on the EXMAR website.

13. Partial invalidity

The legal invalidity of individual points shall not affect the validity of the remainder of the contract for both parties. Also should any of the mentioned provisions be invalid or not applicable for any other reason, the rest of the provisions shall remain valid. An invalid provision shall be replaced by a corresponding regulation of non-mandatory law.

14. Applicable law / Place of jurisdiction

The place of performance shall be the location of the supplying plant. The parties to the contract agree to apply the substantive law at the domicile of the Supplier. The applicability of the UN Convention on Contracts for the International Sales of Goods (WKR/CISG) is expressly excluded. For any possible disputes arising from this contract the parties agree to the jurisdiction of the ordinary courts at the domicile of the Supplier. The Supplier is however entitled to take legal action against the customer/purchaser/orderer at his place of business.

(Version 01/2020)

Condiciones generales continuación

negligencia grave. Frente a nuestras obligaciones de pago, el contratante/comprador/cliente solo podrá compensar aquellas obligaciones que hayamos establecido de forma indiscutida o que se hayan establecido judicialmente. Queda excluida la reivindicación del embargo. Esto será en especial de aplicación también para los derechos y las obligaciones derivados de reclamaciones de garantía.

10. Confidencialidad

En caso de que no se acuerde por escrito algo distinto, la información que se nos dé a conocer en relación con los pedidos no será confidencial. Los datos a los que se nos dé acceso durante la tramitación del contrato se almacenarán en virtud de la ley de protección de datos aplicable en ese momento.

11. Sustancias químicas

El uso de nuestros productos químicos, p. ej., lubricantes o selladores, por el contratante/comprador/cliente debe limitarse a aplicaciones industriales. No entregar a particulares y mantener fuera del alcance de niños y jóvenes.

12. Protección de datos

La empresa podrá tratar y utilizar, con el fin de cumplir sus obligaciones contractuales, los datos recogidos con motivo de la celebración del contrato. La empresa adoptará las medidas necesarias para asegurar los datos conforme a la normativa aplicable. El cliente declara su plena conformidad con el almacenamiento y el uso de sus datos con arreglo al contrato por parte de la empresa y es consciente de que, a requerimiento de las autoridades judiciales o administrativas, la empresa estará obligada y facultada para transmitir a dichas autoridades o a terceros información sobre el cliente. Salvo prohibición expresa por el cliente, la empresa podrá utilizar los datos con fines comerciales y los podrá transmitir a sus socios con fines publicitarios. Los datos necesarios para la prestación de los servicios también podrán ser transmitidos al proveedor a quien se haya encomendado dicha prestación o a otros terceros.

Por lo demás, se aplicará la declaración sobre protección de datos, que se encuentra disponible en el sitio web del grupo SERTO.

13. Validez parcial

Incluso en el caso de que aspectos individuales resulten ineficaces jurídicamente, el contrato seguirá siendo por lo demás válido para las dos partes.

Si por lo demás algunas de las condiciones anteriores resultara ineficaz individualmente o no pudiera aplicarse por cualquier otro motivo, el resto de disposiciones seguirán siendo vigentes. Una disposición ineficaz deberá sustituirse por una reglamentación adecuada de derecho dispositivo.

14. Derecho aplicable / jurisdicción

El lugar de cumplimiento será el lugar de la fábrica proveedora. Las partes contratantes acuerdan la aplicación del derecho material de la sede del Proveedor. Queda excluida explícitamente la aplicabilidad de la Convención de las Naciones Unidas sobre los contratos de compraventa internacional de mercaderías (CISG). En caso de posibles desacuerdos derivados del presente contrato, las partes convienen en la competencia de los tribunales ordinarios de la sede del Proveedor. No obstante, el Proveedor tendrá derecho a demandar al contratante/comprador/cliente en la sede de éste.

En caso de duda, la versión alemana será obligatorio.

EXMAR

Hochwertig

Sie können sich auf uns verlassen. Wir garantieren Ihnen höchste Qualität. Für unsere Produkte verwenden wir ausschließlich hochwertigen Edelstahl (1.4571), unsere Verbindungen sind baumustergeprüft und verfügen über die branchenrelevanten Zulassungen.

High quality

You can depend on us. We guarantee maximum quality and use only superior quality stainless steel (AISI 316Ti). Our connections are type-tested and certified according to international standards.

Calidad puntera

Puede confiar en nosotros. Le garantizamos la máxima calidad. Para nuestros productos utilizamos exclusivamente acero inoxidable de alta calidad (AISI 316Ti); nuestras uniones están homologadas y tienen las aprobaciones pertinentes del sector.

Flexibel

Optimieren Sie Ihre Lagerbestände und nutzen Sie die hohe Verfügbarkeit unserer Produkte. Ihre kurzfristigen Wünsche erfüllen wir ebenso gerne, wie wir mit pünktlicher Lieferung dafür sorgen, dass Ihre Produktion reibungslos weiterläuft.

Flexible

Optimise your inventory. Our readily available products and prompt delivery service enable the smooth running of your production processes.

Flexibilidad

Optimice sus existencias y benefíciese de la alta disponibilidad de nuestros productos. Atendemos sus pedidos urgentes con la misma diligencia con la que suministramos puntualmente la mercancía para que pueda mantener el ritmo de producción.

Individuell

Ihre Fragen zu technischen Anforderungen werden von unseren Spezialisten kompetent beantwortet. Durch eine eigene technische Entwicklung verfügen wir über ein hohes fachliches Know-how. Gerne erarbeiten wir für Sie speziell auf Ihre Bedürfnisse zugeschnittene Systemlösungen und Sonderanfertigungen.

Individual

Your technical questions are answered competently by our specialists. Our in-house development team has extensive know-how, which they are glad to share with you in developing products made to your specifications as well as custom-made system solutions.

Personalización

Nuestros competentes especialistas contestarán sus preguntas sobre los requisitos técnicos. El hecho de disponer de un departamento de desarrollo técnico propio nos aporta amplios conocimientos especializados. Podemos elaborar soluciones de sistema y acabados especiales adaptados a sus necesidades a petición.
